THE ATHENS REPORTER, OCT. 27, 1915

October 31, 1915. The boy Kings 11:1-20.

Commentary .- I. Joash preserved (vs. 1-3. Athaliah was the daughter of Ahab and Jezebel and was possessed of the same cruel and wicked disposition that had characterized her moth-Jehosophat erred greatly when he married his son Johoram to this wo-man. During the year that her son Abaziah reigned, she dictated the kind of administration to be given the kingdom. At his death she was not content to give way to a successor, but undertook to make herself secure in the ession of the throne by putting to death all who might claim heirship to the throne, including ber own grand-Ahaziah's sister, half-sister according to Josephus, preserved the life of the infant Joash, Ahaziah's youngest child, by hiding him in a room in the palace where beds were stored when not in use. Jehosheba was the wife of Jehoiada, the priest, hence was able to keep the child hid-den in the chambers of the house of the Lord to which she had access. Durng the seven years of Athaliah's isurpation of the throne of Judah, ing the Joash was carefully and successfully nuccen irom his cruei grauumother. Ine Lord's hand was signally seen in his preservation, for there was a gr work for him to do for the nation. preservation, for was a great

II. Joash made king (vs. 4-12.) 4. The seventh year—The seventh year of the life of Joash. Rulers over hunreds-These ward officer, in Judah's Their names are given in 2 army. 23: 1-3, where it is stated that' Jehoida, the priest, assembled the Levites and chief fathers of the nation at Jerusalem. Made a covenant with them-Jeholda gained the confidence and support of the people before he dised to them his purpose to depose Athaliah, who was reigning without right, and place Joash, the rightful sovereign, upon the throne. Jehoiada made a covenant with them by taking their solemn promise to co-operate with him in this plan. Showed them the king's son-It could not have been known that a son of Ahaziah was alive, and it was a revelation to the assembled leaders of Judah to have Joash brought into one of the cham-bers of the house of the Lord, where they were assemble 1. The sight of this boy who had a right to the throae and who had been providentially preserved from death could not fail to arouse the

patriotism of the people of Judah. 5. This is the thing that ye shall do -Jeholada had his plans of procedure clearly made and was prepared to give directions to the people. You that the final devices on the sabbath of the priests and Levites served by courses, one week at a time, and entered upon their duties on the Sabbath. Watch of the king's house—A third part of those coming in to perform service were to keep guard at the royal ace, so that no trouble could arise from that source, 6. Gate of Sur-This gate is not elsewhere mentioned, hence its location Is not ensewhere mentioned, hence its location is not known. It was a point evidently where opposition to Jehoi-ada's plan might arise. At the gate be-hind the guard—Reference is made to the royal guards, Jehoiada placed men-here for the number of taking core of the rest, she resolved, as if in reprisal the royal guards. Jehoiada placed men here for the purpose of taking care of these guards of Joash. 7. You that go forth on the Sabbath—In planning that the deposition of Athaliah should take place on the Sabbath Je-hoiada could make use both of those who were coming in to take up their week's duties and also of those who it. Nothing could more cle the wicked disposition of week's duties and also of those who were just finishing, and as the Sab-Jezebel in disposition-a fierce, imbi bath was the day of larger assem-blies of people at the temple, there would be no suspicion on Athaliah's Both women were idolaters and haters would be no suspicion on Athanian's part of what was taking place. Keep the watch of the house of the Lord-While three companies were keeping watch at the royal palace, other commarked by violence, bloodshed and political convulsion Their thust for dominion distinguished all natural affection. The elevation of Joash to the were guarding the boy Joash at the temple S. Compars the King round about-If Athallah or any of her supporters should know that Joash was alive and an attempt was being made to place him on the threne, every effort would be made to take his life. Ranges — Ranks, Let him be slaim — Whoever should break through the guards plac-ed by Joholada would be considered a supporter of Athaliah. 9. Did accord-ing to all things-Jeholada found in his associates faithful men who be-lieved that right should prevail in the nation. 10. King David's spears and shields-The weapons that David had the harden to this late is speed and shields--The weapons that David had taken from his defcated enemies had been placed in some of the chambers as memorials of his vic of the term of the guard stood ... round about the hing—The great altar stood in front of the porch of the temple, the guard extended from the and the guard extended from the northeast corner of the temple to the altar and from the of the temple to the altar and from the altar to the southtriangular area, 12. He brought forth [He set to work to detace) Athaliah's the king's son Jeholada led out before the people the hoy Joash who had never appeared publicly until that day. It was a bold step, but a righteous one. The position of Joash was by one of the pillars of the porch, the For the philars of the porch, the phace where the kings were crowned (v. 14). Put the crown upon him-Jeholada, the priest, placed the crown upon Joash's head. He was the one who ficiated upon this occasion. Gave him the testimony-This was the law of Moses. Joash was to know God's word was to rule his people in harmony it. Anointed him-The pries: anointed him for kingship. The priest anointed him for kingship. The anoint-ing oil was probably the same as that used for consecrating Levites to the priesthood. They clapped their hands —In token of their joy over the coron-stion of looch os king the priest ation of Joash as king, the people clapped their hands. It was a symbol of pleasure and approbation. God save the king-"Long live the king."-R. M. This exoresion was used when Saul was made king of Israel (1 Sam. 10. 24) 24)

ant. His second thought was for the welfare of his country. He therefore caused the king and people mutually to covenant together. His further thought was for the honor of true relithe beautiful approach to the house of the Lord. The sight that met her eyes of a boy, her own grandson, wearing the crown amid the acclamations of the people, should have made her trem-ble and say that justice was at last be-ing done, but she most insistently Uried, "Treason." She had been guilty of treason for seven years. Athaliah was slain as a punishment for her crimes, and thus ended the career of a the people, should have made her trem gion. Consequently he destroyed the temple of Baal and inaugurated the true worship of Jehovah. True worship and true government constituted the standard he raised. "All the people rejoiced" in the signal victory.-T. R. A oman not unlike the cruel and wick-

********************* THE POULTRY WORLD

LADY EGLANTINE'S RECORD.

Some years ago, even wise poultry editors scoffed at the idea of any hen laying 200 eggs in 365 days. Users of trap nests had told of remarkable laying, but as they came from unofficial sources, little credence was given them, and the 200-egg hen, though then in the yards of some breeders, Was not given the carried the the the source of the sou was not given the consideration it is Two hundred eggs in a year to-day. from a hen is mighty good laying, and while the 200-egg producers are not common, they are becoming more plentiful each year, where trap nest-ing is resorted to and proper breeding followed.

hovah. The officers with Jehoida took Joash from the temple and escort-Jehoida Each year at the laying contests held in different States the official world's ed him to the royal palace and placed him on the throne. This great change was made and the rejoicings of the record has been broken. Last year at the international contest staged at Thorndale, Pa., a Columbia Plymouth people. There was no disturbance in Rock took the honors for the year, a New Jersey product. This year a the city, for public sentiment was with Jehoiada in the course he pursued. Maryland Leghorn, the product of the Questions.--Who was king of Judah after Jehosophat before Athaliah usurped the throne? Who was Atha-Eglantine Farns, Greensboro, Md., A. A. Christian, of Philadelphia, owner, has broken all laying competition reliah? What course did she take to ob-tain the kingdom? Who was Jehoshecords, making this singlecomb White Leghorn the most wonderful layer in the world. It is doubtful if either ba? What praiseworthy act did she perform? Who was Jeholda? What plan private or any other records have ever approached the great record made by this hen, and it seems to the undid he propose and execute? How old was Joash when he began to reign? Into what covenant did the king and peoeducated in poultry lore that no hen " How was Baal-worship decould lay as many eggs, through moult. and all.

Those who scoffed at the 200-egg hen some years ago have experienced a change in heart, but few, even among the more experienced poultry-keepers were willing to admit the 300-egg hen. It seems to be here, unless Lady Eglantine dies, or ceases to lay very shortly. This little Leghorn has made history and will do as much III. Establsihed true religious reform. Revealed an overruling provi-The kingdom of Judah lest its as have other high-scoring egg pro-ducers to bring poultry keepers to breed for more eggs.

with which this lesson is connected be Among the majority of poultry keepers haphazard breeding has been the rule, with the result of indifferent egg production. With the advent of the longs to that series of events which were involved with the destruction of the house of Ahab. Among those who were slain in the fieres onslaught of laying contests held in different States, official records have shown Jehu was Ahaziah, king of Judan and son of Athalicah. Gcd had assured the possibilities of better egg produc-David of the continuance of his family. tion when the fowls have been placed under expert care, with the results of was almost extinguished by the bar barous malies of Athalian, the queen each year bringing forward a bird mother. Her hushand, Jehoram, had slain all the sons of King Jehosophat. that has bettered any previous record, and perhaps the end is not yet. The world's champion is not a haphazard-The Aratians had slain all Jehoram's sons except Ahaziah. Jenu had slain all their sons includin; Ahaziah. Folbred fowl. The manager of the Eglantine farm has been selecting the best layers, mating them to males of. lowing all this. Athaliah destroyed all that were left of the seed royal except the infant Joash. She did it from rehigh records for several years, and the official record of the world's champion proves that it has not been in vain rael. The house of Ahab being cut off uttorly, with her son Ahaziah among

There is only one way to tell the laying hen, and that is by the trap nest. Systems may come and go, and to a certain extent help, but no system yet, other than the trap nest, can tell how many eggs a hen has laid in 365 days. Lady Eglantine, with record at 292 eggs, is fully entitled to the glory that comes to a world's champion.

STORS, CONN., 200-EGG BIRD.

In last year's competition only a litle over sixty individual hens reached the 200 egg mark, or about seven and a half per cent. of the birds entered in the contest. In the present com-petition the management predicts something like 130 200 egg hens, or 13 per cent. of the individuals entered. This prediction includes all birds that had a record of 170 up to the end of August, and provided, furthermore, hat they hed eggs during the month of August. On this basis the subjected table has been made showing the probable number of 200-egg hens in each breed and the per cent. of the total number Breed Entered.Eggs. Cent No. 200 Per B. WHEN BUYING A HORSE. Buying a horse from an honest

trustworthy person is all right; but the majority of horses are purchased from dealers, and not a few of the latter are up to "the tricks of the trade." The man who knows nothing about a horse must rely upon the dealer's word, which in a great many cases has been the cause of a bad bar-gain. It is, therefore, well that a lit-tle knowledge be acquired before the step is taken. These tricks as practiced by deal-

ers are many. A horse is made to appear young by giving a stimulating dose. The process of filling up the depressions over an old horse's eyes is another matter that requires the art of an adept. This is termed "puff-ing the glims." The skin over the cavity is punctured, and the jockey then fill it with air from his mouth; the aperture closes, and the brow becomes as smooth as that of a young horse. Jockey go so far sometimes as to

paint a horse all over, if his color is bad; and dving in spots for the purpose of producing matched teams is a common practice. This is a clever trick and not easily detected. The white hairs which appear about the head and eyes of aged animals are frequently pulled out.

Horses, too, are doped to produce he appearance of flesh. Dealers frequently endeavor to pass off a glandered horse upon an unwary customer by stimulating the nostril until the animal has snorted away all he matter lying in them, and then

by injections of an astringent nature roducing a temporary suppression of be discharge. But of all the means by which the

dealey carries on his trade there are none so much relied on or so effective as bold and ingenious lying as bold and ingenious lying. This is his great resourse. It furnishes hishis great resourse. It furnishes his-tory, pedigree and warranty. Should there be blemishes on the horse, they can be easily explained away by plausible lies.

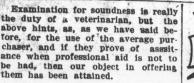

The safest man to purchase from is the reliable and long-established deal-er, who has built up a trade on honest principles. He not only wants to sell to you, but he wants to make your bargain so satisfactorily that you will

tell others about his fairness. The fact of the matter is that even few veterinarians are able in all cases to detect some forms of unsoundness in the horse. It is the purpose of this article to offer some hints that may be of assistance to those who do not "know !t all" when it is necessary for them to rely on their own judgment as to the soundness of some par-ticular animal. We will assume that the horse to be examined is sound externally, that is, is free of curbs, spa-vins, splints, ringbones, quarter vins, splints, ringbones, quarter cracks, bad eye sight, etc., and is to quarter A superficial examination of this

A superficial examination of this kind is all that is usually made, and that, too, under conditions often most favorable to the animal in question, it usually having been under motion for some time before the examination takes place. When such is the case, certain defects, such as certain forms Manitoba Deputation Makes Deed, as the lameness disappears with exercise. In all cases the horse to be examined

should be tied in a well-lighted stall should be tied in a well-lighted stall for at least one hour before moved out for inspection. During the time the animal is in the stable no one should be permitted to go near it. Ob-servation during this time will often reveal certain defects, and the hour's rest eives ample time for the hours to rest gives ample time for the horse to cool out.

Two things to watch for while the wneat, Mr. Norris clearly and concisely horse is in the stall are crib-biting and "weaving," the latter a form of chorea evinced only in the stable while the horse is not excited by the presented the arguments in favor of aboitshing the Canadian duties, in order that advantage should be taken presence of owner or groom. The of the offer in the Wilson tariff of is af-free entry of Canadian wheat and its o the products. He presented figures showing the spread in the prices term "weaving" is applied to this affection from the resemblance to the motions of the weaver; the subject the with a swaying motion from one t foot to the other. When the which had prevailed between beg and Minneapolis since the begin-ning of September, pointing out that the Winnipeg prices had ranged from Winni front foot to the other. When the horse is to be taken out have an attendant back it out of the stall, the examiner standing behind it and notthe Winnipeg prices had ranged from 6 to 12 cents lower than those pre-valling in Minneapolis. Mr. Norris stated that the fact that there was stated that fact that there was ing if there are any symptoms of stringhalt, for in backing out of stated that the fact that there was a good deal of damp grain in the American market all the more urgent. Hon, Mr. White gave the denuta-tion an attentive hearing, but in stall or turning suddenly around is surest method of detecting this defect, the horses will show it under such conditions that never at any oththe absence of Premier Borden and Sir George Foster, who are addressing patriotic meetings in Ontario and the Maritime Provinces, respectively. could give no definite answer to their representations. It is module it er time show the least symptoms The horse now being cool and in a natural condition, if there is any chronic lameness it is liable to show if trotted off to the halter before the tain, however, that no Governmental action along the lines suggested will norse had time to warm out of it by valking. The examination of the teeth is be taken this year. The question will undoubtedly come up when Parlia-ment meets, and pressure on the Govsomething that should not be over-looked when examining for soundness. ernment may then be strong enough to compel a change of the policy ad-hered to so far. "No that if a horse has bad teeth it will WELL CARED FOR not be a good horse for long. all the examinations have

NOTES.

Potassium sulphide, one ounce to two gallons of water, is recommended for mildew on lilacs or roses. This disease may be recognized by the white spots appearing on the plants.

There is less waste in feeding silage than in feeding fodder, because good silage, properly fed, is entirely consumed

The dairy barns are few and 'far between that have enough window space in them. One should allow about our square feet of light space for every cow.

Milk being scarce on many farms, the pig is likely to run short of the food most desirable for rapid growth, In such cases a good substitute for summer feed is a rape pasture. After the rape has grown eight to ten inches high, small pigs can be turned in. A large growth should be obtained before turning the larger hogs and sheep in, so as to prevent pulling of the plants. Do not allow too close pasturing, as this will prevent a second growth. Properly pastured, it will supply feed until winter.

A Massachusetts melon grower says he considers a swarm of bees in the vicinity of the melon patch an advantage in pollenizing the blossoms. They tend to help the vines to make a larger setting of fruit, and to a more perfect condition of the melons.

Breaking up the hardpan under the surface by the use of dynamite, deep plowing or subsoiling helps drainage.

Bulletin No. 400, of the New York Station at Geneva, advocates the use of ground limestone for correcting soil acidity, and gives strong evidence, from careful and extensive tests in other States and from considerable ex perience in New York, to show that his unburned stone, ground moderatey fine and applied in liberal quantities once in a rotation of from three to five years, is fully as effective as other forms of lime, and in most con ditions decidedly the most economical.

We talk about the drudgery of dairying, and it is rather a binding business; but it is the poor half of the herd that makes it so. Keep records, weed out those poor cows, pay more individual attention to the rest feed-Individual attention to the rest, feeding them up to their capacity to re-spond, and feed the rest of the field products to sheep or colts or steers or heifer calves, or even sell them or heifer calves, or even sell them outright. Cull out the unprofitable part of the herd and don't do it by guesswork. Some people think that they can tell by the looks of a pail how much milk there is in it. Any man who has not actually weighed or measured several milkings will be in-

clined to exaggerate the amount by from 25 to 50 per cent.

mand On Hon. W. T. White.

III. Athaliah slain (vs. 13-16.) Athaliah's sin was to be visited upon her own head. She had put to death many that she might reign, and now when right and justice wate to triumph she must pay the penalty. She was at-tracted by the shouting of the people and hastened from the royal palace up

throne of Judah had great importance in the history of redeciption inasmuch God's gni the house of David appeared in it. II. Discovered human instrumental ity. God's promise to David was bound up in one life, yet it did not fail. It was a special providence that Joram was a special providence that Joram married his daughter to Jehoada, a godly pricat. His interest in the tem-ple gave Jehosheba opportunity to pre-serve the life of the infant Jorah. Her interest in the royal family gave Jeholada an opportunity to set Jeash on the throne, and thus overthrow the wicked power of Athaliah. When the time for action came Jehoiada made his arrangements with the most summate skill. It devolved upon with the most conto rescue church and state alike from peril and to counterwork the wicked schemes of a bold and unscrupulous enemy. When the child was of suitthe affections of all classes of her sub-

jects, Jehoiada organized a revolution supporters from her cause by peaceful methods of persuasion. While trusting in God, Jehoiada took every precaution. The people were of one mind and Athaliah was left in her false security without a single friend to warn be

her danger. It was an indication of extraordinary prudence and political wisdom to be able to effect a complete her danger. revolution with the loss of but two

III. Established true religious form. Jehoiada was a faithful priest inder very trying circumstances. His popportunity for distinction rose from the difficult circumstances in which he was placed. At the peril of his life he had preserved one of the porti of his life ne had preserved one of the royal family, ite did not rebel against Athaliah for rebellion's sake. He did not end her reign because of any apathy to govern-ments. He believed in doing his utmost to overthrow even the power of the reigning queen when that power of wickedly obtained and exercised ickedly obtained and exercised a way dishonoring to God, and in

Athaliah's life-work was one of de-struction. Jehosheba's work was that f preservation. Jehoida's work was och destroying and preserving. Aimin at nothing for himself Jehoiada's thought was for the honor of God. He therefore renewed the Mosaic coven-

The best stroke of genius any man an show just now is to sort out every single old hen and sell her.

Every day a broiler stays on the farm after it is of marketable size, it cats a slice off the top of its head." Put a stop to that. Get them to town before they have done the de-capitating act to the finish.

Hens at large will take many a bife f grass and other green stuff, but just toss down before them a lettuce leaf and see how they will gobble it

It is not wise to conclude that because your poultry have the run of the fields they are getting all the grit they need. See that the supply is Better start with five hens and work up to a thousand than to start with a

thousand and work down to five. Poor shipping crates are costly things. To many broken eggs at the other end. Better pay five cents more for a good crate than to have half-aworth of eggs smashed.

It is fine to go to the home fair so as to let people know what kind of stock you have; but look out that you do not get the fever of following pens all over the country. Leave that somebody else. There are the days and nights that

the poultry keeper keeps careful watch on the growing flock. When crowd-ing of the poultry is indulged in the fall colds, often followed by roup, is seen

Giving your advice doesn't always satisfy the people who something for nothing. who want to get Good molars are about, as essential as good feet. It is a common saying, foot, no horse," and it might be

After

been made there remains the test for soundness of wind. The two most common ailments of this kind are heaves and roaring. Many dishonest dealers have become adepts in the matter of discussion matter of disguising or so palliating these defects in the horse that we have

known professional buyers to buy horses badly affected with the heaves. A sharp gallop of 100 to 200 yards will usually reveal whether or not the aninal is a roarer, but other methods are sometimes necessary as a test for heaves. Certain drugs and modes of feeding will palliate the disease, that feeding will palliate the disease, that it can be detected in only one manner, namely, "coughing" the animal. The cough of heaves is characteristic, and no matter how carefully the horse has been prepared to pass inspection, if it be forced to cough the affection

can be easily detected if present. In making this test, stand at one side, and with the hand grasp firmly the larynx, or throat, pressing it firm-ly, while the head is left free, and a

cough will be the result, either a na-tural and healthy cough or the char-acteristic cough of heaves.

INDIA MAKING SHELLS.

London Cable.—Iti is announced that shipments of shells manufac-tured in private factories and work-shops in British India have begun. This is regarded here as a decided advance in the industrial capabilities of India, the work having been car-ied out successfully through all proham ratace studing school at the dis-oscal of those arriving in the early hours of the morning from the front. cesses, from the iron ore to the finisproed product.

The work called for co-operation of that no consideration is paid to our railway shops, numerous private fac-follow-countrymen from the Domin-tons is to create a most misleading chiefs of native states. The quality of shells is said to be excellent

London Cable.— In the House of Commons to-day Mr. Cathcart put a question to the Under-Secretary for War concerning the provision made for colonial soldiers in London in the way of food and lodging. The ques-tioner suggested that they had no consideration naid them excent by London Cable .- In the House of consideration paid them, except by the Young Men's Christian Associa-Associa
