

# CANADIAN MINING JOURNAL

VOL. XXXIX

TORONTO

No. 17

A big operator says:  
"There is only one way  
to cut out pay time dis-  
putes and that is to let  
every man print his own  
time record on a modern  
Time Recorder so he is  
satisfied it is right."

## Cut Out the Pay-Time Disputes Get More Production

A factory where a loose time keeping system is tolerated is like a hand with a running sore—it will never do its best work. Working time is too costly these days for you to lose a minute of it. Good operatives are too scarce for you to run the risk of losing them because your time keeping system is out of date.

### International Time Recorders

are made so that each employee delivers you a printed, mechanically accurate record of his working time, overtime, etc. You both know it is correct—it is bound to be satisfactory. The time sheets form the basis of a quickly made up pay roll saving endlhss hours of figuring by the cashier.

*We make time recorders, master clocks, etc., to suit the mining business. Let us send you our latest folders.*
