SECURITY FOR BONDS

Bonds will be secured, subject only to lien of the First Mortgage 6% Debentures, by direct mortgage upon freehold and leasehold lands and water powers with minor exceptions and upon all plants and properties now owned or hereafter acquired by Riordon Pulp & Paper Company, Limited. They are further to be secured by direct lien upon 60% of the Capital Stock of the Ticonderoga Pulp and Paper Company, and not less than \$5,000,000 par value of Preferred Shares and a majority of the Common Shares of the Kipawa Company, Limited, and by a floating charge on all other assets and properties of the Riordon Company.

KIPAWA COMPANY

The Riordon Pulp & Paper Company, Limited, will acquire from proceeds of this financing, together with other funds provided by the Company, not less than \$5,000,000 par value of 7% Cumulative Preferred Shares, and a majority of Common Shares of the Kipawa Company, Limited.

The Kipawa Company, Limited, now has under construction at Temiskaming, Quebec, a Bleached Sulphite Pulp Mill, with a capacity of 30,000 tons of Bleached Sulphite Pulp a year; together with electrolytic plant, bleachery, acid plant, etc. The Company is also installing the initial unit, with a capacity of 3,600 h.p., of a hydro-electric development with an ultimate capacity of over 25,000 h.p. The Kipawa plant, it is expected, will be in operation December, 1919.

RIORDON COMPANY

Complete prospectus, copies of which will be furnished on request, contains a letter from Mr. Carl Riordon, Managing Director of the Company, from which we summarize as follows:

RIORDON COMPANY is one of the oldest and largest producers in America of Unbleached Sulphite Pulp for sale. The business has been in successful operation for over 60 years.

PULP WOOD AVAILABLE, 3,000,000 cords, together with wood purchased from neighbouring districts, estimated to be sufficient for many years' operation at present capacity. Arrangements have been made to largely increase Company's wood supply.

COMPANY'S (and Subsidiaries) ANNUAL OUTPUT, adding output Kipawa plant available December of this year, 119,000 tons Bleached and Easy Bleaching Sulphite Pulp, Soda Pulp, Book Papers; and 20.000.000 feet b.m. lumber.

NET CURRENT ASSETS, as at 30th November, 1918, after deducting all Current Liabilities, amounted to \$2,250,491 exclusive of proceeds of this issue-equivalent to over 37% of Bonds outstanding.

PROPERTY VALUES by which these Bonds will be secured, show net value of the properties of the Riordon Company, and its net equity in the companies which it controls, to be in excess of \$15,000,000 or two and one-half times the total bonded debt of the Company, including this issue.

EARNINGS. Average net earnings of the Company for the three years 1916-1918 inclusive, before deducting depreciation and interest, amounted to over \$1,600,000, or over four times interest on all Bonds now outstanding. For the past six years, 1913-1918, inclusive, before deducting depreciation and interest, average net earnings amounted to more than \$1,000,000, or about three times the interest on all Bonds now outstanding.

Based on normal prices and costs for pulp and normal value of power, it is estimated that the NET EARNINGS OF KIPAWA COMPANY, LIMITED, for the year 1920, should be not less than \$750,000, which would permit the payment of substantial dividends on the Common Shares of the Company.

Two-thirds of this issue has been sold in the United States. We offer for sale in Canada the unsold portion of the balance at a price of-

noking.
