. A. as a demhow-oaneither parent. Mr. H. H. Groff of Simcoe, a banker, who has been the wizard of the gladiolus in its improvement by securing prettier specimens with stronger constitutions and cheaper than had been produced before, spoke of his success so far, covering four years, in securing a cross-bred sweet corn by using the Black Mexican and Golden Bantam sweet corns as parents which was two feet higher than either parent, eared better and had yellow seed.

The election of officers on the following morning resulted in returning nearly all the old board.

Mr. Taylor of St. Giles, Que., read an interesting paper on potato growning in the seed that the had the during the last 50 years been selecting, as far as possible, blight-proof place, as By very careful selection place had been able to overcome blight to a very large extent. either parent. Mr. H. H. Groff of would harness the prairie winds to Simcoe, a banker, who has been the windmills, not only to pump water but the demands of our larger markets.—wizard of the gladiolus in its important to generate electricity for heat, light the Canadian Horticulturist.

February 24, 1910.

EXPERIMENTS IN NOVA SCOTIA

EFFERIMENTS IN NOVA SCOTIA.

Mr. E. S. Archibald, Truro, N. S., gave a paper on "Observation on Plot Work." at Truro Experimental Station, N. S. They were directing experiments to show the value of short rotations, drainage, proper varieties of seed and use of fertilizers. A good at a print of the state of the seed and use of fertilizers. A good and the seed of grain was one of the seed of the seed of the seed of grain was onto the seed of the se

conductive to carliness, shorter and firer straw.

Prof. F. T. Shutt of the C. E. F. followed with a talk giving data from his experiments in testing wheats grown on irrigated and dry farm lands. The amount of water supply he found to affect the protein con-tent. Dry farming wheat was richest in solution. in gluten.

ontario grown vegetable seeds.

Mr. Herold of the Ontario Seed Co., Waterloo, Cnt., gave a paper on the production of garden and vegetable seeds in Ontario. It was his contention that these could be grown successfully and profitably. The cheapers lands here offset to some extent, at least the cheap labor of the older of the content of ONTARIO GROWN VEGETABLE SEEDS.

THE PARMER AND CONSERVATION.

After Professor Black of Winnipeg and I may be a reliable to the meeting a little with the meeting a little with the meeting a

to generate electricity for mean, ngorand power.

Prof. Klinch presented four resolutions (1) thanking the Department of Agriculture for support, (2) the railways for reduced rates, (3) recombending the methods of C. S. G. A., (4) promoting farm demonstrations in grain and soil mixture.—T. G. Bavenar.

The Potato Situation

The Potato Situation

Wm. B. Leavens, Prince Edward Co.,
Ont.

The potato, at the present time, is the only cheap article of food in general use which, from the growers' standpoint, is very unsatisfactory. The 1909 crop was certainly a bumper one, and the price to-day is below that profitable production; so it seems a very good time to stop and consider with a second three productions are very good time to stop and consider with a second to the s

"Mr. Farmer, if some steel shingles are as leaky as the guarantee besind them, they're not worth the cost of labor in laying them. Stick to The Eastlake." — The Philosopher of Metal Town.

You can build cheaper than ever before-you can make your farm buildings weather proof for all time with -

METALLIG"

Lumber is of inferior quality now-a-days. Why pay high prices for it when you can cover your buildings with "Metallic"? Galvanized sheet steel is the most desirable building material known, and "Metallic" is the heaviest and toughest made. By actual test "Metallic" has proved itself the best material for roofing and siding. Roofs covered with "Eastlake" Metallic Shingles 25 years ago are in perfect condition to-day—absolutely lightning, wind, rain, snow and rust proof.

Look over this list, check the items that interest you, clip list and mail, with your name and address to us. We give you valuable information that will save you money. We will

"EASTLAKE" METALLIC SHINGLES—for all buildings.
"METALLIC" ROCK FACED STONE OR BRICK SIDING—

makes an artistic house.
"METALLIC" CEILINGS AND WALLS—most sanitary interior

"MANITOBA" STEEL SIDING—for grain elevators.

CORRUGATED IRON—for barns, implement sheds and stock

"METALLIC" GRANARY LINING - Easy to lay. Protects the grain from rats, mice and other vermin.

On receipt of your name we will mail you our interesting illustrated booklets, "Eastlake Metallic Shingles" and "Interior Decoration in Metal." Write to-day. MANUFACTURERS
