

The Late Bishop Jones

VENERABLE CANON SMITH, ADMINISTRATOR, SPEAKS FOR THE CHURCH.

The Evening Telegram. Bishop Jones—In the name and on behalf of the Church of England people in Newfoundland, I desire to give expression, in the public press, to our appreciation we entertain and our sympathy which has been extended to us by all the other religious communities in this land in connection with the death of our beloved Bishop, the Right Rev. Dr. Llewellyn Jones. Of him it can truly be said that he was a "peacemaker." He was a peace-maker in the effort that he made towards promoting good-will among his fellow men. Consequently his efforts in this direction were so effective and successful, for all recognized his greater regard for him and his peace-making.

His belief was, that while every man ought to stand firmly by what he is conscientiously believed to be the right principle in life and in general, yet in social life and in general, he should not stand aloof from any of his fellow men just because they did not agree with him at the same altar.

At the time that good Bishop Jones was in the Cana of Galilee, and the Divine Master during the time that he was in the world, he was a human body. He had this earth, and he was a human being.

His respect for Bishop Jones will be a worthy follower in the path of our good Bishop-elect. Let him please permit me, the Administrator, to give expression to the sympathy which is felt by the whole community with Canon Jones and their family in the bereavement from which they are now suffering. Their brave son, Sergeant Llewellyn Jones, of the Royal Newfoundland Regiment, has given his life in defence of King and Country.

No death is more honourable than that of a soldier. A son is a man, and dear Rex White was a man, affectionate and dutiful son. May God rest his soul and grant him light and peace, and may the God of all consolation, as I am sure He will, comfort the sorrowing hearts of his parents and near relatives. Sergeant White was buried in France on the same day that Bishop Jones was buried. Canon Jones, as your father, knew, he attended the funeral of Bishop Jones, for, as he told me, before the service commenced, he had attended the funeral for he felt it his duty to do so.

Love on, brave heart, love on, for the comforting will surely come to you. To return to the principal subject of this letter, it can truly be said of our late Bishop that his lasting memorial will stand in the hearts of those who loved him, and in the memory of those who held him in reverence. The Church people over whom he ruled, and the deep veneration in which he is held by people of other religions, and the monument of stone or marble, or even the most precious metal could not honourably commemorate him as well as will do. For children's children will be told of good Bishop Jones, and taught to honour his name and his memory. Certainly there is already in existence a beautiful building that will always be associated with his life and work of The Right Rev. Llewellyn Jones, and that is the grand Cathedral Church of this Diocese, which largely owes its existence to his living energy and untiring zeal for the good of his people. To see that we have but to enter this sacred building, and when we have entered to seek around for the name of our late Bishop, we will find it there. During the many years that his Bishop Jones ruled this Diocese he was in labour more abundant on the voyage of his visitation, and his rugged coast he was frequently periled by land and sea, besides that which came upon him daily, the care of his flock, and realizing that he loved him in return. No visitor was more welcome at the vicarages and Parsonages of this Diocese than was the Bishop. We look forward to his coming with pleasure. We were happy while he was with us, and sorry when he had to go. After the death of his wife, which happened over fifteen years ago, Bishop Jones led a lonely life at

DISEASE GERMS IN THE AIR

Aerial germs (greatly enlarged) that are inhaled with the breath and are disease in the throat and lungs.

PEPS PREVENT INFECTION

Throat and lung troubles are caused by infectious germs that infest the air and are breathed in. The natural safe-guard against this infection is to bathe the mouth and throat with the germicidal medicine that comes from a Peps tablet as it dissolves on the tongue.

The Pine vapor that is thus liberated fortifies every part of the mouth, throat and chest against the disease germs encountered in the overheated atmosphere of offices, factories, shops, theatres and street cars. Not only as a protection, but as a cure, Peps are unequalled for coughs, colds, sore throat, and bronchitis. Peps are the great British germicidal killing tablets. They keep disease off the lungs and are needed by every man, woman and child. All dealers 50c. box.

Bishop's Court. But he never complained. We who knew him intimately knew how much he was suffering, though to outward appearance he was ever calm and cheerful. Only twice did I ever know the good Bishop to make any allusion to his wife's death. The first time was at the biennial session of the Synod that was held next after the death of Mrs. Jones, and then all he said was, "I cannot tell you how helpful to me my dear wife was, and how much I miss her." The second occasion was at the time of my own dear wife's death in February, 1910, when he said to me, "My dear Smith, I can fully understand how much you are suffering now, since, as you know, I have passed that way myself. But God will comfort you." The dear Bishop had a large heart that overflowed with love and sympathy, especially for those who mourn. He loved Newfoundland, and he loved its people. In the letter of resignation of the See which he sent to me last July, he wrote: "I love the place, I love the people, I love the work, and I love the hope that I might be permitted to carry on the work a little longer and die in harness; but God has willed it otherwise, and He knows best."

The good old Bishop has gone to his saintly rest. "May light perpetual shine upon him."

WALTER R. SMITH, Administrator of the Diocese of Nfld. St. John's, Jan. 12, 1918.

Keeping the Quality Up. LAXATIVE BROMO QUININE, the World-Famous Cure for Colds and Grip, is now 30c. per box. On account of the advance in the price of the six different Medicinal Concentrated Extracts and Chemicals contained in LAXATIVE BROMO QUININE, it was necessary to increase the price to the Druggist. It has stood the test for a Quarter of a Century. It is used by every Civilized Nation. tu

Forget the Eight Ounces, it's only throwing your money away. But don't forget to have your suit or overcoat cleaned and pressed for the holiday season, as it is going to be very DRY weather, and you need good clothes. Phone 574 or send to SPURRELL the Tailor, 365 Water St.—dec19,eod,t

Fighting to Free New York Harbour of Ice. Coal Supply Ice-Bound—Tugs Trying to Break Up Blockade. New York, Jan. 4.—The fight to save New York from the menacing coal famine developed yesterday into a race between the icy winds and zero temperatures that were pouring in from the north on the waters about Manhattan Island, and a hundred tugs, fire-boats, police boats and one steel freight ship that was trying to break up the ice and stir up the waters so that there would not be a complete harbor blockade.

Every minute the near zero temperature held last night increased the danger that New York's fuel supply by water would be cut off. The Hudson River was frozen down to 200th Street, the Harlem River was frozen down to 140th Street, and ice fast forming in Staten Island waters threatened to cut off this huge coal terminal adjacent.

Faced by these conditions, A. H. Smith, director of railroads for the eastern district, appealed last night to Director-General McAdoo to obtain help from the Navy Department. A request made earlier in the day to Rear-Admiral Usher at the Navy Yard brought the information that no ice-breakers were available there.

Meantime, Mr. Smith called a meeting of the marine departments of all the coal-carrying railroads and arranged for a pooling of their efforts to get coal from the terminals to New York. There are available in the harbor 2,000 lighters and 300 car floats.

Everyday Etiquette. "When a girl friend brings her brother to call on me and I have never met him before, should I rise when he is introduced?" asked Peggy. "A hostess should always rise to accept an introduction to either a man or woman," answered her aunt.

Crewless Naval Warfare.

The Germans Try a New Form of Naval Warfare.

The Germans are trying a new scheme to overcome British supremacy at sea—a crewless raider operated by electricity. The Scientific American describes it as follows:—

Once more the Germans have sprung a surprise on the Allied forces, this time in the shape of a crewless raider that is electrically operated through a cable from a shore station. Already several of these craft have been encountered by British warships cruising off the Belgian Coast, but at the moment of writing all such attacks have failed of result.

The present crewless raiders of the Germans, we learn from statements of the British Admiralty, are electrically-controlled boats propelled by twin gasolene engines, partially closed in, and are capable of traveling at a high rate of speed. Each raider carries a drum with between 80 and 60 miles of insulated, single-core cable, which is paid out in the wake of the vessel, and through which the mechanism is controlled from shore. The forepart carries a considerable charge of high explosive, probably from 300 to 500 pounds, which is arranged to explode on impact.

The method of operating the crewless raider is to start the engine, after which the man leaves the boat. A seaplane, protected by a strong fighting patrol, then accompanies the vessel at a distance of from three to five miles and signals to the shore operator of the helm. These signals need only be "starboard," "port," or "steady."

By an obviously clever grouping of the wireless idea, the high-speed gasolene craft, and the electrically-controlled plan, the Germans have made use of the crewless raider scheme in a twentieth century way. They have not overcome the disadvantages of a trailing cable, to be sure; but they have overcome the problem of visibility, for the aerial observer in the seaplane which conveys the raider is at all times within visual distance. Since power to drive the craft is entirely self-contained and need not be transmitted through the cable, the Germans have been able to use a much smaller cable in this direction. It is evident that they use a one-wire cable, depending on the salt water for the return current to complete the circuit.

Just how effective the crewless raider is in practice still remains to be proved. Perhaps the Germans, over-confident of their scheme, have been rather premature in launching their latest naval surprise. Perhaps the crewless raiders are best adapted to work at night or during foggy weather, when the craft, by means of hooded lamps as in the case of the Stine-Edison torpedo, can remain invisible to the enemy while its course is in plain view of the seaplane observer.

Girls! Have Wavy, Thick, Glossy Hair Free From Dandruff

Save your hair! Double its beauty in a few moments—try this!

If you care for heavy hair, that glistens with beauty and is radiant with life; has an incomparable softness and is fluffy and lustrous, try Danderine.

Just one application doubles the beauty of your hair, besides its immediately dissolves every particle of dandruff; you cannot have nice, heavy healthy hair if you have dandruff. This destructive scrub robs the hair of its lustre, its strength and its very, and if not overcome it produces a feverishness and itching of the scalp; the hair roots famish, loosen and die; then the hair falls out fast.

If your hair has been neglected and is thin, faded, dry, scraggy or too oily, get a small bottle of Knowlton's Danderine at any drug store or toilet counter for a few cents; apply a little as directed and ten minutes after you will say this was the best investment you ever made.

We sincerely believe, regardless of everything else advertised, that if you desire soft, lustrous, beautiful hair and lots of it—no dandruff—no itching scalp and no more falling hair—you must use Knowlton's Danderine. If eventually—why not now?

Officer of "Ours" Writes.

The following is an extract from a letter written by an officer of the Royal Nfld. Regiment, a member of the Blue Puttees, who has been on active service ever since the beginning of the war:

"I am at present well out of the danger zone on a nice easy course at the Corps school, and may say same is heaven compared with the line, and needless to say I am not a bit sorry to be away from that last named cosy corner, as it is far too drafty for comfort, and those blasted Germans don't mind a bit who they fire their large 'coal boxes' at; but thank God I have been lucky enough to dodge them so far and am not looking forward to stopping one—don't laugh."

"Since leaving my battalion we have again been chasing the Hun, and I fear we have again met it badly, but I have not heard full particulars. I consider myself very lucky to be out of it but I consider I had done enough in our last show to have a rest. I confess I did work a bit overtime."

"I lost in the last show the best friend I ever had (as a soldier); it was Lieut. Jimmie Tobin. Jimmie Tobin told me he saw you and Hazel when you were at Bay Bulls on your honeymoon. He was to me what one could call a real friend, and when I heard of his death I wished I had been in the stant for revenge, but there will be plenty of opportunities yet."

"We have now got Fritz absolutely 'done in' so you will see him chucking in very soon."

"Both sides are using all possible means of taking away life, and I would not be surprised if someone invented something to make the enemy laugh till their sides burst. It is the only thing yet to be invented."

"The weather out here is not as pleasant as one would have for a Sunday school picnic at Mount Pearl. Oh for a cup of tea in the open air—the soldier says, 'Oh for a cup of tea under a roof.'"

"Please God after this little row is over I shall think nothing of marching twenty miles with a tent, three days' grub for 4 of 6, stove, coal, etc., on my back, not talk of gun, ammunition, etc.; think nothing of walking to Toppall for a stroll on a Sunday afternoon."

"Well, old boy, my 4th Xmas from home is drawing near, and I must wish you all a Bright, Jolly and Happy Xmas and New Year."

LEMONS BRING OUT THE HIDDEN BEAUTY. Make this lotion for very little cost and just see for yourself.

What girl or woman hasn't heard of lemon juice to remove complexion blemishes; to bleach the skin and to bring out the roses, the freshness and the hidden beauty? But lemon juice alone is acid, therefore irritating, and should be mixed with orchard white this way. Strain through a fine cloth the juice of two fresh lemons into a bottle containing about three ounces of orchard white, then shake well and you have a whole quarter pint of skin and complexion lotion at about the cost one usually pays for a small jar of ordinary cold cream. Be sure to strain the lemon juice so no pulp gets into the bottle, then this lotion will remain pure and fresh for months. When applied daily to the face, neck, arms and hands it should help to bleach, clear, smoothen and beautify the skin.

Any druggist will supply three ounces of orchard white at very little cost and the grocer has the lemons.

WARD'S LINIMENT CURES COLD IN COUGHS.

"V. C." Smoking Mixture

Is so beautifully cool with such a satisfying flavor and so convenient in the 15 cent size, the round tin fits away in the pocket so nicely and for the man who uses cut tobacco in the pipe, and to roll his own Cigarettes, "V.C." is the

"Just Right" Smoking Mixture.

NEW FURNITURE.

We have just received another shipment of New Furniture, Bought at Last Year's Prices, which we will offer at Old Prices to clear,

as prices will positively be much higher. Those intending to buy Furniture within the next three months, will do well to see same. It consists of:—

Sideboards, Extension Tables, Bureaus & Stands, Chairs, Rockers in various sizes and prices. Also, a small shipment of BEDS, we offer with our Springs and Mattresses, at special prices.

The C. L. MARCH CO., Ltd., Corner Water and Springdale Streets, St. John's.

MEN'S British Made COLLARS.

We have just opened a full range of sizes in those well known makes that have given such satisfaction in the past:

The Frinton, Saxon, Link, Royalty and St. Patrick.

Also, some Men's SOFT COLLARS, Cream and Striped. Men's White Rubber Collars, Boys' Rubber Collars.

Don't wait 'till we can't suit you, COME NOW.

A. & S. RODGER.

AN ADVANCE IN MILK—A number of milk vendors served notice on their customers yesterday that the price of milk would advance one cent per pint at the beginning of next month. This is the second advance within the past three months. The last jump is an advance of fourteen per cent over the present rate.

GOT COAL SUPPLY—A Norwegian ship to-day finished taking the supply of coal she put in here for.

LAI TO REST—All that was mortal Mrs. John Hogan, who died in this city, was interred at Harbor Grace, her native town, on Sunday afternoon. Rev. Fr. Walker conducted the burial service.

Stafford's Phorotone for all kinds of Coughs, Colds, Bronchitis, Asthma and various Lung Troubles.—nov6,t

Warner's Rust-Proof Corsets. A Work-a-Day Corset as well as for Dress.

Warner's Corsets are made to wear, not to rust, break or tear. You may pay all kinds of money for a Corset but you will never have a better fitting, a better wearing, or a more comfortable Corset than a Warner's.

We can give you any Warner's style that is correct for fashion and your figure, and we confidently expect to fill every Corset requirement with a Warner's Rust-Proof, so remarkable are they in shape, comfort and wear.

Price: \$1.50 per pair up.
