

Mode of drawing side lines in double front Concessions in U. C. which are not of the full depth.

IX. And whereas some of the double front Concessions in the Townships in Upper Canada, are not of the full depth, and doubts have arisen as to the manner in which the division or side lines in such Concessions should be established: Be it therefore enacted, That in such Concessions the division or 5 side lines shall be drawn from the posts at both ends thereof, to the centre of the Concession, as provided in the thirty-seventh section of the Act first cited in the preamble to this Act, without reference to the manner in which the lots or parts of lots in such Concession shall have been described for Patent. 10
