

vi
-THE-
National Cash Register.

A COMPARATIVELY small machine, 21 inches wide, 16 inches deep, and 23 inches high, is the latest cash system brought before the public, and is now used by over 3,000 business men in all parts of the civilized globe, 50 of which are in CANADA. Registering accurately and indelibly each and every sale from 1c. to hundreds of dollars. It is operated by a set of keys (of any denomination required), which by being pressed show the amount registered to the customer, rings a bell, opens the CASH drawer (which locks automatically), at the same time recording the amount inside, adding up on a set of cylinders, taking but one MOTION to do it all, and LESS TIME than opening an ordinary drawer. Messrs. J. L. Baker & Sons, proprietors of the Refreshment Hall at the New Orleans Exposition write, "Yesterday from 10 a.m. to 6 p.m. nine inexperienced LADY clerks, without a cashier, operated one of the 5 REGISTERS we have in use; it showed 2,794 SALES and the CASH BALANCED." It is adapted to all classes of retail business, being used in Drug Stores, Groceries, Tobacconists, Hotels, Restaurants, Stationers, in fact all stores where the proprietor wishes to keep a strict cash check. Below we give a few names of those who are using the machine in Canada, and who will be pleased to answer any enquiries. Send for illustrated catalogue and full particulars to Yours respectfully,
