# THE DESTRUCTION OF WEEDS

Checker-Board System of Cultivation, and the Law That Like Produces Like.

Altho there is an abundance of material issuing from the agricultural presses of the province on the subjects' of weed destruction and seed selection, jet practical experience when talking among a number of hard-headed tarmers always has a good hearing. The story of weed killing is on old one, yet something new can be fearned each year. Ever since Adam was ordained to fight the cursed things, man has been trying to fight the battle against veeds with varying success. At the Richmond Hill meeting on Friday last Simpson Rennie, the old Scarboro warhorse of agriculture, preached the doc-trine of 'smothering.' He would take the thistles' life blood by a series of leaf-cutting operations. The plants breathe as we do and if we take away their lungs—that is, the leaves—we will kill the weed, root as well as branch.

This was how, to be particular, he proposed to get rid of the Canada Thistle, the perennial sow thistle, twitch grass and other pests of our Ontario

"I can remember the first patch of Canada thistles I ever saw," continued Canada thistles I ever saw, continued the lecturer. They were on my fatner's farm away back in the years gone by. But I believe to-day the perennial sow thistle is worse. I find that it is common all over Ontario with the possible exception of Essex and Kent, where there is possibly so much rag weed that it is impossible to take root. (Laughter.)

This corporation is the proprieter of the Magdalen Islands, in the Gulf of St. Lawrence, Dominion of Canada, including mineral and fishing rights belonging thereto together with steamers and boats engaged in the fishing business.

The Company is operating the various fisheries of the Islands with modern methods and the latest appliances, and are engaged in a general fishing, cold storage and transportation business.

Formerly the fishing was conducted principally by residents of the Islands, many of whom were the tenants of this Company. The Company are now employing a large number of these tenants, together with other fishermen, to operate the said fisheries on a large scale.

Or after paying-

Six per cent. interest on \$668,000 Common Shares...40,080,00

- \$52,910.00 Leaving a surplus of . - \$82,710.00 The securities of this Company will be quoted after February 20 on the Montreal Stock Exchange, and a complete prospectus can be obtained on application to the Company

With the present issue of securities the cempany pro-pose to make the following improvements, viz:

Instal machinery to handle economically the immens deposits of gypsum on the islands, and for which it is believed contracts can be obtained for about 50,000 tons, per annua

at an appreximate price of 90 cents per ton.

It is also proposed to manufacture sand-lime bricks, the materials for which the company has an enormous quantity. The plant to be erected will have a capacity of 20,000 bricks

The company will in addition establish steamship service between the Islands and Pictou, N.S., and they believe that

with first-class service this will be very profitable.

At Pictou, N.S., in addition to the ice-freezers to be erected, it is proposed to build a cold storage warehouse and de a general cold storage business, and with these improvements made, it is estimated that the increased earnings will amount to not less than \$50,000.00 per annum, or a total set

sternation here to-day, altho it is not announcement that Trenton has been entirely credited. The people of Dur- selected as the southern outlet of the ham intend to scrutinize the reports it was generally felt that Port Hope upon which the decision is said to be stood little chance of being chosen as based most closely with a view to re- the terminus. Tpenton is regarded as quiring further consideration of the the natural route, being nearer question if Port Hope's claims have not larger centres of manufacture, to say nothing, of the coal traffic for a very been given justice.

In this determination they rely upon a facturing is carried on extensively. Hastings, Campbellford. Frankford and other places which will be directly benefited by the Trenton route are naturally also determined.

Mass."
