**THE SYMPTOMS OF MENTAL** decay resemble the gradual changes that come over the body, and are similar to those induced by excesses and bad habits, and the tendency is to the production of softening of the brain, insanity, the cause is deficiency of phosphate, as it is well known that man grows older and mentally weaker when the nervous system is insufficiently supplied with these elements—the solubility of the brain depending upon phosphoric acid compounds, and the phosphates which are richest in phosphates renovate most especially weakened brain power and loss of constitutional vigor. Dr. Whipple's Compound Phosphates and Calcium contains these agents in an easily assimilable form, constituting a brain and nerve food. 023-daw2w

**SLATE ROOFING PAINT!**

**AGENTS WANTED IN EVERY TOWN.**

A Roof may be covered with a very cheap shingle, and by application of this slate may be made to last from 20 to 25 years. Old roofs can be patched and coated, looking much better and lasting longer than new shingles without the slate, for ONE THIRD THE COST OF RE-SHINGLING. The expense of slating new shingles is only about the cost of simply laying them.

**The Paint is Fire-Proof**

against Sparks or Flying Embers, as may be easily tested by anyone, and appears from the fact that Insurance Companies make nearly the Same Tariff as for Slated Roofs. For Tin and Iron it has no equal, as it expands by heat, contracts by cold, and never cracks nor scales. For Fences it is particularly adapted, as it will not corrode in the most exposed places. Roofs covered with Tar Sheathing Felt can be made water-tight at a small expense. The Slate Paint is

**EXTREMELY CHEAP!**

Two gallons will cover over 100 square feet of shingle roof, or over 400 of tin or iron. **No Tar is Used in this Composition,** therefore, it does not effect the water from the roof, if turned off from the eaves before the first few rains. On Decayed Shingles it fills up the holes and pores, hardens them, and gives a new, substantial roof that will last for years. Curled or Warped Shingles it brings to their place and keeps them there. It fills up all holes in tin or felt roofs, and **STOPS THE LEAKS.** The color of the slate when first applied is dark purple, changing in about a month to a light uniform slate colour, and is, to all intents and purposes, **SLATE.** The Paint has a very Heavy Body, but is easily put on, and, although a slow dryer, rain will not affect it in the least one hour after applying.
