**RULES**

Find the word which best suits the clue. The word begins with the letter above the clue you are dealing with. The number after each clue gives the number of letters in the word. When you get the word, try to find it in the box of letters. Circle the letters in the word. After all words have been found, the quiz word will remain.

- Quiz word clue:**  
Nova Scotian owned (11)
- Answer to last week's puzzle:**  
Bare Bear

by H.M.K.  
Here's how to work it:

OXRUT OILZY  
is  
HENRY HICKS

One letter simply stands for another. In this sample O is used for the two H's, X for the E, Z for the K, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each week the code letters are different.

Our readers are invited to submit quotes, especially dumb ones.

**This Week:**

QIXXPRW PR "XACT" PB MGT ARXL BASPIXL  
ISSTUMTJ RTOYABPB. —IRARLKAOB

**Answer to last week:**

Capitalism is being buried but it is taking a long time to get the bastards under the earth.  
—Cy Gonick

## Imagine a power failure here.

The human body operates on electricity, so a power failure can happen to almost anyone. The technical term for it is Multiple Sclerosis. Multiple Sclerosis attacks your spinal cord. It breaks down the myelin insulation of your central nervous system. As a result, electrical impulses travelling between your brain and your body become scrambled and short-circuited. Everything you take for granted can be affected. Walking. Talking. Sight. Feeling. Everything.

It depends on how much damage has been done. Multiple Sclerosis doesn't kill, though. Any more than an ordinary power failure in your home can kill. But it can put a lot of things out of commission. Like any type of electrical failure, we have to pinpoint the cause, before we can prevent it from happening again. Research is getting closer to the answers every day. In the meantime we could use your help.

## Multiple Sclerosis attacks your spinal cord.

### Fight back.
