SECTION IV.
THE FACINGS.

In going through the facings, the left heel never quits the ground ; the body must rather incline forward, and the heels be kept straight.

To the Right Face. 1st. Place the hollow of the right foot smartly against the left heel, keeping the shoulders square to the front.
2nd. Raise the toes, and turn to the right on both heels.

To the Left Face. 1st. Place the right heel against the hollow of the left foot, keeping the shoulders square to the front.
2nd. Raise the toes, and turn to the left on both heels.

To the Right about Face. 1st. Place the ball of the right toe against the left heel, keeping the shoulders square to the front.
2nd. Raise the toes, and turn to the right about on both heels.

3rd. Bring the right foot smartly back in a line with the left.

To the Left about Face. 1st. Place the right heel against the ball of the left toe, keeping the shoulders square to the front.
2nd. Raise the toes, and turn to the left about on both heels.

3rd. Bring up the right smartly in line with the left.

Right or Left Half Face. On the word of command *Right or Left Half Face*, each man will make an exact half face, as directed, by drawing back or advancing the right foot one inch, by which the whole will stand individually in echelon.

Front. When it is intended to resume the original front, the word of command *Front*, will be given, and the whole will face, as accurately as possible, to their former front.

Right or Left about three quarters Face. Where it is necessary to perform the diagonal march to the rear, the Recruit will receive the word *Right or Left about three quarters face*, upon which he brings the ball of the right foot (not the ball of the toe) to the left heel, or the right heel to the ball of the left foot, and makes a three quarters face in the given direction. Upon the word *Front*, if he has faced to the right, he fronts to the left ; and if he has faced to the left, he fronts to the right.

The feet in the first of the above motions are to be slipped back or brought forward without a jerk ; the movement being from the hip, so that the body is kept perfectly steady until faced.
