

### TONIGHT WILL SEE BIGGEST YET HELD

Night Operations on Large Scale by Second Contingent Troops.

### NOT ONE FELL OUT

Cyclist Corps Had Big Day and Men Are in Splendid Condition.

Night operations on the largest scale yet held will take place this evening with several thousand second contingent troops in action, including infantry battalions, cyclist corps and the cavalry. The operations will consist mainly of relief of outpost under cover of darkness. The manoeuvres will be largely directed by the command commanders, as the orders to the men are only to be whispered.

Another "warrant" by the officers of the artillery, the second contingent, will be held "down the Kingston road" today. They will practice observation fire, by means of "powder" which exploded near targets set up a thousand feet away. Map-reading and panoramic sketching will also be done.

At Niagara Camp. It is said to be not improbable that an infantry brigade of four battalions will be in camp together at Niagara when it opens in May. The battalions now spoken of are the 25th, 26th and 27th (third contingent). The additional one might be either the 23rd Battalion (London), 24th (Guelph), or the 28th (Kingston). The work of preparing the Niagara camp is now proceeding. Major S. F. Biggs, Canadian Field Engineer, has a staff at work laying watermains, fixing telephone lines and putting the grounds in shape.

Premier Borden is said to have sent a message promising to do all in his power to see that the university camp was held. The date mentioned some time ago for the holding of the camp was May 2 to 17.

At Cedarvale Again. Tactical exercises were held at Cedarvale yesterday by the Mounted Rifles, under direction of Col. Vaux Chadwick. An all-day route march was held west of the city by the 15th Battery of the 4th C.F.A. The Cyclist Corps, commanded by Col. G. T. Denton, Jr., in a route ride to Oakville, did the return trip of 52 miles in about three hours. One platoon of the cyclists went to Burlington and back, 36 miles each way, carrying rations with them and holding brief manoeuvres. Not one member of the corps fell out of the lengthy trip.

In a signaling contest between the corps of the 19th Battalion and the Artillery Brigade, the artillerymen were declared the winners.

Official notice of allotment of chaplains for duty with the 19th and 20th Battalions, C.F.A., was made yesterday. Chaplain and Hon. Capt. A. Sibley is attached to the 19th and Chaplain and Hon. Capt. C. B. Robinson to the 20th.

Private Cook, Ordent and Packerham, have been released from the General Hospital as cured. They are now at the camp station hospital and will be examined by the medical board. They will either be put back on their units or put on extended leave at their homes.

Private Malcolm is still ill at his home in Brantford, Ont.

Private Wilkinson and Privates McMillan and Houghton are now practically better and their early release is expected. Three soldiers are still ill at the General Hospital. Privates Haig, Woods and Delamere. Private Malcolm is still ill at his home in Brantford, Ont.

# One Ton of Rogers' Anthracite Means 2,000 Pounds

## An Invitation to Inspect the Weighing of Rogers' Coal

Accept this as a personal invitation to visit ANY one of our yards and watch the weighing of Rogers' Anthracite.

The weighers will explain anything you do not understand, and you may satisfy yourself that one ton means 2,000 pounds.

We cannot emphasize too forcefully that EVERY load of Rogers' Anthracite is weighed and checked with scrupulous care—our instructions are for ABSOLUTE ACCURACY, and our inspectors see that these instructions are carried out without exception.

You will be interested in the big Government tested scales, in the records kept of the weight of every wagon, in the possibility of gauging to a fraction of a pound the weight of the coal in the wagon, AND IN THE ALLOWANCE MADE FOR BAGS.

Our sole desire in extending this invitation is to convince you beyond the possibility of a doubt that there is NEVER less than 2,000 pounds to a ton of Rogers' Anthracite.

This knowledge, we hope, will be of some value to you.
