The Mission of Toilet Soap

A Toilet Soap should cleanse the skin, it should do this and nothing else. A safe soap is the one made from vegetable oils, with alkali and oil perfectly combined. Excess of oil means imperfect cleansing, excess of alkali means a roughened skin.

While cheapness in soap often means badness of quality, you need not pay high prices in order to get good soaps. Just now we are selling a splendid soap containing Buttermilk, Glycerine and Cold Cream, at **10c per box (3 cakes)**
