

THE HOUSE AND HOME.

SUNDAY AIDS TO CONVERT THE FORMER INTO THE LATTER.

How to Tie a Square Knot—Splicing on a Headache—How to Dress a Table—The Kitchen of the Church—Drop Leaf Tables.

As I lifted a parcel a few days ago, by means of the string, the knot slipped and the parcel became undone. I was reminded by this of what an old sea-captain said to me when I was a youngster: "Every boy ought to be able to tie a square knot. A square knot, the way it is tied, is the tightest, and it will hold, and it is just as easily made as these knots which come apart with a slight strain. Not only should every boy learn this knot, but girls

HOW TO TIE A SQUARE KNOT.

also, will find it useful. Shop-keepers have a saying that: "A woman cannot tie up a parcel, she always pins it." To be able to tie a knot that will hold, is an accomplishment quite as useful as many that girls learn. The square knot is best for tying parcels, and wherever two ropes or pieces of cord are to be joined to one another it is one of the safest.

TO TIE A SQUARE KNOT.

Take an end of the cord in each hand, and cross them, laying the right-hand end over the left-hand end, as in fig. 1. Now pass the end, b, over toward you and under. This will bring the cords, as in fig. 2; then pass a over b, and through the loop, which will bring the parts as in fig. 3. By pulling the ends the knot will be closed, and no amount of strain will cause it to slip.

Splicing Out a Headache.

The ordinary nervous headache, says an exchange, will be readily relieved and in many cases entirely cured by removing the waist of one's dress, knowing the hair high up on the head out of the way, and while leaning over a basin, placing a sponge soaked in water as hot as it can be borne on the back of the neck.

Repeat this many times, applying the sponge behind the ears, and the strained muscles and nerves that have caused so much misery will be left to relax and smooth themselves out peacefully, and very frequently the pain promptly vanishes in consequence.

Every woman knows the aching face and neck generally brought home from a hard day's shopping or from a long round of calls and afternoon teas. She regards with intense dissatisfaction the heavy lines drawn around her eyes and mouth by the long strain on the facial muscles, and when she must carry that worn countenance to some dinner party or evening's amusement, it rubs her of all the pleasure to be had in it. Cosmetics are not the cure, nor bromides nor the many nerve sedatives to be had at the drug shop.

Use the sponge and hot water again, bathing the face in the water as hot as it can possibly be borne; apply the sponge over and over again to the temples, throat and behind the ears, where most of the nerves and muscles of the head centre, and then bathe the face in cold water running from the faucet. Cool and stimulating, it will outline come back to the face, an astonishing freshness and comfort is the result, and in a nap of ten minutes can follow, every trace of fatigue will vanish.

The same remedy is invaluable for sunburn, and the water case of sunbather afflicts of sensitive skins will succumb to the hot-water treatment. The cold douche should not follow in this case; instead a light application of vasoline or cod cream, which prevents peeling of the skin as the hot water prevents inflammation. Nothing so good as tired eyes has yet been discovered as bathing them in hot water, and neutralizing cases out of hot water yield to applications of cloths wrung out in hot water in which the hand cannot be borne.

How to Dress a Table.

Nowadays the most effective dinner table is that dressed entirely in white and having white glass, mostly of silver, the choicest piece work, and a number of soft lights, in the shape of candles, here, there and everywhere to make a mellow sunshine all round. The preferred tablecloth is of white damask. It may have been in the four-in-the-hand pattern, it may show, where such a thing is possessed, a coat of arms or a crest, but it is in much better taste, when these do not belong to the family, either to have the initials, or an elaborate monogram woven in announcing in this way that it was made to order. The linen cloth with a broad hemstitching, usually has the initials embroidered in running fashion, as if they were written, near the end, but sufficiently far up to come midway between the plate of the hostess and the first candlestick, or whatever ornament may be beyond. In this way the fine needlework shows to good advantage and, by-the-way, with such a cloth the napkins match, although, of course, the lettering is smaller and it is embroidered not in a corner, but straight, so that the napkin may be folded to be almost square.—Ladies' Mail in the Ladies' Home Journal.

The Kitchen of the Church.

The mission chapel has become a kitchen where the church does its sloppy work. Hundreds and thousands of churches in this country—geographically built and supported—but even when the weather is sunny and the half full of worshippers, and yet they are building mission chapels, because by some expressed or implied regulation the great masses of the people are kept out of the main audience room. Now, I say that any place of worship which is appropriate for one class is appropriate for all classes. Let the rich and the poor meet together the Lord the Maker of them all. Mind you, I say that Mission chapels are a necessity, the way churches are now conducted; but may God speed the time when they shall cease to be a necessity. God will rise up and break down the gates of the churches that have kept back the masses. And we be to those who stand in the way! They will be trampled under foot by the vast populations making a stampee for Heaven.—T. De Witt Talmage, D. D., in the Ladies' Home Journal.

Danger of Advertising Houses to Let.

The case of Noble v. Yates, tried by Mr. Justice Charles and a jury recently, should be noticed by house owners and intending tenants. It was an action against a house owner by a would be tenant for damages sustained through being injured when looking over a house which it was proposed to take. The jury found a verdict for the defendant. There seems, however, to be no doubt that if a person goes into a house

which is to be let, and falls, as the phrase is, into "a trap," that the owner of the house would be liable for damages, as, for instance, if a piece of an apparently sound flooring were to give way. On the other hand, people who go over houses must be careful. If they have been guilty of contributory negligence, they cannot, of course, recover damages. The moral seems to be that each party must be careful, but in some respects the chief care should be of the landlord, who must have no missing steps and similar "traps," which are so conducive to accidents.—New York Builder.

Dangers to Live.

Are we safe nowhere from bacteria, some one inquires, not even when we are sealed up in a vacuum in a glass case? Not content with showing us that bacteria monsters elude and fight in every drop of water we drink, scientific gentlemen have now been microscopically overhauling a hailstone and finding that an infinitesimal speck of the ice contains no less than 400 to 700 bacteria. They may be the germs of small-pox, scarlet fever, leprosy, naughtiness and crime. Not even ice will kill them, for they thaw out and wriggle ferociously. The invention of the microscope revealed wonders to man, but it has made life a burden to nervous people.

One Cause of Marriage Failure.

I never see a pitted, pampered girl, says Ella Wheeler Wilcox, who is yielded to in every whim by servants and parents, that I do not sigh with pity for the man who will some day be her husband. It is the worshiped daughter, who has been taught that her whims and wishes are supreme in a household, who makes marriage a failure all her life. She has had her way in things great and small, and when she desired dresses, pleasures or journeys which were beyond the family purse, she carried the day with tears or sulks, or posing as a martyr. The parents sacrificed and suffered for her sake, hoping finally to see her well married. They carefully hide her from her suitors who seek her hand, and she is ever ready with smiles and allurements to win the hearts of men, and the average man is as blind to the faults of a pretty girl as a newly-hatched bird is blind to the worms upon the trees about him. He thinks her little petish ways are girlish moods; but when she becomes his wife and reveals her selfish and cruel nature he is grieved and hurt to think fate had been so unkind to him.

Drop-leaf Tables.

Tables of a single leaf hinged to the wall are very convenient, and should be in much more general use. They are useful in almost any room in the house, and can be of any desired size. A simple small desk, for a dictionary or other reference book, a writing or study desk, a temporary shelf for plants, a kitchen table, etc., may each be constructed in this manner, and be of the breadth and length required for the use for which they are designed, or that of space and room. When not in use, they can be dropped down or turned up against the wall, or be so arranged as to be removed entirely. A correspondent sends a sketch of one in his own kitchen, made thus: "A double-beaded strip, about three inches wide, an inch

A CONVENIENT WALL TABLE.

thick, and about three and a half feet long, is firmly attached to the wall about thirty inches above the floor. A drop leaf eighteen inches wide is strongly hinged to this, supported by a swinging leg, or by side chains, indicated by the dark lines. The chains are more secure and reliable. When not in use, it is raised and held against the wall by a button. Neatly made, it is not unsightly, and is very useful in cooking, washing dishes, etc.—Unless very strong, it would hardly be firm enough for such heavy work. We have used such a table supported by stout iron wire for a long time.

Hints to Housekeepers.

Use ammonia in the water you wash glass in.

In baking cakes batter neither tin nor paper, and do not remove the paper till the cake is quite cold.

For a cold on the lungs, lay a cloth on the chest which has first been wrung out in boiling water and sprinkled with turpentine.

In serving chocolate shake a very little cinnamon over the filled cup to make the beverage like the chocolate of Mexico and Havana.

The eating-table should be set in a light, airy room, moderately heated, while the mental atmosphere should be one of quiet and happy relaxation.

If the sirloin weighs twelve or fifteen pounds, 2½ hours will be sufficient to roast it in. Beef must hang at least two days, its flavor is so much improved thereby.

To fasten a steel blade which has come out of the handle, fill the cavity with rosin, then warm the part to be adjusted, and insert slowly, pressing it in firmly. Hold it till it gets cold.

For rheumatism, take half a glassful of lemon juice for ten nights. Always take it when getting into bed at night. Wear flannel next to the skin, and in cold weather sleep in warm blankets.

A little powdered orax thrown into the bath makes the water very soft, and greatly invigorates and rests the bath. This is particularly beneficial to those who are troubled with nervousness or sleeplessness.

For freckles, nets have often been used with good effect, draped in graceful folds along the top of a room, or stretched directly upon the wall. They are used very largely for transom decorations, or as valances over windows or in alcoves.

In using paracetic, one drop for every month of age for a child under one year should be the rule. As, for instance, a child five months old may take five drops. It is scarcely necessary to say that paracetic should never be given a child unless it is absolutely needed, as in severe colic.

A slight burn should be tied up immediately in baking powder laid upon a wet cloth. This will usually prevent inflammation. But if the wound does inflame and become sore, bathe with equal parts of raw linseed oil and lime water. After the inflammation is out, heal with zinc salve, which can be procured from the druggist.

A tasteful drapery for a square waste-paper basket consists of two festoons of plush or satin; peacock blue is a good choice, alternating with two deep crocheted points of beige color or pale blue macramé cord in wheels, or any other pretty designs, and finished with heavy tassels of the cord. Rosettes and cords, both crocheted, finish the top and sides, and pompons of gathered plush may also be introduced if desired.

TEMPERANCE NOTES.

A competent observer declares that the lower strata of the Russian population are the most drunken people under the sun. The traveller finds drunkards in evidence everywhere, especially on Sundays, when, in many villages, all the men seem to be drinking and carousing. The women are generally sober. This intemperance is attributed largely to the church. During almost seven months out of the twelve, the ignorant and ignorant. Most of the men, however, are even eggs and milk. The drinking of the fiery and biting vodka, however, is allowed and even encouraged, and the Russian priests often drink themselves into intoxication without apparently forfeiting the respect of their congregations. The question is a very difficult one, as the revenues of the country are largely derived from drink, and temperance reformers are met everywhere with the answer, "It is best for the good of the drink vodka, but what would the Czar do without the taxes on it?" The universal adoption of temperance by the peasantry would make the government bankrupt at once, as the revenues from vodka pay the expenses of both army and navy.

Miss Jessie Ackerman, who has been travelling in the East, lectured at Bristol recently, giving an interesting account of her experiences. She reported that at one place visited by her in Japan there was a school, belonging to a Japanese, with whose history she became acquainted. A Japanese formerly carried on a very large brewery at that place, but somewhere he heard for the first time of the Gospel. It impressed him very much, and he thought a great deal about it. One of his neighbors had also heard about the Gospel, and they got a Bible studying it together. After reading it they became convinced that it was the true religion, and they embraced Christianity. After a time the brewer thought it was hardly consistent in him to carry on a brewery, and he gave it up. A desire then seized him to do something for the people, and a suggestion was made that he should turn the brewery into a school. This he consented to do. A floor was put to the brewery, and portions partitioned off in the upper storey for dormitories for the pupils. In the back part the school and chapel were established, the latter seating about 600 or 700 persons. A difficulty met them, however, as they had no altar or seats for the chapel. The missionary who had been sent for suggested that the vats should be made into seats. This was done. The wine-press was still standing, and it was converted into an altar. The furnishing was thus completed.

In wines, spirits and beer, alcohol exists in a greater or lesser degree. Wines contain from 20 to 25, spirits 38 to 55 and beers about 10 per cent. of alcohol. Now when alcohol is taken into the system it accelerates the motion of the heart and causes it to force the blood more rapidly to all parts of the body. At the same time it weakens it, weakens the small blood vessels which are spread out through the whole surface of the body, so that when the excessive supply of blood comes, they are not able to govern it, consequently more warm blood is sent into the skin than is natural, and of course produces more warmth. Now this warmth is not imparted by the alcohol, but is set free by it. The warmth that is felt is given off at the expense of the body. If the quantity of alcohol taken be comparatively moderate, it is sufficient to excite without actually causing intoxication, there follows a second condition or stage (assuming even that no more alcohol is taken) during which the flush of the face and skin dies away, the mind begins to get rather bored, or languid, and there is felt a slight chilliness of the body, and then the thermometer is now brought into play and the temperature will be quite decisive. To the person himself the condition is almost painful, he is depressed and chilled and in this state he easily takes cold, and in frosty weather readily contracts congestion of the lungs and bronchitis.

Some Strange Misnomers. Much of the Russia leather comes from Connecticut, Bordeaux wine from California, Italian marble from Kentucky, French lace from New York, and Spanish mackerel from the New Jersey coast. Dr. Pierce's Golden Medical Discovery comes from Buffalo, N. Y., but the medicine in its name to criticize for it is truly golden in value, as thousands gladly testify. Consumption is averted by its use, and it has wrought many positive cures. It corrects torpid liver and kidneys, purifies the blood, banishes dyspepsia, restores the system to its normal state, and removes the cause of disease, and tones up the system as nothing else will do. What is more, it is guaranteed to do all this, or the price is refunded.

Why does an old maid wear mittens?

To keep the chaps off.

Coming Events

Coming consumption is foreshadowed by a hacking cough, night sweats, pain in the chest, etc. Arrest its progress at once by taking Hayward's Pectoral Balsam, which never fails to cure coughs, colds, bronchitis, hoarseness, etc., and even in confirmed consumption affords great relief.

When are you a household utensil?

When I am a little pale.

The Head Surgeon.

Of the Lubon Medical Company is now at Toronto, Canada, and may be consulted either in person or by letter on all chronic diseases peculiar to man. Men, young, old, or middle-aged, who suffer from indigestion, weakness, and exhaustion, who are broken down from excess or overwork, resulting in many of the following symptoms: Mental depression, premature old age, loss of vitality, loss of memory, bad dreams, dimness of sight, palpitation of the heart, emissions, lack of energy, pain in the kidneys, headache, pimples on the face or body, itching or peculiar sensation about the scrotum, wasting of the organs, dizziness, specks before the eyes, twitching of the muscles, eye lids and elsewhere, bashfulness, deposits in the urine, loss of will power, tenderness of the scalp and spine, weak and flabby muscles, constipation, failure to be rested by sleep, desire of sleep, dullness of hearing, loss of voice, desire of solitude, excitability of temper, unkind eyes surrounded by leaden circles, oily looking skin, etc., are all symptoms of nervous debility that lead to insanity and death unless cured. The spring of vital force having lost its tension every function of the body is in consequence. The cause is committed in ignorance may be permanently cured. Send your address for book on all diseases peculiar to man. Address M. V. LUBON, 50 Front St. E., Toronto, Ont. Books sent free sealed.

Are You Safe

in buying Imperial Cream Tartar Baking Powder. It is the purest made. All grocers sell it.

What sticks closer to a brother?

A postage stamp, by gum.

ROBERT GEO. WATTS, M. A., M. D., M. R. C. S., of Albion House, Quadrant Road, Canonbury, N., London, Eng., writes: "I cannot refrain from testifying to the efficacy of St. Jacob's Oil in cases of chronic rheumatism, sciatica and neuralgia."

At what time of the day was Adam created? Just before Eve.

In order to give a quietus to a hacking cough, take a dose of Dr. Thomas' Electric Oil three times a day, or oftener if the cough spells render it necessary. This widely esteemed remedy also cures crick in the back, rheumatic complaints, kidney ailments, pains, etc. It is used inwardly and outwardly.

What bird is a lady fond of wearing around her neck? The ruff.

MILBURN'S BEEF IRON AND WINE is prepared from fresh, beef soluble iron, and pure sherry wine, combined with choice aromatics.

Why is a tin pan tied to a dog's tail like death? It's bound to occur.

Minard's Linalum cures Dandruff.

A MAN'S LIFE SAVED

I WOULD not be doing justice to the afflicted if I withheld a statement of my experience with Jaundice, and how I was completely cured by using Northrop & Lyman's Vegetable Discovery. No one can tell what I suffered for nine weeks, one-third of which I was confined to my bed, with the best medical skill I could obtain in the city trying to remove my affliction, but without even giving me temporary relief. My body was so sore that it was painful for me to walk. I could not bear my clothes tight around me, my bowels only operated when taking purgative medicines, my appetite was gone, nothing would remain on my stomach, and my eyes and body were as yellow as a guinea. When I ventured on the street I was stared at or turned from with a repulsive feeling by the passer-by. The doctors said there was no cure for me. I made up my mind to die, as LIFE HAD LOST ALL ITS CHARM. One day a friend called to see me and advised me to try Northrop & Lyman's Vegetable Discovery. I thought if the doctors could not cure me, what is the use of trying the Discovery, but after deliberating for a time I concluded to give it a trial, so I procured a bottle and commenced taking it three times a day. JUNE 8th or 9th at the expiration of the third day to find myself returning to health. I began to eat again, and I persevered in following the directions and taking Hot Baths two or three times a week until I had used the fifth bottle. I then had no further need for

the medicine that had SAVED MY LIFE—that had restored me to health—as I was radically cured. The natural color had replaced the dingy yellow, I could eat three meals a day, in fact the trouble was to get

enough to eat. When I commenced taking the Discovery my weight was only 132 lbs, when I finished the fifth bottle it was 172 lbs, or an increase of about half a pound per day, and I never felt better in my life. No one can tell how thankful I am for what this wonderful medicine has done for me. It has rooted

out of my system every vestige of the worst type of Jaundice, and I don't believe there is a case of Jaundice, Liver Complaint or Dyspepsia that it will not cure.

(Signed) W. LEE, Toronto.

WHAT IS IT?

This celebrated medicine is a compound extracted from the richest medicinal herbs, roots and herbs. It is the production of many years' study, research and investigation. It possesses properties purely vegetable, chemically and scientifically combined. It is Nature's Remedy. It is perfectly harmless and free from any bad effect upon the system. It is nourishing and strengthening; it acts directly upon the blood, and every part throughout the entire body. It quiets the nervous system; it gives you good, sweet sleep at night. It is a great panacea for our aged fathers and mothers, for it gives them strength, quiets their nerves, and gives them Nature's sweet sleep, as has been proved by many an aged person. It is the Great Blood Purifier. It is a soothing remedy for our children. It cures all diseases of the blood. Give it a fair trial for your complaint, and then you will say to your friends, neighbors and acquaintances: "Try it; it has cured me."

PERSONAL NAMES.

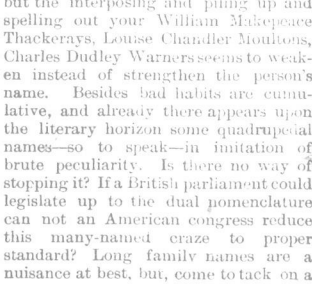

History of the Fashions of Singles and Doubles.

Single names were most common a thousand years ago says the Democrat-Gazette. As in the case with our Bucks and Brights in the open line, our Duns and Jerrys in the horse-stalls, or our Jip and Tige in the kennels, so then it was with man and woman kind—a single name was all-sufficient. In the time of King Henry I., about 800 years ago, double names became rather fashionable—so much so that Robert, his natural son, objected to marrying the wealthy heiress of a powerful lord because she had but a single name. From this time on the fashion changed, and in the time of Edward I. an act of parliament rendered it obligatory to take on the double name—the family name, or two names of some sort. Hence sprang up such names as Henry Fitz Randolph (Henry, son of Randolph), Hugh Fitz Henry, Henry Fitz Henry, etc. With such as had no clearly defined family ties location or occupation was used to help out, hence John atte Wood (John Atwood), William atte Water (Atwater), Thomas of the Woods, William atte Bachus (at Bakehouse, now William Baker), Margaret lon Cour good heart, now Margaret Bunker. Walter atte Shepyarde (now Walter Shepherd), John Scott was from Scotland, John Walsh was from Wales, Thomas Moore was from Denmark, and so on, almost every name being a revelation of its owner's location, condition, or occupation.

Then were the Smiths (the smiths of metals) most numerous; then sprang up the Butlers (bottlers), the Hunters and Porters, the Brewers, the Cooks, and the Clerks (clerics); but with all these names and double names no triple or double Christian names appeared for hundreds of years later—even until America brought one forth in the person of one Jonas Longford Rodwood of Rhode Island in 1706 and England Sir Copplestone Warwick Barnfield in 1817. John W. Bunyan or Christopher K. Columbus, John Thomas Calvin—such names were happily unknown—and the bare idea of such added stuff seems as outrageous as to now allude to the Hon. Abraham Lincoln.

There is good reason in double names, but the interposing and piling up and spelling out your William Melodepace Thackerays, Louise Chandler Moultons, Charles Dudley Warner seems to weaken instead of strengthen the person's name. Besides bad habits are cumulative, and already there appears upon the literary horizon some quadrupedal brute—so to speak—in imitation of names—politics. Is there no way of stopping it? If a British parliament could legislate up to the dual nomenclature can not an American congress reduce this many-named craze to proper standard? Long family names are a nuisance at best, but come to tack on a long Christian name and put a lot more long names between names, it becomes a positive tribulation—putting the pen slaves out of all patience with their overburdened owners. If the name unit might be placed at John Smith, and for every added syllable a double telegraph and postal rate were lawfully imposed, these preposterous, long-drawn signatures would soon be reduced to the plainer shape of Julius Caesar, Pontius Pilate, Martin Luther, and good old Andrew Jackson.

A BOON to Housewives.

The famous and working man who have been out in the mud all day can wash their boots clean before entering the house. They will be Soft, Polished and Dry, if dressed with

Wolff's ACME Blacking

Makes housekeeping easier. Saves Sweeping and Scrubbing. The boots will wear a great deal longer, will not get stiff and hard in snow or rain, and will be WATERPROOF. Ladies, try it, and insist on the best. Send for circular and full particulars. Unequaled as a Harness Dressing and Preserver.

Sold everywhere. A. L. ANDERSON & CO., general agents for Canada, 138 King St. W., Toronto, Ont.
