

Why should any other cereal be called "just as good" as

Kellogg's CORN FLAKES

Because Kellogg's is known to be the best and most nutritious cereal on the market—

Because the sale of Kellogg's Corn Flakes is enormous as trade returns will show—

Because another large modern factory, the best and most sanitary in Canada had to be built to take care of our constantly increasing trade—

Because the imitator, knowing these facts and having few selling arguments for his own product thinks to create a market for it by comparing it to Kellogg's;

But--the flavor and the sustaining qualities of Kellogg's Corn Flakes cannot be counterfeited. Sold in big packages at 10c. Look for the signature.

The Seventh Heaven of Delight For Women Comes Now

By J. R. HAMILTON
Former Advertising Manager, Wanamaker's, Philadelphia

BARGAINS, Bargains everywhere! Bargains from the stores to you. Bargains from the factories to the stores to you.

The great outclearing of merchandise in every line is now at its height.

Remember factories must clear their stocks as well as stores. They must get ready for their new season. Their machinery must get busy, their warehouses must grow empty, to make ready for the new stocks.

Every factory is now offering its products to your stores at the most absurd fraction of the regular cost.

And your stores acting as your agent are buying these products and giving them to you far below the regular price you have always paid.

This is not true of any one line; it is true of all lines.

Literally tons of crockery, dishes and glassware are being unloaded now into the stores of Canada. The factories are taking any price they can get.

This is true of furniture, it is true of rugs and draperies and wall paper. It is equally true of saucepans and pianos.

And in the line of wearables, you find the same effort on the part of the manufacturers to clear their merchandise through our local stores.

Dresses, coats, waists, muslinwear, hosiery, shoes—everything that is made in quantities—everything upon which stock is carried, is being closed out now by factories and stores at wonderful bargain prices.

You will find these bargains advertised in this paper today, scores of them, and they will keep on being advertised here until this merchandise is gone.

At a time like this it is almost criminally careless not to go to the stores and buy.

Turn to your advertising now. See the remarkable bargains that are being offered and make up your mind that whatever else you do you will get your share.

Special Week-End Bargains For The Thrifty Buyer At The Ideal Ladies' Clothiers

40 DOCK STREET

Our fall goods are arriving almost daily and as we must make room for them, we are placing on sale our entire stock of summer goods at prices which will permit of their quick sale.

DUTY ON CEMENT IS A SHIELD FOR MUCH INJUSTICE

Should Be Removed to Give Maritime Provinces a Square Deal

OCTOPUS IS ARBITRARY

It Gives Cement Users in This Part of Canada Cause to Think About That \$15,000,000 of Water in the Stock—The Remedy.

(Daily Telegraph).

Remembering that the \$30,000,000 Canada Cement Corporation includes from \$13,000,000 to \$15,000,000 of watered stock, why should St. John, and other maritime province towns and cities continue to pay excessive prices for cement and submit to delay and annoyance in getting it while the cement company enjoys a protective duty and boasts of the fact that it only ships cement down this way in order to keep its brand before the public?

There is a general feeling that St. John should have a cement industry, and that cement should be made duty free until the maritime provinces have been delivered from their present situation by the establishing of a local cement plant, or until the cement octopus has come to its senses.

The whole subject is of timely interest because of the recent appearance at city hall of an agent of the cement merger and the discussion of a proposal to issue provincial bonds for \$1,000,000 for the purpose of constructing cement roads.

It is reasonable to suppose that no bond issue contemplating the use of cement will be seriously considered until the maritime provinces have received some measure of fair play. The government allows cement to go duty free into the Canadian West last fall because of the difficulties experienced by people in that section of the country in securing cement at reasonable prices. There is a similar situation now in the maritime provinces. The company which Sir Sandford Fleming says includes \$15,000,000 of water in its capitalization has said that the cement trade in the maritime provinces is not particularly attractive to them, and manufacturers and contractors in this part of Canada are treated as though the company were doing them a favor in selling cement down here.

The freight rate is high, and the duty makes the company to fix its prices just at a point calculated to keep out English cement which the maritime provinces can get by water. The cement for Campbellton by the carload will cost the same as if delivered in St. John, and if a car is required by a cornmeal man and I will not give him away. I am going to States in a day or two.

BOB SMITH.

P. S.—I never set any other fires.

The foregoing letter, presented to the police court by Mr. Baxter, yesterday afternoon when the investigation into the recent fires in the old grist mill was continued, caused some surprise. He said that he thought the letter might be a practical joke, but there was a possibility that it was true in part. Previous to submitting the letter, Mr. Baxter suddenly rose, interrupting the court, and to the surprise of all asked John Maynes to write the following words on a piece of paper, "Mayes & Riley mill job, who set the fire?" which Mr. Maynes did. What he wrote was submitted to the magistrate together with the letter.

Four witnesses were examined at the hearing, Detective Killen, Sergt. Kilpatrick, Alexander Steen and Walter But-

The government allows cement to go duty free into the Canadian West last fall because of the difficulties experienced by people in that section of the country in securing cement at reasonable prices. There is a similar situation now in the maritime provinces. The company which Sir Sandford Fleming says includes \$15,000,000 of water in its capitalization has said that the cement trade in the maritime provinces is not particularly attractive to them, and manufacturers and contractors in this part of Canada are treated as though the company were doing them a favor in selling cement down here.

The freight rate is high, and the duty makes the company to fix its prices just at a point calculated to keep out English cement which the maritime provinces can get by water. The cement for Campbellton by the carload will cost the same as if delivered in St. John, and if a car is required by a cornmeal man and I will not give him away. I am going to States in a day or two.

BOB SMITH.

P. S.—I never set any other fires.

The foregoing letter, presented to the police court by Mr. Baxter, yesterday afternoon when the investigation into the recent fires in the old grist mill was continued, caused some surprise. He said that he thought the letter might be a practical joke, but there was a possibility that it was true in part. Previous to submitting the letter, Mr. Baxter suddenly rose, interrupting the court, and to the surprise of all asked John Maynes to write the following words on a piece of paper, "Mayes & Riley mill job, who set the fire?" which Mr. Maynes did. What he wrote was submitted to the magistrate together with the letter.

Four witnesses were examined at the hearing, Detective Killen, Sergt. Kilpatrick, Alexander Steen and Walter But-

DUTY ON CEMENT IS A SHIELD FOR MUCH INJUSTICE

Should Be Removed to Give Maritime Provinces a Square Deal

OCTOPUS IS ARBITRARY

It Gives Cement Users in This Part of Canada Cause to Think About That \$15,000,000 of Water in the Stock—The Remedy.

(Daily Telegraph).

Remembering that the \$30,000,000 Canada Cement Corporation includes from \$13,000,000 to \$15,000,000 of watered stock, why should St. John, and other maritime province towns and cities continue to pay excessive prices for cement and submit to delay and annoyance in getting it while the cement company enjoys a protective duty and boasts of the fact that it only ships cement down this way in order to keep its brand before the public?

There is a general feeling that St. John should have a cement industry, and that cement should be made duty free until the maritime provinces have been delivered from their present situation by the establishing of a local cement plant, or until the cement octopus has come to its senses.

The whole subject is of timely interest because of the recent appearance at city hall of an agent of the cement merger and the discussion of a proposal to issue provincial bonds for \$1,000,000 for the purpose of constructing cement roads.

It is reasonable to suppose that no bond issue contemplating the use of cement will be seriously considered until the maritime provinces have received some measure of fair play. The government allows cement to go duty free into the Canadian West last fall because of the difficulties experienced by people in that section of the country in securing cement at reasonable prices. There is a similar situation now in the maritime provinces.
