#### IMMENSE NEW GAS WELL! AT BOW ISLAND

Widespread interest is being manifested in the opening of another new gas well at Bow Island, Alberta, which is producing natural gas at the rate of 5,000,000 cubic feet every 24 hours. Attention was first attracted to Bow Island when the gas well, known as "Old Glory," was discovered. At the time of its discovery, "Old Glory," with its daily production of \$3,85,000 cubic feet of gas, was the largest natural gas well on the American continent. But, in addition to "Old Glory," Bow Island has four other gas wells, one of which is producing 28,000,000 cubic feet of gas daily.

The opening of this new well gives Bow Island a daily production of 61, 265,000 cubic feet of gas every 24 hours, and. the distinction of being the world's greatest natural gas field.

The Canadian Western Natural Gas Company, which controls the Bow Island gas field, and in which the Canadian Pacific Railway is understood to be interested, is to supply natural gas to Calgary and the work of piping the gas from Bow Island to Calgary is now under way.
