To MAKE YOUR STRAWBERRY bed bear well next year, work it out thoroughly and mature well as soon as it is through bearing. Don't put it off until the bed is filled with weeds and grass. First plough or spade the ground between the rows, cutting the rows down narrower; then work the rows out well with a fork potato-digger, and scatter in them a good quantity of well-rotted compost, guano, or poudrette. It is a good plan to draw fresh earth in among the plants.

The best and most thoughtful newspapers now allow contributors to the wastebasket to write on both sides of the sheet.

A reporter who had escaped from a fighting crowd said there was too much "miscellaneous matter" in the affair to suit him.

JANUARY.—In the ordinary old English sense, we have no spring time in Canada. We make a sudden jump from the snows of winter to the sowing time. All the more necessity, therefore, to make good use of the long months of winter. To a thoughtful worker, there are no idle periods. A farmer can and ought to study carefully the best methods of tillage, and as this is an age of improvements in all kinds of machinery, it would be well to procure the best. Repairs may be done. But as before we have recommended the best periodicals and the best works on Farming, so now again we urge our friends, especially our young men, to procure the standard works of the best authors. The time is past for ridiculing book learning relating to the whole theory and practice of Agriculture.
