

Ⓔ SACCHARATED PEPsin. Ⓔ

(PEPSINA PORCI.)

This preparation of Pepsin is manufactured from the fresh stomach of the pig, in a pure and palatable form, without heat. It represents the digestive principle of the gastric juice, in a very active state, and in the form most convenient for administration. It is prepared with every possible care from the inner coating of the stomach, first removed from the other tissues of that organ. Combined with sugar of milk it will be found free from the disagreeable taste of many Pepsins.

Ten grains dissolved in acidulated water will digest from one hundred and twenty to one hundred and fifty grains of coagulated albumen at 100° F. in from four to six hours.

The experience of physicians has been so favorable to the use of Pepsin as an aid to impaired digestion and kindred affections, that it is only necessary to say the Saccharated Pepsin we manufacture exhibits the principle most fully, and will give therapeutic results to the entire satisfaction of the physicians wishing to prescribe this remedy.

Liquor Pepsinæ.—Each tea-spoonful of the Liquor Pepsinæ prepared by us represents the full dose of our Saccharated Pepsin, five grains, combined with Lactic and Muriatic Acids, Glycerine and water.
