

Bassano Dam & Irrigation System near Calgary

Irrigation in Alberta

UNTIL the Canadian Pacific Railway undertook its three million irrigation project in Alberta, Calgary was a small ranchers' town. But to-day it is the largest city in that prosperous province—the busy trading centre of an immense stockraising and mixed farming district.

From the roof garden of the Palliser one sees the Rockies, round which blows the wara Chinook.

The Canadian Pacific has invested over \$15,000,000 on this irrigation project, which has 1,600 miles of canals and ditches in its Western section and will have 2,000 miles in its Eastern section.

The immense dam at Bassano, 7,000 feet in length, and the giant aqueduct at Brooks, are the greatest engineering structures of their kind on the North American continent.

For information as to tickets and lands apply to any Agent of the C.P.R., or

A. O. SEYMOUR, General Tourist Agent,
Canadian Pacific Railway, Montreal.
