“AS OTHERS SEE US”

“..... The Westminster Hall Magazine is a serious Review of high ideals devoted to Western interests. Its subjects are chiefly social, literary, educational and religious.

“It is read with great interest from month to month by a large circle of readers, and its influence is bound to increase.

“Such a Review should have the support of all who are interested in the social progress of Western Canada, and in the discussion of those problems which bear directly upon its life.”

The above sentences, quoted from the end of an independent review, speak for themselves—and this Magazine.
