The year 1909 has not been either happy or prosperous n the coal trade of Nova Scotia. Cape Breton county has been the greatest sufferer, and when the returns are completed it will be found that the output of the Dominion Coal Co., as compared with 1008 will show a decrease of \$800,000 tors. The protracted strike is responsible for the whole of this and probably for a further loss of trade at the end of the year that would have been overtaken with the revival of business.
