Points to be Considered:

The only gasoline engine to have is one that is properly designed so as to be economical on gas-oline and give most power.

It must be easy to start and not require much attention when operating. It must be so con-structed that it will run 24 hours per day if you want it to.

It must have strength and weight where needed, and not like some of the flimsy, cheaply made engines, which are daily being offered to farmers.

Fairbanks-Morse are the largest manufacturers of Gasoline Engines in the world. There are to-day over 80,000 Fairbanks-Morse Engines in oper-ation. This means over 80,000 satisfied customers.

We have been making Gasoline Engines for over a quarter of a century. You can, therefore, see that when you buy a Fairbanks-Morse Gasoline engine you are getting the result of experience, and not, as in the case of some unscrupulous manufacturers experiments at your expense.

Fairbanks-Morse are the simplest, safest, most reliable and economical Engines made to-day. We know this is a strong statement, but can prove every word of it.

Every Fairbanks-Morse Engine is thoroughly tested before being shipped out, and is sold under positive guarantee to develop more than its rated horse-power, and our guarantee holds good for one year.
