

Light Draft John Deere Gang Plow

HOW TO SELECT A PLOW. THE RULE OF FOUR.

Plow quality does not improve with age.

An inferior plow does poorer work, is harder to pull, and costs more for repairs every year it is in use.

Because certain things about a plow cannot be changed for the better after you buy it, care and study before buying, is important.

Judging the real worth of a plow is not difficult if four things are kept in mind.

First—Quality of work.

Second—Ease of management.

Third—Lightness of draft.

Fourth—Strength and durability.

WHY THESE FOUR QUALITIES ARE THE TEST.

First—Nothing takes the place of good work. Unless a plow does perfect work you cannot afford to own it, no matter what the price.

Second—Have regard for your own comfort—that pays. Get a plow that is easy to ride, and that can be operated with little effort on your part.

Third—Never work horses harder than necessary. Horseflesh and horsefeed cost money. An extra one-eighth horse-power added to the draft will cost you the price of a plow—very soon.

Fourth—Repairs are expensive a good plow lasts longer than a poor one.

The Light Draft New Deere—Why it Pulls Easy

Consider five things when judging the draft of a plow. **First**—the shape of the bottom. **Second**—Material out of which it is made. **Third**—Equal weight on all the wheels. **Fourth**—Proper adjustments. **Fifth**—Staunchness of the plow.

Breaker and
Extension.

GOOD FOR ANY KIND OF PLOWING

Canada has considerable soil that is unusually difficult to work. It requires a plow of exceptional strength. If you have such a soil, you need a John Deere Stag No. 6 because it will stand up under the severe strain. You can hitch all the horses necessary to do any kind of plowing to a Stag No. 6 with perfect assurance that it will stay by you.

All brackets, clevis jaws, braces, etc., are hot-riveted to beam so they will not work loose.

Beam is the same size and strength as used on an engine plow.

Other parts are correspondingly strong.

In fact, the Stag No. 6 is the strongest sulky plow to be had.

If you don't have difficult plowing to do, the Stag No. 6 is a good plow to buy anyway, because it will last much longer than any ordinary sulky. It is light in draft, too. No plow pulls easier or does better work.
