

DR. WILLIAMS' Fly & Insect Destroyer

MANUFACTURED BY BAKER & BOUCK

Have you money to invest? How would you like to make 1,000% on your investment? You can do it. We have it on the word of one of the largest breeders of thoroughbred cattle in Canada, that for every dollar's worth of DR. WILLIAMS' FLY & INSECT DESTROYER he uses he gets in direct return \$10. His books prove his statement.

ATTENTION, STOCKMEN!

If thieves broke into your bank and stole your hard-earned deposits, you could not punish them severely enough, but flies and lice on your cattle and poultry do the same thing, yet few raise their voices in protest or their hands to restrain them, though they are fully aware that DR. WILLIAMS' FLY & INSECT DESTROYER will render their stock and poultry as safe from these pests as the bank. Try it, and be convinced.

Josephine, the Missouri Chief, the most wonderful cow in the world, valued at \$20,000, producing 17,008.8 lbs. of milk in 6 months and 529 lbs. butter, was subjected to the annoyance of flies for one day, and the quantity of milk was reduced by 18 lbs. from the day previous. Calculate what that means for the season, and add the result to your bank account, and see what DR. WILLIAMS' FLY & INSECT DESTROYER can do for you.

If your local dealer does not carry it, see that he orders it at once.

QUESTIONS AND ANSWERS. Miscellaneous.

WOUND ON HEEL.

Heavy colt has a barbed-wire wound on heel, or back part of hind foot, immediately above the hoof, and it is festering. Have used different liniments, but they seem only to irritate it. R. S. C.

Ans.—For festering wound, keep clean, and dress three times daily with a five-per-cent. solution of carbolic acid in water. If proud flesh appears, dress once daily for a few days with butter of antimony, applied with a feather.

REGISTERING SHEEP—INJURED HORSE.

1.—Please let me know where I can get sheep registered.

2. Horse got a stick run clean through its leg, about four inches above the pastern joint. W. E. B.

Ans.—1. Write Accountant Live-stock Records, Department Agriculture, Ottawa. State breed of sheep and number you wish to register, and ask for blank forms. The rules and fees are printed on back of these forms.

2. If the case is as serious as the description given, better consult a veterinarian.

LOSING FEATHERS.

Two young cocks have lost all the feathers off their necks, and the comb of one is turned black on the points. Some of the hens seem to be losing feathers from their necks. There is a bare band around the neck, close to the head. Kindly suggest a cause of, and remedy for this trouble.

ENQUIRER.

Ans.—First, be sure that the fowls are not plucking out the feathers. Nothing seems to please a cock bird better than to stand and allow the hens to pick the feathers from his neck. And, mayhap, there may be only one or two guilty of the vice. Or, the loss of feathers may be due to a parasite which lodges at the base of the feathers. In the first case, allow the hens free range where they can find insect life and plenty of grass. If there are only one or two offenders, kill them, unless valuable. In the second, rub bare and surrounding parts with carbolated vaseline. The dark point will likely soon come right. A. G. G.

The first- and second-prize yearlings were an extra good pair, Messrs. Montgomery being first, with a get of Fyrolasting, and Mr. Dunlop second, with The Dunure, by Baron of Buchlyvie, out of a Hiawatha dam. Stephen Mitchell was third, with Boquhan Jupiter, by Apakwa.
