

	PAGE.
Design of older elevated railroads, reasons for faults.....	728, 729
Design of structures, judgment in.....	675
Designing, courses in.....	93, 164
Designing, higher instruction in.....	943
Designing in schools.....	173
Designs, principles of, not valued in older elevated railroads.....	646
Details, design of.....	356
Details, failure through insufficiency of.....	446
Details of construction.....	444
Details of engineering work, the importance of.....	852
Deterioration of elevated railroads.....	650
Diary, purpose of.....	515, 787, 829
Ditaction, teaching of.....	163, 945
Dips of cuttings.....	21
Director of engineering school, qualifications of.....	124
Discipline of workmen.....	50
Discussion of elevated railroads.....	589
Ditching, measuring work of.....	55
Ditchstakes, setting of.....	42
Diversion of streams.....	16
Diversions, size of.....	20, 21
Diversions, when employed.....	20
Double track elevated railroad structure, description of.....	619, 622, 623, 624, 625, 628, 629, 674
Drafting, by students.....	160
Drafting, courses in.....	133
Drafting, importance of.....	520, 825, 850
Drafting, teaching of.....	112, 125, 173, 864, 938
Drainage, expense of bad.....	23
Drainage, neglected to save expense.....	23
Drainage of lakes.....	20
Drainage of Mud River.....	19
Drainage of railroads, importance of.....	16
Drainage of railroads, literature on.....	15
Drains, pole.....	22
Drains, quicksand in.....	18, 19
Drains, rising of bottom of.....	18, 19
Drains, shape and size of.....	17
Drains, stone.....	22
Drains, tile.....	24
Drains, value of large ones.....	18
Drawings, interpretation of.....	888
Drawings, specifications on.....	911
Drawings, the constituents of complete.....	939
Drawings, their relations to contract and specifications.....	881
Drifting test for steel.....	688, 689, 691
Duties of members of surveying parties.....	31, 32
E	
Early life of the young engineer.....	835
Earthquakes, resistance of by buildings.....	803

	PAGE.
Earthwork, shrinkage of.....	44
Eccentric connections.....	386
Eccentric loading, stresses caused by.....	442
Economical span lengths for elevated railroad.....	598
Economics, relations to civil engineering.....	967
Economics, the study of.....	938, 945
Economy in design.....	102, 603
Economy of elevated railroad design.....	618, 620, 621, 622, 623, 625, 626, 629, 673
Education, demand for improvements in.....	942
Education, higher demanded.....	176
Education, necessity for technical.....	794
Education of J. A. L. Waddell.....	1, 2
Education, preparatory.....	103
Education, relations to civil engineering.....	967
Education, value of technical.....	505, 818
Efficiency of recent graduates.....	936
Elastic limit, explanations of.....	500
Elective courses, value of.....	120
Electrical engineering, definition of.....	958
Electrical engineering, instruction in.....	947
Elevated railroad, evolution of designs for.....	647
Elevated railroad for St. Louis.....	5
Elevated railroad stations.....	611, 612, 613
Elevated railroad stations, heating.....	614
Elevated railroad structure, designs for four track.....	616
Elevated railroad structures, bracing of.....	656
Elevated railroad, success of railroad.....	655
Elevated railroads.....	587
Elevated railroads, aesthetic studies for.....	645
Elevated railroads, an obstruction to the streets.....	672
Elevated railroads, bracing between longitudinal girders.....	632
Elevated railroads, character of designs for.....	668
Elevated railroads, character of structure.....	595, 703
Elevated railroads, continuity of.....	642
Elevated railroads, cost of.....	664, 703
Elevated railroads, cost of maintenance of.....	773
Elevated railroads, costs of various designs.....	630
Elevated railroads, design of compared with that of bridges.....	771
Elevated railroads, design of older structures.....	595, 687
Elevated railroads, designing.....	589, 592
Elevated railroads, deterioration of.....	663, 772
