"Here I've been talking for a half an hour," exclaimed an auctioneer, "and I haven't got an offer."

"Half an hour, indeed," murmured an elderly maiden; "what's half an hour to many long years, and still no hopes of an offer?"—*Ex.*

Another lazy man has been found; he is on a western paper. He spells photograph, "4tograf." There have been only three as bad. One lived in Kansas and dated his letters, "11worth;" another spelled Tennessee, "10aC;" and the other wrote Wyandotte, "Y&."—*Temperance Cause.*

Fussy Old Gentleman (to a chance travelling lady companion)—Have you any children, madame?

"Yes, sir; a son."

"Ah, indeed! Does he smoke?"

"No, sir; he has never as much as touched a cigarette."

"So much the better, madame; the use of tobacco is a poisonous habit. Does he frequent the clubs?"

A youth in the preparatory course being asked to name the planets of the solar system, gave evidence not only of his thorough acquaintance with modern astronomy, but also of his special predisposition for discovery, in the following answer: "The morning star, the star that conducted the Magi to Bethlehem, the miraculous star, the star of noon, the dog star and the Montreal star." He might have added his own name as the star of his class.

An osteological phenomenon of an extraordinary nature occurred at the wind-up (*seu finale*) of a recent pugilistic mill between the western giant and the Rhode Island middle-weight. To wit: An osseous substance unclassifiable protruded from the proboscis of the aforesaid middle-weight. The fact is all the more wonderful (*mirabile dictu*) as the teeth of his opponent have been found to be in perfect order and the stratification of his own nasal appendage unaltered. Specimen preserved in C₂ H₆ O, may be seen at the University Dispensary.
