SUBSTITUTION DANGEROUS WHEN IT IS PRACTICED BY UNSCRUPULOUS DRUGGISTS.

The practice of certain unscrupulous druggists of offering some ferior compound of their own in answer to calls for a well-known and liable preparation is most pernicious, and dangerous to the public.

As an instance of this fact we find that many of this class of disonest druggists have been putting up for customers the prescription for coughs and colds referred to in a recent issue, requiring whisky, glycerine and the Pure Virgin Oil of Pine; using in place of the latter redient the cheap bulk oil which is usually carried in stock, and which is without any specific medicinal virtue, and which will in most

The formula referred to, prescribed by an eminent specialist in pulmonary diseases, is a most effective remedy when properly compounded, and will break up a cold in twenty-four hours and cure any cough that is curable. Great care should be exercised, however, to use only pure ingredients, and for this reason it is better to purchase each separately, and mix them at home. Buy a half pint of good whisky, two ounces of glycerine and a half-ounce vial of the Virgin Oil of Pine (Pure). Mix in a bottle and take in teaspoon doses every four hours.

The Virgin Oil of Pine (Pure) is put up for dispensing only, in half-ounce vials, each securely sealed in a round wooden case, with an engraved wrapper with the name "Virgin Oil of Pine (Pure)" plainly

If you have tried this formula and have not secured the desired result, it is undoubtedly because your druggist has substituted a cheap or adulterated preparation of pine for the Virgin Oil of Pine (Pure). Insist upon having the Virgin Oil of Pine (Pure) in the original package and see that the engraved wrapper around the wooden case is not broken.

SOMETHING MORE THAN A PURGATIVE.—To purge is the only effect of many pfils now on the market. Parmelee's Vegetable Pilis are more than a purgative. Nothing of an injurious nature, used for merely purgative powers, enters into their composition.
