

THE WARFARE OF SCIENCE WITH THEOLOGY

the greatest value to his book. We have whole libraries of controversial works dealing with the relations between science and theology, but they have been written either by scientists or theologians. President White occupies the impartial position of the historic scholar, who has no prejudices against the truth of science and no hostility toward the truth of religion."—New York Review of Reviews.

"This is and will continue to be one of the great books of the world, like Thucydides' 'History of the Peloponnesian War.' So long as Science and Theology retain their places in human interest, this history of the conflict of ages between them will exert its attraction and read its lesson. It is a great book."—The Outlook.

"Few books published in this impatient age can be so truly said to represent the study and reflection of a lifetime. It bears on every page the stamp of maturity. The plan has been thought out to the utmost borders of the subject, and the discussion carried into every field of inquiry which promised to yield anything."—The Independent.

"Undoubtedly the most exhaustive treatise which has been written on this subject. . . . Able, scholarly, critical, impartial in tone and exhaustive in treatment."—Boston Advertiser.

"The same liberal spirit that marked his public life is seen in the pages of his book, giving it a zest and interest that cannot fail to secure for it hearty commendation and honest praise."—Philadelphia Public Ledger.
