RUSSIA PLANS ELECTRIFICATION

Scheme for Plants to Develop
27,000,000 Horse Power—
Lenine Sees in It Future of
Soviet Russia.

Viborg, Finland, April 12.—(A.P. by mail).—Communism, plus electrification, is now the slogan of the Russian Soviet regime. Reports of this vast scheme for electrification of Russia, but only recent Moscow and Petrograd newspapers show the vast extent of the proposed electrification of Russia.

G. S. Zinovief, Soviet Governor of Petrograd, in a speech at that city, announced that the scheme contemplated the construction of huge electric power plants, with a total capacity of 18,170,000 horse-power in the former, and 8,000,000 horse-power in Siberia. On this work, he said, are to be employed, as far as possible, the soldiers who are demobilized.

How seriously Lenine advocates electrification is shown in one of his recent speeches, wherein he said: "More must be done regarding electrification. The whole future of Soviet Russia depends on the consummation of the plan. All elements of the population must assist in this state enterprise. The building of electric stations all over the country will take ten years. Concessions must furnish the working capital. Then, commencing Russia will be an example to all the governments of Europe and Asia."

At present Russia has comparatively few electric plants. To further the immediate development of the electrification plan, electrical workers and engineers have, for several months, been exempted from the restrictions placed upon other workmen and have been given preferred status.

The immensity of the Russian electrification project is indicated by the fact that at the largest power plant in the United States, at Niagara Falls, the peak load, of total capacity, developed is about 400,000 horse-power.

PASTOR PREACHES BY WIRELESS

Quincy, Mass., May 4.—Rev. Dr. Isaiah W. Sneath, pastor of the Wollaston Congregational church, sent out another sermonette by wireless at the conclusion of the morning service on Sunday. The topic was "The Young People's Day Communion." In sending out his sermonette by wireless, Rev. Dr. Sneath pointed out that he was not speaking by mail or otherwise, so that he could know how far his message was sent. If there was any interest in his message, his wireless operators would secure a more powerful sending apparatus. The message which Rev. Dr. Sneath sent out was as follows:

"This Sunday, May 4, is an interesting one. The word 'May-morn' means life and vigor such as should be in all our lives. To that end we must have pure hearts. The May-day of May 1 is said to be the day when the world was created. 'First of May take all my freedom away.' It suggests the purity in character which makes us not only beautiful, but also strong. Sir Galahad said, 'My strength is as the strength of ten because my heart is pure.' Paul said to Timothy, 'Keep thyself pure.'"

"The rustic, years ago, crowned a beautiful girl Queen of May. The purest and strongest man of history is Jesus. Let us crown Him the King of May."

"The rustic, years ago, crowned a beautiful girl Queen of May. The purest and strongest man of history is Jesus. Let us crown Him the King of May."

Gives Gratifying Results

Winnipeg, Ont.
"I had an attack of Weeping Eczema so bad that my clothes would be wet through at times. For four months, I suffered terribly. I could get no relief until I tried 'Fruit-a-Save' and 'Fruit-a-Save'."

Both these favorite remedies are sold by dealers at 50c a box, 4 for \$2.00, or sent on receipt of price by Free-Press Limited, Ottawa.

"Fruit-a-Save" is also put up in a trial size which sells for 25c.

our lives, and we shall become strong, beautiful and useful. Remember, friends, next Sunday is Mothers' Day. Wear a flower in memory of mother if she is gone or in honor of mother if she is still with you."

FIGS, OLIVES AND
TEA GROWN ON
VANCOUVER IS.

Victoria, B. C., May 4.—(By Canadian Press).—Any visitor may sit in the shade of his own vine and fig tree. "There is no difficulty whatever in growing fig trees here," said Professor L. Stevenson, superintendent of the Dominion experimental station at Basin Bay, Sidney, whose attention was called by a Canadian reporter to a statement in Ottawa of Hon. Dr. F. S. Tjornehoj, minister of agriculture, that figs, tea and olives were growing on Vancouver Island.

Tea and olives grow on the island, Prof. Stevenson said, but only as an interesting experiment. He predicted no canneries for the disposition of home-grown olives and no tea parties with Vancouver Island product used, but he said he intended to send Dr. Tjornehoj a box of figs from the experimental station.

Fig trees, it was agreed by the reporter's informants, grow with comparative ease and produce fruit. They have been reported as far north on the island of Hon. Dr. F. S. Tjornehoj, minister of agriculture, that figs, tea and olives were growing on Vancouver Island.

MADE NEW MAN OUT OF BENOTT

Montreal Citizen Says His
Troubles Have All Been
Overcome by Taking Tan-
lac.

"For about two years before I got Tanlac I don't think I ate a meal without suffering; but now I'm eating three good meals every day without the least trouble, and actually feel like a man made new," was the statement made by Emile Benott, 589 St. Hubert St., Montreal, N.B., recently.

"I think I had about every kind of pain and distress had digestion can cause a person. I was suffering was about all I could stand. After every meal I felt so bloated and all stuffed up I could hardly get my breath and I had indigestion to boot at times I couldn't retain anything on my stomach, not even a glass of water, and often it seemed that my troubles would be the end of me."

"My poor state of health worried me a great deal, but the wonderful results I got from Tanlac has changed things right around for me. My digestion is now perfect, and I feel so well I believe I could run a foot race without getting out of breath. In fact, I'm in the pink of condition, and Tanlac gets all the credit for my good health."

PREMIER OLIVER.

Of British Columbia, who left Victoria on Saturday for Ottawa to try to persuade the federal government to take over the Pacific Great Eastern railway and incorporate it into the Canadian National railways.

He will also urge the federal government to pass legislation to supplement the British Columbia Liquor Control act, and give that province complete control of imports.

HOME DELUGED.

(Boston Globe).
In the wettest hours of yesterday Miss Marie Schwollman, of 1194 Grosvenor, Jamaica Plain, was awakened by a dull crash and as she slipped rubbed her eyes she for the moment believed a ball of bit of Venice and her bed a gondola afloat on a picturesque lake.

The fact is the heavy rain of Saturday night settled on the roof of the dwelling and the conductor, unable to carry it off, surplus water followed the venting pipes down to the kitchen and on to all three floors.

The water streamed from one room into another until the occupants really needed rubber boots to navigate safely. Water had gotten in between the floors and the ceilings and it was a piece of the ceiling that came down when Miss Schwollman was aroused.

Her father, William Schwollman, was also awakened, drenched rubbers and started an investigation, while his daughter called up the police station for a plumber.

Lieut. O'Neil canvassed the new position in search of a plumber and found none. But he found Patrolman Eagles had a pair of long leg rubbers and he lent him over to see what the trouble was.

The children had a nice time a few hours palling the boots on the kitchen floor until father broke up the party by sweeping the little river down the stairs and into the street.

CORNS
Lift Off with Fingers

NEARLY CRAZY
WITH ECZEMA

No rest day or night for those who are afflicted with that terrible skin disease, eczema, as it is often called, salt rheum.

With its unbearable burning, itching and torturing relief is gladly welcomed. There is no remedy like Burdock Blood Bitters for giving relief to such sufferers.

Apply it externally and it takes out the stinging, itching and burning, and promotes a healthy healing.

Take it internally and it gets at the source of the disease in the blood—for eczema is a blood disease—and drives it out of the system.

Miss L. M. Boutwell, 29 Victoria Road, Halifax, N.S., writes: "I have suffered for years from eczema. I could not rest day or night. I suffered great agony, and was nearly crazy with the itching and burning. I used all kinds of salves, but nothing seemed to help me. I was advised to try a bottle. I found great relief, and I really cannot recall it highly enough for what it has done for me."

Burdock Blood Bitters has been on the market for over forty years, and during that time has been manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Ladies Let Cuticura
Keep Your Skin

OLD AT 40?

IRON STARVATION
of the blood perhaps and your worn out,
exhausted nerves need to be revitalized

For this purpose there is nothing better than Organic Iron; not metallic iron which people usually take, but pure Organic Iron—Nuxated Iron—which is like the iron in your blood and like the iron in spinach, lentils and apples. One dose of Nuxated Iron is estimated to be approximately equivalent (in organic iron content) to eating one-half quart of spinach, one quart of green vegetables or half a dozen apples. It is like taking extra dose of beef instead of eating pounds of meat.

Over four million people annually are using Nuxated Iron. It will not induce the teeth nor disturb the stomach. A few doses will often commence to enrich your blood. Your doctor will be refunded by the manufacturers if you do not obtain satisfactory results. At all druggists.

For Red Blood, Strength and Endurance

WHIPPING POST
SEEN AS ONLY
CRIME CURE

Justice Fawcett Says That
Prison Life is Made Too
Happy to Be a Deterrent.

(New York Times).
Hold-up men and safe robbers were active in the city yesterday. The police arrested three men in hold-ups in Harlem and in Brooklyn, but they knew nothing about the robbing of a safe in an office within a block of police headquarters until their attention was called to the crime.

Justice Lewis L. Fawcett of the supreme court, Brooklyn, in passing sentence on a man convicted of a hold-up, advocated the use of the whipping post and shorter sentences. He declared that long prison terms did not serve as a deterrent to the increase of crime because sentimentalists have made prison life too pleasant. He sentenced \$10,000, one of a band of automobile robbers charged with many crimes in Brooklyn, to from ten to twenty years in Sing Sing.

A group of 200 yesterday afternoon witnessed the spectacular capture by detectives of a man who was alleged to be escaping in a taxi cab at Broadway and 129th street following the theft of \$40 in a hold-up from Joseph Puccia in his cafe at 222 West 129th street.

John Cummins, forty years old, of 231 West 129th street, was locked up in the West 129th street station after a robbery and carrying a pistol after Police Officer Donnelly and Detective Mulligan had fired several shots at Cummins from the running board of a commandeer taxicab.

The inner compartment of a large safe in the office of Bayuk Brothers, cigar manufacturers, on the second floor of 119 Lafayette street, resisted the efforts of robbers early yesterday morning, and the firm lost about \$225 in money and \$18 worth of cigars instead of approximately \$10,000 worth of Liberty bonds and negotiable securities which were in the strongbox.

When Fred C. Brown, local representative of the firm, reached the office about nine o'clock he found the burglar-proof steel door leading to the place from which the safe had been pried from its hinges. The outer door of the large safe in his office had been blown open and been ripped open and the contents taken. The door of the inner safe was forced open, and the door was wrenched off a smaller safe. The robbers entered the safe and carried off the contents.

Magistrate Kochenderfer, in Jamaica held Joseph Schaefer of 1,450 Bushwick avenue, Brooklyn, in \$10,000 bail on a charge of robbing the homes of thirty residents in Queens. In his apartment, the detectives told the magistrate, they found seven suitcases stuffed with jewelry, silverware and clothing valued at more than \$10,000.

UNIONIST HAS

RAILWAY TIES FOR EGYPT.

To guarantee British Columbia mills commencing to cut an initial order of seven millions, seven hundred thousand feet of ties for Egypt, letters of credit arrived recently from the Egyptian government and were filed with Montreal banks.

DIG UP ELEPHANT'S SKELETON IN TEXAS

Was Gigantic Beast and May
Have Lived 1,000,000 Years
Ago, Says Biologist.

San Leon, Tex., May 4.—Positive proof that elephants of gigantic size, with bodies probably covered with long hair, once roamed the coastal plains of Texas has been obtained by the unearthing here of the skeleton of one of these prehistoric animals. The period of its life dates back anywhere from 500,000 to 1,000,000 years, according to H.C. Chandler, assistant professor of biology in Rice Institute of Houston, who assisted in removing the remains from the hard bed of sand and gravel.

It will take some time to reconstruct the bones and form the skeleton as it originally existed and will until this time measurements cannot be accurately taken. The fact, however, that the skull is each more than 18 feet long indicates the great size of the pachyderm.

Scientist's Speculation.
The skeleton was discovered by E. T. Roy of Houston, who called Mr. Chandler to his assistance in unearthing it. In speaking of the discovery Mr. Chandler said:

"Before Noah collected his animals in the ark and before Adam and Eve ate the disastrous apple of the Garden of Eden this beast, perhaps attacked by a murderous sabre tooth tiger, a historic animal will be brought to view thus furnishing material for another page in the account of that long distant period when centuries and not years were used as the unit in the measurement of time."

THIRTY-TWO FACTORIES
MAKE RUBBER PRODUC.

Rubber factories in Canada have more than doubled since 1916, and represent an investment of approximately \$45,000,000, according to information compiled recently.

There are thirty-two plants in operation in the Dominion, twenty-two of which are manufacturing rubber goods and ten producing footwear.

The total annual output amounts to nearly \$35,000,000. This industry gives employment to 18,000 workmen, and has an aggregate payroll of \$11,000,000.

A Hunting Ground.

"There are many who, while admitting the evidence of their eyes that an elephant did live and die on the shores of Texas, will question statements of scientists as to the great expanse of time since the animal existed."

"No very accurate estimate can be made. It is true, but it exceeds 100,000 years and may approach 1,000,000 years. There is no doubt in the mind of any person who has made a study of the past life of the earth. Such estimates are based on the time required to deposit sedimentary rock, to erode the land surface and to wear away rocks. No one could judge the age of this particular specimen alone but its age is estimated on the known occurrence of the animal in company with other animals in the rocks or deposits where the age can be roughly estimated and its presence in deposits which are of more recent date."

"Had there been game hunters in the

pleistocene period North America, rather than Africa, must have been their favorite hunting grounds. Scientists state that during that period over the same plains which these elephants roamed numerous other long extinct animals whose descendants now live in such distant places as India or Central Africa were living in abundance.

"As the storms and waves gradually eat away the gravelly bank of the bay at San Leon the remains of the ancient extinct horses and perhaps other prehistoric animals will be brought to view thus furnishing material for another page in the account of that long distant period when centuries and not years were used as the unit in the measurement of time."
