A LABOR SAVING HAY MAKING OUTFIT

The saving of the hay crop is one of the most laborious operations of the farm. Much has been done during recent years to lessen the labor by means of the Hay Loader. The Hay Loader, though, is a very incomplete implement unless accompanied by the Side-Delivery Rake. A Side-Delivery Rake leaves a light, loose, continuous wind-row, which runs in the direction in which the rake is driven, such as the Loader can handle.
