## GERMANY WILL NOT INTERFERE

With France in Latter's Intention to Send Fleet to Morocco.

Berlin, July 2.—The French charge d'affaires here visited the foreign office today and informed Foreign Secretary Tschirky of the situation at Casa Blanca and the intention of the French government to send warships to Morocco. Die Post, which often reflects the views of the government, discusses the Moroccan situation at length today, concluding its article with the statement that Germany will interpose no unnecessary hindrance to France as it is seen to be evident that comprehensive measures are required to restore order. Die Post, however, is little pleased with the turn affairs have taken and says that if France sets out in the beginning to secure control of Morocco, fate seems to be making the way easy for her by constantly bringing up new excuses for her to settle more firmly into the saddle.

Adventurers Known in Montreal, Montreal, Aug. 2.—Mrs. Eva Fox Strangways, who in different portions of the United States has duped people right and left as the pretended daughter of Earl Hugh Grosvenor, is well known in this city. Here also she leaves a trail of debts behind her.  
Mrs. Strangways came to this city about a year ago and put up at the Place Vigor hotel, Montreal's swell hostelry. She soon became known to real society people and was particularly friendly with what is known as the McGill University set. After accumulating a goodly number of debts among local tradesmen she disappeared from view and has not since been seen in this section of the city.

Chinese Factions in New York, Boston, Aug. 2.—Burning with hatred for their deadly enemies belonging to the rival Yung Loong Tong society, a band of New York Chinamen numbering a dozen or more, and said to be members of the notorious Hop Sing Tong organization entered an alley in Chinatown and drawing revolvers opened fire on half a dozen Chinamen, killing three and injuring seven.

At the first volley the Chinamen rushed for their quarters, stumbling over one another in their haste to reach shelter. The Hop Sing Tong chased their victims into their own doorways and shot them down. Then casting away their arms, the Chinamen visitors ran through the Chinese quarter, most of them escaping the police.

\$4750 Bank Money Disappears, Pittsburg, Pa., Aug. 2.—Notwithstanding a searching investigation by the bank directors and the efforts of detectives, the disappearance of \$4,750 from the First National Bank of Turin, Pa. here, early Thursday morning, remains as much a mystery as when the loss was first discovered. Thomas Jordan, the negro janitor of the bank, is in jail charged with having stolen the money. He denies the accusation. Cashier Carroll assumes the loss and in his statement to the directors, says he is not positive where he left the missing money. Cashier Carroll says he will reimburse the bank.

Yankee Motor Boat Won, Southampton, August 2.—The American motor boat Dixie, owned by Commodore E. J. Schroeder, of the Auto Boat Club of America, today won the race for the international marine motor cup in Southampton water, beating the nearest British boat, Dumfries, by three-quarters of a mile over a 35-mile course.

Tobacco Crop Damaged by Hail, Springfield, Mass., Aug. 2.—The tobacco crop in this vicinity was damaged to the extent of about \$100,000 by a hailstorm that passed over this part of the Connecticut valley on Thursday. The crop was within two weeks of cutting.

\$1,000,000 Fire in Wisconsin, Tomahawk, Wis., Aug. 2.—A fire which started in one of the buildings of the Tomahawk Branches U. S. Leather Co. laid the plant in ruins. (Only the office was untouched by the flames. It is probable that the big plant will be rebuilt. The loss is about \$1,000,000.

Wine Growers' Agitators Released, Montpellier, France, Aug. 2.—M. Marcel Albert, M. Ferroul and the other members of Agitators' committee who were arrested in connection with the recent wine-growers' agitation, were today released on bail.

Evicted Tenant's Bill Passed, London, August 2.—The evicted tenants of Ireland Bill passed its third reading in the House of Commons and its first reading in the House of Lords today.

Dry Dock Tenders too High, Washington, Aug. 2.—The navy department today rejected all bids submitted for the construction of a dry dock at Beaufort, on Puget Sound, because they were not within the limit of the appropriation.

## CULPABLE NEGLIGENCE.

Father of Child Who Died of Pneumonia Sentenced to 30 Days.

New York, August 2.—Clarence W. Byrne, who is a salesman, was convicted on charges growing out of his failure to employ medical assistance for his six year old daughter, who died of pneumonia, was today sentenced to 30 days' imprisonment by the court of general session. Byrne, who is a salesman, was found guilty of violating section 288 of the penal code, which provides that "a person who willfully omits, without lawful excuse, to perform a duty by law imposed upon him to furnish food, clothing, shelter or medical attendance to a minor, is guilty of a misdemeanor." The defendant's excuse for not calling a medical practitioner during his daughter's illness was want of faith in medical doctors and the religion to which he belongs.

## WILL NOT ACCEPT REJECTED MEATS

British Government Takes Action to Ensure a Thorough Meat Inspection.

London, Aug. 2.—The bill introduced by John Burns, president of the local government board, enabling the board of trade to institute more stringent regulations for the prevention of the danger arising to the public health from the importation, preparation, storage and distribution of articles of food, passed its second reading in the House of Commons today. In the course of the debate on the bill Mr. Burns explained that it empowered the authorities at all ports to inspect food, to take samples and to reject any goods. It might be argued, Mr. Burns said, that since the recent meat disclosures in England and elsewhere that the regulations proposed by the government could not allow the laws to remain defective because they were not perfect. The government would relax to where they were before.

Continuing, Mr. Burns declared that he had received a report that a German consul had said the American meat inspectors had informed his government that they were willing to consent to the inspection of any meats, provided that whatever goods were rejected should be returned to the packers, as they could be sold in the United Kingdom. The speaker said he was not going to allow that, and he did not see why the United Kingdom should take whatever Germany, France, Denmark or any other European country might offer. He was prepared not to enforce the regulations for a period of forty days after the adoption of the bill. The government would not irritate, harass or inconvenience those packers carrying on a legitimate trade, but the government board must have greater power over imported tinned food in order that the poor who suffered most from the dangers of disease could be saved.

Emigration Commissioner in Italy, Constantinople, August 2.—Congressman Wm. S. Borah, of New York, one of the American commissioners in Europe, returned to make a thorough investigation of emigration conditions, arrived here today, after having visited Palestine and Syria. He will leave for Romania, where he will continue his investigation.

Well-Known Preacher Dead, Boston, Mass., Aug. 2.—Rev. Chas. A. Crane, D.D., pastor of People's Temple, one of the best known Methodist clergymen in New England, died suddenly of heart disease at his home here to-night. A widow, son and daughter survive.

## IMMENSE CANAL TO CONNECT RHINE

With Marseilles. Will Cost \$15,200,000. Will be Largest in World.

Paris, Aug. 2.—The minister of public works has approved the project of the department of bridges and roads for the construction of a canal which will be 68 feet, and the height will be 42 feet. It will thus involve the excavation of 2,136,000 cubic meters against 1,058,000 in the case of the famous railroad tunnel at St. Julien, which is 21.6 kilometers in length, but only 24 feet wide and 18 feet high. The total cost of the Marseilles-Rhine canal will be \$15,200,000.

## PRESSMEN FIND ROCKIES SUPERB

Finer Than Switzerland. To See Canada Should be Part of Englishman's Education.

Field, B.C., August 1.—Three glorious days were spent in the Canadian Rockies by the British pressmen, who are the guests of the president of the Canadian Pacific Railway Company. Banff, the beautiful, was reached Wednesday morning, and the glories of the Bow Valley, which enchanted the visitors, were fully exploited. The great coal mines at Bankhead were also inspected, and a visit paid to the buffalo parks, to the cave and basin and other points of interest.

Crossed The Great Divide, The trip up the lovely Bow Valley in the early hours of Thursday and the delightful drive up the mountainside to the Lake in the Clouds were followed by a day of mountain climbing, and today the Great Divide was crossed and the trail reached at ten o'clock. Then came a visit to the charming Emerald Lake and a pony ride to the look-out of the marvelous Yoho Valley, where a view was obtained of the Takakaw Falls, which descend 1,200 feet.

Finer Than Switzerland, "There is nothing finer in all Switzerland," was the consensus of opinion of those of the party who had visited the land of William Tell, and beauty there is not so much grandeur as there is here. The visitors were particularly pleased with the G.P.R. mountain hotels, which these days are much better than those of Switzerland.

Needs To Be Seen, Speaking of the trip, Mr. P. H. Cookman, of the London Morning Post said:

"To see Canada should form part of every Englishman's education. He knows it on the map; he knows its length and its breadth; he knows that it contains a vigorous and patriotic population. These things he accepts as facts, but he can never grasp the reality of Canada until he visits it, speaks with its people, sees sufficient of everybody to indicate to him the immensity of the rest, and travels over its vast territory."

A Land of the Future, "He then understands that Canada, though a very potent land of the future, is even more a land of the present. As for ourselves, we should have us thus learned much that we shall not forget, but, through the eyes of these men, we have seen the reality of the rest, and travels over its vast territory."

He then understands that Canada, though a very potent land of the future, is even more a land of the present. As for ourselves, we should have us thus learned much that we shall not forget, but, through the eyes of these men, we have seen the reality of the rest, and travels over its vast territory."

As for ourselves, we should have us thus learned much that we shall not forget, but, through the eyes of these men, we have seen the reality of the rest, and travels over its vast territory."

He then understands that Canada, though a very potent land of the future, is even more a land of the present. As for ourselves, we should have us thus learned much that we shall not forget, but, through the eyes of these men, we have seen the reality of the rest, and travels over its vast territory."

## GUN EXPLOSION KILLED THREE

Breach Lock of Gun on French Ship was Blown off with Terrific Force.

Toulon, Aug. 2.—The breach lock of a hundred calibre gun was blown off today on board the gunnery ship Couronne during the target practice in Salines roadstead and three persons were killed and five wounded. The force of the explosion was terrific and the bodies of the dead men were so badly mutilated as to be almost unrecognizable. Three of those wounded are in a serious condition. As soon as he learned of the accident Admiral Marquis sent the armored cruiser Latouche Treville to the assistance of the Couronne. The dead crew members were taken to the naval hospital of St. Mandrier. The cause of the explosion is a mystery. It was believed at first that the accident was due to the breach-closing mechanism not working, but subsequent investigation failed to establish this as the cause. A question was also raised concerning the quality of the powder used in the gun, but nothing tangible was ascertained. The commander of the Couronne has sealed all the guns on board the vessel with a view to having a board of inquiry investigate the explosion. A similar accident occurred on board the Couronne April 19th, when three men were killed and a number wounded.

Chicago May Have Teamsters' Strike, Chicago, Aug. 2.—Arbitration without an umpire proved to be a failure in the case of the packing house teamsters and their employers. No negotiations were broken off today after the arbitrators for the second had failed to agree on an umpire. The business agent of the teamsters' union may now call a strike of the teamsters at any time without placing the matter before the rank and file of the union.

## THE CANTERBURY AMBON.

Will Be Admitted Into United States Free of Duty.

Washington, D.C., August 2.—At the request of the Right Reverend Henry Y. Satterley, Bishop of Washington, the treasury department has directed the collector of customs at New York to admit free of duty the Canterbury ambon, described as a "work of art to be used for religious purposes." The Canterbury ambon was made in England under the direction of W. D. Caroe, an English architect, and is a pulpit fashioned from stones taken from Canterbury Cathedral. It is to be placed in the new Protestant Episcopal Cathedral now being erected at Mount St. Alban, near this city.

\$100,000 Baltimore Fire, Baltimore, Md., Aug. 2.—A fire tonight did damage estimated at \$100,000 in the establishment of Chas. E. Forbes & Co., manufacturers of burials and sashes.

## HAYWOOD IN SALT LAKE CITY

Crowd Almost Overwhelms the Party in Eagerness to see Figure in Famous Trial

Salt Lake City, Utah, August 2.—Carrying his invalid wife in his arms, Wm. D. Haywood, secretary of the Western Federation of Miners, stepped from an O.S.L. train at eight o'clock this evening into a crowd that had gathered to meet him. In its eagerness to see the principal in the famous trial at Boise, the mob almost overwhelmed the little party. Mrs. Carruthers, Haywood's mother, was swept away from the waiting carriage. She was rescued by her stalwart son, and the latter, after shaking a few of the hundred of outstretched hands, thanked everybody and started with his family for the home of his sister, Mrs. Jas. Killean.

Will Haywood came his wife, mother, two daughters and other relatives, who met him in Ogden; John Murphy, attorney of the Western Federation of Miners, who is now dying from tuberculosis, and Dr. W. L. Baeor, Mr. Murphy's doctor. On arrival here the party was met by a crowd that he was taken to the Hot Springs Hospital, as fear is expressed that he will not live to reach Denver. At Ogden the news of Haywood's arrival spread through the railroad yards and men from the shops and switch engines took advantage of the short stop to see the labor leader and to cheer him as the train rolled out of the station.

The story that I have had a quarrel with Meyer doubtless originated where other similar stories equally false, have been started before," said Haywood, during the ride from Ogden to Salt Lake. "There is absolutely no truth in them. Mr. Meyer delayed his departure from Boise chiefly because he wanted to stay near Bettison as long as possible. As to the charges that may be made in counsel at the next trial, I do not know that there will be any change. Some slight difficulty has arisen between Messrs. Richardson and Dewar. Both are big men and such differences are almost sure to arise when two big men are pleading the same case."

Haywood said he would leave with his family for Denver at six o'clock this evening. He expects to be at Federation headquarters on Monday.

## ADMISSION OF JAPS DESIRED

California League Insist Japs are Necessary to Industrial Expansion.

Washington, Aug. 2.—According to H. D. Keechval, a prominent fruit grower of Sacramento, Cal., who is in the city, the International Equality League of California, of which he is a member, has adopted and will present to President Roosevelt, the immigration authorities, a petition demanding the admission of Asiatic labor and enterprise to California "under no other restrictions than are imposed upon the admission of European labor and enterprise to our Atlantic seaboard." The petition declares that only through this method can the United States foreign commerce be expanded and peace with the rest of the world be promoted. "To save California from the decadence of her industries with reference to the soil," the petition concludes, "we demand admission to this state of Japanese labor."

Will Come to Alberta, Winnipeg, Aug. 2.—Rev. Dr. Bryce, of Manitoba College, left by next evening's train to be absent for several weeks in Alberta and British Columbia.

Hamiota Elevator Burned, Hamiota, Man., Aug. 2.—The Dominion elevator here, together with about a thousand bushels of wheat, burned this morning.

## THE PREMIER AT HOME AGAIN

Returns from Educational Conference in London and European Tour.

From Saturday's Bulletin, Premier Rutherford returned to the city yesterday after an absence of two months in the old country, whither he had gone as a delegate to the Federal Conference on Education held in London under the auspices of the League of the Empire. Speaking to the Bulletin this morning, the premier stated that nothing definite could be said of the direct results of the conference, but that the indirect results would place the conference second only to the great imperial conference that closed its sessions a few days before the educational conference opened. The indirect results as measured by public opinion in Great Britain, and eminent educationalists all over the empire justified the meeting of the conference.

The programme and proposals discussed seemed to involve great difficulties, but the aspect of difficulty was not that which appealed to the premier. The speakers outlined striking ideas. Discussion was naturally theoretical and general rather than practical. But the paramount object of the conference, the increase of knowledge and sympathetic understanding in every part of the Empire, was undoubtedly attained.

"It required courage and imagination," said the premier, "to deal with such proposals as the standardizing of teachers' certificates throughout the Empire, the recognition of university degrees, the interchange of professors and educational instructors and the best methods of teaching the English language to the foreign population that live under the British flag."

Sentiment Against Exchange, There was a strong sentiment against the interchange of teachers. The premier stated to the conference that the department of education in Alberta was willing to take teachers that were only qualified by the basis of exchange as that would possibly interfere with the autonomy of the local school boards. Careful and sensible speakers said that certificates and degrees could be accepted in any part of the empire on the basis of merit and that it was impossible to put on an equality of value in the interchange of diplomas.

There was, however, a wholesome spirit of optimism pervading the conference and a desire to add to the many talents, five talents more which made the conference a meeting ground of mutual counsel and inspiration.

The question of establishing a general bureau with a permanent secretariat was one that appealed strongly to the delegates which, might serve the purpose of a clearing house of teachers and exchanging information. The matter, however, was left to the department of education of Great Britain, to be taken up again at a conference four years hence.

Gathering of Experienced Educationalists, "The great value of the conference," said the premier, "consisted undoubtedly in the meeting of a large body of persons of extraordinary experience and ability in educational work. There was evidence of the varying character of the educational types in the old land and the lands beyond the seas."

The spirit and impetus of the meeting may be likened to a gathering of merchantmen who brought out of the treasury things "new and old." At the conclusion of the conference Premier Rutherford visited Paris, Rome, returning to the continent, he visited the home of his father, in Perthshire, at the famous Birks of Aberfeldy. In his travels in Scotland he learned from the people that the cream of the Scotch are emigrating to Canada, which these at home regard not altogether with favor.

Despite the statement recently made by the British Premier that twelve millions of the British people are on the verge of starvation, Premier Rutherford says that labor is pretty well employed in Great Britain, and that the English business man is in every way the equal of his American cousin.

Premier Rutherford visited Ireland and the Dublin exhibition, and of all things that pleased him, the Canadian exhibit pleased him most. Next in favor was the Irish industries exhibit.

Speaking of Canada, and particularly Western Canada, the Premier stated that his observation with regard to the crops along the way was that they looked better in Alberta than in either Manitoba or Saskatchewan.

Brandon Indifferent to Commission, Brandon, August 2.—The atting of the Beef Commission here today aroused little interest. In fact had the witnesses not been compelled to appear by subpoena no testimony would have been received. Much evidence as to the details of the butchering business was taken today, and a large mass of useful information was dictated by the commission, and their counsel from the West.

Butchers, who gave a very business-like line of information. The Butcher's members of two different firms, deposed that they had never heard of any real agitation in the papers against butchers, wholesalers or retailers.
