

account of the extra trouble taken, and the small fees asked for the great advantages placed at the disposal of the students, that the majority will be induced to take the Summer Session during three years.

The Students of the Toronto School of Medicine have always taken a high standing at the various Examinations they have been called on to undergo; and at the Examinations, in 1883, of the Toronto University, where they met in friendly competition the students from all affiliated Institutions, they succeeded in obtaining five scholarships out of six, all the medals, and one hundred and twenty honours out of a total of one hundred and fifty-six which appeared on the class lists.
