

- Piroplasma*, 335
Piscicola, nucleoli in, 31
 ova of, chromidial discharge, 49
 Pituitary body, colloid matter of, 891
 internal secretion of, 357
 vicarious activity of, 108
 hypertrophy of, 597
 Placenta, disease of, effects upon foetus, 218
 hemorrhages of, causation of, 222
 infection through, 207, 327
 influence of disease of, upon foetus, 221
 moles of, 663
 transmission of metallic and other poison through, 220
 Placental mole, 663
 Plague, racial susceptibility to, 162
 Planaria, regeneration in, 603
Plasmodiophora brassicae, 840
 Plasmodium, 31, 417, 418
 Plasmolysis, 565, 567
 Plasmosomes. *See* Chromidia.
Platyhelminthes, 343
 Pleuropneumonia, contagious, of cattle, 995
 Plumbism. *See* Lead poisoning.
Pneumococcus, tissue predisposition to, 408
 Pneumonokonioses, 973
 Poisons, 298
 Polar bodies, 151
 double monsters and, 234
 dichotomy, 240
 hyperplasia, 238
 hypogenesis, 260
 Polarity of ovum, 138
 Poliomyelitis, epidemic, ultramicroscopic organisms of, 996
 Pollen as cause of hay fever, 410
 Polyblasts, 605
 Polycyanic acids, 64 (note)
 Polycythemia, 744
 after burns, 291
 Polydactylism, 64
 a dominant condition, 174
 due to mutation, 182
 inheritance of, 209, 214
 Polydactyly, 258
 Polymastia, 258
Polydon spathula, pancreatic cells of, 911 (note)
 Polyp, nasal, 719
 recurrent, 676
 Polypeptides, 57, 59
 Polyspermy, 234
 Postmortem imbibition, 957
 Potash, salts of, 307
 Potassium soaps, 94
 monophosphate, fatigue and, 401
 Precipitins, 524
 extent of specificity of, 525
 nature of precipitate, 526
 Precipitoids, 527
 Precocious development, 358
 Predisposition, 404
 Predisposition, forms of, 404
 of individual tissues, 408
 to infectious disease, inheritance of, 179
 racial, 162
 Preformation, 131
 Pregnancy, influence of, upon mammary glands, 363
 Preparator, 566
 Pressure, atmospheric, 285
 effects of, in developing ovum and embryo, 217
 Prezymogens, 50
 Prodromal, 455, 457
 Professional palsies. *See* Occupational palsies.
 Progressive tissue changes, 587
 Prolamins, 56
 Prophase, mitotic, 115
 Prosoplasia, 641
 Prostate, adenomatosis of, 789
 calculi of, 937
 carcinoma of, metastases in, 682
 Protagon, 96
 in autolysis, 372
 Protamins, 56
 Proteans, 57
 Proteases, 371
 Proteidogenous matter, 54
 essential to life, 77
 Proteins, alcohol soluble, 56
 classification of, 55
 conjugated, 56
 constitution of, 55
 defective intake of, 393
 derived, 57
 general survey of, 54
 molecular weight of, 55
 non-specific immunity in, 501
 simple, 56
 synthesis through reversible enzyme action, 82
 Proteoses, 57
 Protones, 58
 Protoxoids, 515
Protozoa, asexual multiplication of, 339
 as causes of disease, 331
 reaction to injury in, 416
 regeneration in, 601
 Prozymogens. *See* Prezymogens.
 Psammoma, 823
 Pseudohermaphroditismus, 279
 Pseudohypertrophy, 592
 Pseudoleukemia. *See* Lymphoma.
 Pseudomelanosis, 962
 Pseudomucin, 889
 Ptomaines, 384
 Ptyalin, 70, 91
 Puncture, 283
 Purgatives, mode of action of, 308, 309
 Purin bases, classification of, 64
 toxic effects of, 377
 bodies, 375
 Purpura, 312
 Pus, 431
 Pygopagus, 247, 253.
