ROYAL BUSINESS MEN ARE MANY.

Not a few of the rulers in the Old World are prosperous business men. The most conspicuous example is the Kais-er, who includes among his interests a porcelain factory. The general conduct of it is based upon rules and regula-tions laid down by the Emperor himself. Indeed, it is said, the Emperor is not above engaging employees himself, adjusting their wages, and even designing certain of the wares turned out. The Emperor is a model employer, anxious as to the comfort of his men, who have been provided with cottages and pensions and given a share in the

profits, which are reported to approxi mate \$50,000 a year. It is a matter of common knowledge that the Prince of Lippe Detmold is a

dealer in butter and eggs, while he has as a side line a busy brick factory that adds unsterially to his income. The King of Wurttemberg is the pro-

prictor of two hotels within his do mains which are reported to be worth something like \$45,000 annually to him.

King of Saxony, too, has business in-terests of this character, though on a

smaller scale. Periops the most unconventional of the royal business men is the King of Servic, who in addition to several shops a motor car agency.
