#### TESTIMONIALS.

MONTREAL, QUE., Nov. 15th, 1853.

I hereby certify that I have analyzed and tested the material called "White Bronze," manufactured for monumental purposes by the 5t Thomas White Bronze Monument Company, and I find a composed as represented, of Refined Metallic Zinc, of a very superior quality to sheet zinc, and almost absolutely pure. Its great durability under all exposure to weather and storm is therefore fully assured by its high quality. And it will resist decay and further oxidation when its surface is once coated. It is then more durable than stone, and will not loss its handsome appearance from generation to generation. I know of no other material which is equally capable of combining elegance of form, beauty of surface and indefinite durability.
