GREENLAND.

A PICTURE OF THE COUNTRY AND PEOPLE.

From a new work just published by Dr. Karl Andree, in Brunswick, Germany:—

Greenland appears to be a mass of large islands, sundered in all directions by a sea of sounds and channels. Composed of mountains, rocks, and solid ice masses, it is a picture of chaos and eternal winter. It is separated from the American continent by Davis' Straits and Baffin's Bay, and the Arctic Ocean breaks on its eastern shore. Its extent to the northward and westward is unknown. The interior of this great triangular realm is totally unexplored; the European settlements are scattered along the western coast, and contain from six to seven thousand inhabitants. The land is every where of a mountainous character; level spots are very rare, even on the coast, where peaks and precipitous cliffs rise directly from the sea, the mountain ranges terminating in abrupt promontories. On these bleak walls, covered only with ice and snow, there is no sign of vegetable growth; the merest moss or lichen is wanting. Here a living creature is rarely to be seen—not a seal or sea-gull—sometimes, perhaps, a solitary crow. The mountains do not generally exceed three thousand feet in height, but are crowned with eternalice. The Hjortetakken attain a height of near 5,000 feet, and the Kunnak, which is about 4,000 feet in elevation, bears immense masses of snow and ice on its declivities.

The interior of Greenland is a terrible chaos, so torn and shattered by deep fissures into which the sun never shines, and over which tremendous glaciers thrust their edges, that travelling is utterly impossible. All attempts to cross from the western to the eastern coast have been frustrated. The bold adventurers who attempted the feat, found only an alternation of deep chasms and high crags, rocks and ice—more desolate and forbidding waste than the islands and inlets along the sea. The glaciers of the interior shove themselves deep into the inlets and bays, and have completely filled many of them. In other places the ice forms lofty promontories, reaching far into the ocean. Where the glacier ice comes in contact with the salt water, it forms masses of every conceivable shape. As it gradually slides down the steep ledges and declivities, it is gnawed by the waves below, though not disengaged so fully, since new ice continually follows, building up another pile upon its summit. When these projecting masses can no longer bear their own weight, they separate from the original glacier and plunge in enormous fragments into the sea, forming those icebergs which stir so frequently in the Northern Atlantic. In some places grand, immovable piles are formed, which remain through the summer, or entire inlets and fiords of the sea are arched over with glittering domes of ice; like the great "Iceblink" between Jakobshavn Gdand 62 deg., which shines far off like an arch of auroral light.

The height of the icebergs often amounts to 1,000 feet. Many of them are formed high in Baffin's Bay, float to the south, and are carried in such quantities upon the coast of Greenland by the strong south-western currents, that they frequently crowd together so as to form a solid barrier between float coast and Iceland. Through the whole summer they lie on the southern coast around Cape Farewell, and sometimes on the western coast as far as 62 deg. and sometimes 60 deg.; in September and October they disappear, but in January they return again. In Disco Bay icebergs have been measured, which stood 300 fathoms deep in the water, and were therefore more than 2,000 feet in height. In the eastern coast, many measure from 120 to 150 feet above the surface of the water, and since only the seventh or eighth part is visible, the full height cannot be less than 1,000 feet. They are frequently a mile in circumference, and contain from 1,000 to 1,500 millions of cubic feet, weighing from 40 to 50 millions of tons. While they thus float, slowly dissolving into the ocean, they often assume the most wonderful forms; they resemble palaces, cathedrals, and old fortresses, with gateways, windows and towers, all built of spotless marble, and shining in the sun like silver. Sometimes they resemble blue ships, trees or beasts, or parting their sides with their cedar splinters, cover themselves with prismatic glories. Those who approach them are filled with a powerful feeling of terror, for the icebergs frequently crash in pieces and at sometimes in the Alps the light is taken from the neck of the leader male lest its sound should start the sleeping avalanche, so in the northern seas the Europeans suspends his oar and makes no sound as he passes those treacherous gardens of ice.

The coast rises immediately from the sea to a height of from two to three thousand feet, and the deep sea-air has an unfavourable effect upon it. The great submarine currents pass at some distance from the shores of Greenland, while on the other hand the Polar current reaches, which bring down the icebergs and ice-fields, wash them on both sides. During the brief summer this ice appears in great masses; in winter, it partially disappears. In Upper Disco, 72 deg. 48 min., the cold sometimes reaches to 36 deg., or even 48 deg. below zero. Then even the rocks burst asunder; the ice termed would, only it forms down the chimneys, hanging in an icicle over the fire, with but a small aperture in the centre for the passage of the smoke. It can be cooked, the outside is well done, while the centre is frozen to such a hardness that a sharp knife makes no impression on it. Brandy, and even alcohol congeals into a thick oily mass. A smoky vapor continually ascends from the sea, and caught by the wind, turns to millions of needles or points of ice. The climate of the eastern shore is much more severe than that of the western. Summer begins in June, and the heat soon increases to such an extent that sometimes the thermometer stands at 86 deg. in the shade. But from April to August fogs are very common, and the cold wind sweeping over the ice makes far chilling necessary. In August, the frosts appear at night, and snow falls occasionally, though it does not lie on the ground till the beginning of October. The Northern Lights—which were unknown in Europe before the year 1716 —are of frequent occurrence. The peculiar operation of the unequal refraction which is produced by the different density of temperature and density in the different strata of air, occasions wonderful optical delusions. The northern mirage or fluctuation of the horizon lifts landscapes above their actual place, while objects lying far below the reach of vision are brought into sight, frequently in a broken or reversed position. Towers, castles and cities are charmed into existence, as by the Fata Morgana of Sicily.

It is evident, from the disposition of Greenland, that its botany and zoology must be very limited; either differs but slightly from that of the neighboring island of Iceland. The habitations of men are scattered along the coast, and do not differ in appearance. The European settlements are only on the western side, generally upon small islands. Esquimaux are as far north as 78 deg.—so far, that is to say, as the extremity of Baffin's Bay. Sir John Ross found natives under the degree of 76, who had come from the north. The Greenlanders belong decidedly to the Esquimaux race. Their bodily habits, their speech, and their manner of life demonstrate that they are members of that "Family of Polar-men," which is found every where in the high north, from Lapland to Baffin's Bay, on the eastern coast of Greenland, by the sea-shore, and, it might be said, in the midst of the ice and snow, wherever the seal is to be found. The Greenland Esquimaux call themselves Innuit, signifying, men or human beings. They seem to have made their appearance on the western coast in the fourteenth century, and under the name of 'Skrälinger,' are mentioned in the annals of the Icelandic colonies in that region. They are supposed to have lived on the American continent at one time, as far south as Vinland, or New-England, and to have been gradually forced to the north by other wild races. Their own traditions indicate that they reached Greenland at a comparatively late period. They are of a stout build, below the medium height, have broad, flat faces, inexpressive eyes, small noses, thick amber lips, and coarse black hair, which hangs over their brown faces. Their skin is nevertheless rather fair than dark, but appears brown in consequence of its filthiness. According to their opinion, all other people are inferior to them, and when they wish to praise a stranger they say "He is as well instructed as we," or "He begins to be an Innuit." Crimes or acts of violence seldom occur: whoever injures another is publicly scoffed at and scorned, for the Greenlanders reserve their highest esteem and honor for the most expressive eyes. The Greenlander is lazy and indifferent to what takes place around him, but in general cheerful and well-disposed. He seldom involves himself in a quarrel, or even comes to hot words. He is changeable, troubled himself only about his nearest interests or his absolute necessities, and when he has a change, delights in sleeping night and day. The vanity of these people is very striking. According to their opinion, all other people are inferior to them, and when they wish...

DYSENTERY.

As this season of the year when bowel complaints prevail, the following recipes may be of use to some of our readers:—

VALUABLE RECIPE.—The great agricultural itinerant, Solon Robinson, gives to the world the following valuable information, the correctness of which seems to be corroborated by two respectable witnesses:—

"The worst cases of cholera morbus, dysentery and flux that I ever saw, I have repeatedly cured in a few minutes by a strong tea made of the bark of sweet gum—taken green from the tree is best; steep a handfull to a pint of water, until the liquor is like good coffee. Drink it clear or sweeten it with loaf sugar, or add a wine glass of good brandy if the shock is severe. If not infallible, it is remarkably in its effects, and well worth being known and tried in every family. Your friend,
A Georgia Planter.

We can add our own testimony to the value of sweet gum tea, having experienced amazing and speedy relief from its use in a violent case of dysentery, which refused to yield to the usual remedies: we have also seen in the last five years its wonderful benefit in many other cases; we have used the decoction made from bark both green and dried, and have discovered no material difference in the effect, both being efficacious.—*Franklin Farmer.*

I met with the foregoing valuable recipe several years since, and have only to add, what has already been said by the Franklin Farmer, that I have witnessed speedy relief in violent cases of dysentery, which refused to yield to usual remedies, by the use of the sweet gum: having it at command, I have used the fresh or green bark, and I can with much confidence recommend its use from my own experience.—*A Georgia Planter.*

IMPORTANT ARRIVALS

WANTED,

AN HONEST, INDUSTRIOUS BOY.

We lately saw an advertisement, headed as above. It conveys to every boy an impressive moral lesson.

'An honest, industrious boy' is always wanted. He will be sought for, his services will be in demand, he will be respected and loved; he will be spoken of in terms of high commendation; he will always have a house; he will grow up to be a man of known worth and established character.

He will be wanted. Townsmen will want him for a salesman or a clerk; the master mechanic will want him for an apprentice or journeyman; those with a job to let, will want him for a contractor, clients will want him for a lawyer; patients for a physician; religious congregations as a pastor; parents for a teacher of their children, and the people for an officer.

He will be wanted. Tradesmen will want him as a citizen, acquaintances as a neighbor; neighbors as a friend; families as a visitor; the world as an acquaintance; nay, girls want him as a beau, and finally as a husband.

An honest, industrious boy! Just think of it, boys, will you answer this description? it, boys, will you answer this situation?—Are you sure that you will be wanted?—You may be smart and active, but that does not fill the requisitions—are you honest? You may be capable—are you industrious? You may be well-dressed, and create a favorable impression at the first sight—are you both honest and industrious?—You may apply for a good situation—are you sure that your friends, teachers, acquaintances can recommend you for these qualities. No readiness or aptness for business will do it. You must be honest and industrious—must work and labor; then will your application for places of profit and trust be almost certain to succeed.

Agricultural Premiums.

THE Directors of the Saint John County Agricultural Society offer the following Premiums, to be competed for by Members of the Society in the Season of 1851:
For the Farmer who shall have the best cultivated Field of Turnips, Carrots, Mangel Wurtzel, Parsnip, or Potatoes, not less than half an acre—the best of each, a premium of £3, and for the second best, a premium of £2.
For the Farmer who shall have the best Field of Beans, Peas, Cabbage, or Indian Corn, not less than a quarter or an acre each, a Premium of £3, and for the second best, a premium of £2.
For the Farmer who shall have the best field of Green Crop, Cabbage, or Indian Corn, not less than a quarter of an acre, a Premium of £3.
Competitors will be required to furnish a written statement of their mode of cultivating the various crops, and a statement in writing will also be furnished to each candidate of the manner of raising the manures.
The Judges will be at liberty to withhold Premiums in cases where they do not think them merited.
The names of persons wishing to compete for any of the above Premiums, must be handed to the Secretary, on or before the first day of August next.
                                          M. H. JARDINE, President.

Astonishing Efficacy
OF
HOLLOWAY'S PILLS
And OINTMENT.

EXTRAORDINARY CURES BY Holloway's Ointment.

CURE OF A DESPERATE CASE OF ERYSIPELAS.
Copy of a Letter from Mr. Joseph Gildon, jun., a Farmer, East Kent, near Spilsby, Lincolnshire, 8th April, 1851.

TO PROFESSOR HOLLOWAY.
SIR,—I have the gratification to announce to you a most wonderful cure wrought upon myself, by the use of your Ointment and Pills. I had a severe attack of Erysipelas in my right foot, which extended along my ankle, and was attended with swelling and inflammation to an alarming degree, insomuch that I was unable to move without the use of crutches. I consulted a very eminent Physician, besides other Medical men, but to no purpose. At last I tried your Ointment and Pills, when, strange to say, in less than three weeks the swelling and inflammation subsided to such a degree that I was enabled to pursue my daily avocation, to the utter surprise and amazement of those who were acquainted with my case, seeing that I was cured so quickly. I and my family are well known here, as my father holds his farm under the Rev. J. Spence, Rector of our Parish.
                                          (Signed)
Edited and Proprietor of the Roscommon Journal.

Bad Digestion, with extreme Weakness and Debility—an extraordinary Case.
Mr. T. GARDINER, of No. 9, Brown street, Grosvenor square, had been in a very bad state of health for a long time, suffering much from a disordered Stomach, very impaired Digestion, with constant pains in his Chest, was extremely nervous, and so greatly debilitated as to be scarcely able to walk one hundred yards; during the long period of his declining he had the advice of four of the most eminent Physicians besides five Surgeons of the greatest celebrity in London, from whose aid he derived no benefit whatever. At last he had recourse to Holloway's Pills, which he declares effected a perfect cure in a very short time, and that he is now as strong and vigorous as ever he was in his life. This being so extraordinary a case, may lead many persons afflicted to doubt the statement, it may therefore be necessary to say that Mr. Gardiner is a broker, and well known.

Cure of a Desperate Scorbutic Eruption of long standing.
Extract of a Letter, dated Wolverhampton the 10th of February, 1851, confirmed by Mr. Simpson, Stationer.

To Professor Holloway.
SIR,—Having been wonderfully restored from a state of great suffering, illness and debility, by the use of your Pills and Ointment, I think it right for the sake of others to make known my case. For the last two years I was afflicted with a violent Scorbutic Eruption, which completely covered my chest, and other parts of my body, causing such violent pain, that I was in truth nay, that for months I was not able to get sleep for more than a very short time together. I applied here to all the principal medical men, as also to those in Birmingham, without getting the least relief; at last I was recommended by Mr. Thomas Simpson, Stationer, Market-place, to try your Pills and Ointment, which I did, and I am happy to say, that I most consider myself as thoroughly cured. I can now sleep all the night through, and the cure is my back and limbs have entirely left me.
                                          (Signed)
                                          RICHARD HAVELL.

To all Diseases of the Skin, Bad Legs, Old Wounds and Ulcers, Bad Breasts, Sore Nipples, Stony and Ulcerated Cancers, Tumours, Swellings, Gout, Rheumatism, and Lumbago, likewise in cases of Piles; Holloway's Pills, in all the above cases are effectual. In all cases of Bad Legs, or bad Breasts, the Ointment and Pills should be used in the cure of the Ointment, &c. &c.

WORTH KNOWING,
To those whose Wardrobe wants replenishing.
A. GILMOUR,
Tailor and Draper,

It is unequalled. Also a certain remedy for Incipient Consumption, Indigestion, loss of Muscular Energy, Physical Lassitude, Female Weakness, Debility, &c. It is warranted to please the user in any of the above complaints, and is of priceless value to those without offspring.
Sold by J. G. Sharp, Market Square ; and Fellows & Co, King Street, St. John ; J. Cook, Carleton ; and MORTON & Co, Halifax, N. S.

HAYS LINIMENT FOR THE PILES.
The worst attack of the Piles effectually and permanently cured in a short time by the use of the genuine Hay's Liniment. Hundreds of our first citizens throughout the country have used Hay's Liniment with complete success. It is warranted to cure the most aggravated case.
CAUTION—Never buy it unless you find the name of Comstock & Co. upon the wrapper, proprietors of the genuine article, or you are cheated with a counterfeit article.

EXPECTORANT PINK SYRUP.
HAVE YOU A COUGH ? Do not neglect it!—Thousands have met a premature death for the want of attention to a common cold. Rev. Dr. Bartholomew's Expectorant Pink Syrup will most positively give relief and save you from that most awful disease, Pulmonary Consumption, which usually sweeps into the grave thousands of the young, the old, the lovely and the gay.

FOR THE HAIR.
If you wish a rich, luxuriant head of Hair, free from dandruff and scurf, do not fail to procure the genuine Balm of Columbia. In cases of baldness, it will more than exceed your expectations. Many who have lost their hair for twenty years, have had it restored to its original perfection by the use of this balm. Age, state, or condition, appears to be no obstacle whatever ; it also causes the fluid to flow with which the delicate hair tubes are filled, by which means thousands (whose hair was gray as the Asiatic eagle) have had their hair restored to its natural colour by the use of this invaluable remedy. In all cases of fever it will be found the most pleasant wash that can be used. As a perfumery only no article is more effectual.

DR. SPOHN'S
SICK HEAD-ACHE REMEDY.
Why will you suffer with that distressing complaint, when a remedy is at hand that will not fail to cure you? This remedy will effectually destroy any attack of Head-ache, either nervous or bilious. It has cured cases of twenty years standing.
