

will prevent unfair action by U.S. competitors. You can put dumping and countervail cases before an impartial panel. This prevents one-sided decisions.

- The system for settling trade disputes will have a "watchdog" effect. This will discourage frivolous trade suits and cut the number of complaints.
- The FTA imposes strict time limits on settling disputes. So the system will resolve your trade problems quickly. It will replace rather than add to final appeal to U.S. courts.

AGRICULTURE

What We Got

- Removal of tariffs over 10 years.
- The new FTA will free Canada from U.S. beef and veal import laws.
- The FTA will prevent the U.S. from subsidizing farm exports to Canada.
- The U.S. cannot use technical regulations and disguised barriers to trade.

Here's What We Kept

- For the next 20 years, Canada can restore tariffs temporarily on fresh fruits and vegetables to counter American competition.
- We keep our present farm marketing boards. And we can put new ones in place.

How Do You Benefit?

- Canadians presently export to the U.S. almost \$4 billion a year in meat and livestock, grains and oilseeds, potatoes and processed food. Farm exports will grow under the FTA. If you are a farmer or producer, the deal gives you tariff-free trade and secure access to the U.S. market.
- We will protect farm income and jobs in agriculture. Our marketing boards are safe.
- Food processors will have access to competitively priced goods.
- These benefits will help farmers and producers across the country.
