

HARVEST IN FORT DISTRICT EARLIEST IN TWENTY YEARS

This is the Opinion of Mr. Frank Walker, M.P.P., Who Has Spent Nearly a Quarter of a Century in That District.

SOME GRAIN HAS ALREADY ASSUMED A YELLOWISH TINGE

Flourishing Fields of All Kinds of Grain Were Seen at Agricola, Partridge Hills and Josephburg Settlement.

There is as much new breaking in Fort Saskatchewan District as in the last three years together—a great part of the new land will be sown to fall wheat, which has proved an unequalled success spring wheat being supplanted.

The heading grain, telling of full kernels, has already assumed a yellowish tinge and heralds the near approach of harvest in the Fort Saskatchewan district. In three weeks' time, cutting will be general. Some farmers, who are old-timers, including Frank Walker, M.P.P., predict the earliest harvest in twenty years. They say that binders will be turned into the fields in the first week of August. The crops throughout the country northeast of Edmonton from Fort Saskatchewan to Agricola were found to be in a uniformly good condition by a British representative who last week made a long inspection trip through the district lying between the river and the Beaver Hills. The grain nowhere gave evidence of drought, and in many places the crops were in the early part of the season. All crops seem to show signs of straw. Wheat, oats and barley in almost every instance headed out in most promising style. The yield of all these grains in the Fort Saskatchewan district should be well above the average.

Many Flourishing Fields. Many fine fields of fall wheat were seen by the British representative. The advance of this kind of crop is causing it to rapidly supplant spring wheat in the Fort district. It can be put in at a time of year when the farmer has little else to do, and it is never in danger of early frost. It is now in the country and has yielded well. This year a strike price of a better crop than ever. In consequence, much breaking is being done this season and a large percentage of the new land brought under cultivation will be sown to fall wheat.

An Apostle of Fall Wheat. One of the most ardent apostles of fall wheat is Frank Walker, M.P.P., of Fort Saskatchewan. Mr. Walker has all along planned his farm to spring wheat. His conversion is of recent date. Last year as an experiment he sowed eighty-two acres to fall wheat on his farm, three miles northeast of the Fort. One would have to travel far today to see a finer field of wheat in crop in any of the country. The grain is over four feet in height, uniform and carries heavy heads. It should yield well over thirty bushels to the acre, judging from present conditions. The field was sown on August 12 last year. It will be ready for cutting in the first week of next month.

Not far from Mr. Walker's field Dr. Aylen, mayor of Fort Saskatchewan, has two promising fields of fall wheat. On the Hughes farm, three miles east of the Fort, there is a splendid field of late oats. On this place there are 175 acres in crop in the Fort district.

In the Josephburg Settlement. Ed Shmona, former superintendent of Elk Park, at Lamont, has 250 acres in crop on his farm, four miles east of Fort Saskatchewan, on the edge of the Beaver Hills. He has a crop of oats which should yield over sixty bushels to the acre, from the present conditions. The field was sown on August 12 last year. It will be ready for cutting in the first week of next month.

Adam Rippe, a steady crop of spring wheat in the condition on his farm five miles southeast of the Fort. The grain is well headed out and should be ready for cutting early in August.

Down by Partridge Hill. In the Partridge Hill settlement, six miles southeast of Fort Saskatchewan, there are some promising crops. Joe Smith has a splendid hundred acre field of barley. The seed was put in late just before the rains started. Mr. Charles Finlay, has a wealthy crop of spring wheat, forty acres or more, in extent in this district. Walter Flintoff has a fine field of late oats. This year, Mr. Ross has some fine looking fields of grain.

Timothy Fast Improving. The growth of timothy has been so quickened by the recent rains that many places a good crop will likely be cut. Three miles east of the Fort thirty acres of fine looking timothy on the farm of Jacob and Wm. Bentley should yield fifty and fifty half tons to the acre.

Fall wheat is coloring and beginning to bend over on the farm of Albert Shackleton, three miles southeast of the Fort. The grain shows a good kernel and a good length of straw. Mr. Shackleton has 150 acres in crop with oats, which promise a good yield of spring wheat. This year Mr. Shackleton will put fifty acres more of fall wheat on breaking and summer-fallowed land.

TWO TROLLEY CARS COLLIDE

Blowing Off of a Passenger's Hat Causes Injury to Party.

Annapolis, Conn., July 19.—The blowing off of a passenger's hat on a trolley car running between here and New Haven late yesterday afternoon, was the cause of forty to forty-five people being more or less injured by an express baggage car striking the rear end of the passenger car. When a male passenger's hat dropped to the conductor gave the motorman the signal to go back. Just as the passenger, W. Jackson, picked up his hat the express baggage car was seen a half mile behind.

Mr. Jackson, who had recovered his hat and was fifty yards in the rear of the passenger car, knew that he could not reach the car before the express car reached him, so he waved frantically at the motorman of the express to stop. The car did not stop, but dashed into the passenger car with terrific force. Aaron Brown, of Annapolis, who was sitting in the rear vestibule, was jammed between the two cars and smothered. Two passengers are in an hospital and their recovery is doubtful. Several other women are also seriously injured.

There is as much new breaking in Fort Saskatchewan District as in the last three years together—a great part of the new land will be sown to fall wheat, which has proved an unequalled success spring wheat being supplanted.

NO SCHOOL LAND SALES

Will Be Held in Southern Alberta This Year.

Calgary, July 17.—F. C. Potts, of Brandon, Man., valuator of school lands in the western provinces for the department of the interior, was in the city last night, and leaves this morning for Lacombe.

Mr. Potts said that with the exception possibly of one at Edmonton, no public sales of school lands will be held in Alberta this year. It was the intention of the department to hold a sale at Carmanagay, but under the circumstances attendant on a short crop, it was considered advisable to postpone it until next season.

There were ten sales in Saskatchewan last year, and bringing an average price of \$12.25 per acre. The sales in Alberta averaged about 60 cents per acre higher than those in Saskatchewan.

The crops in the Brandon district and throughout southern Manitoba, it is said, are light this year, but the farmers are in a comfortable position, and have other resources, they will not feel the partial crop failure so much as those of a newer country.

A SETTLER TELLS OF THE GRANDE PRAIRIE

Season Favorable to Growing Crops, Which Were Sown Late, Owing to Heavy Snow, Causing by Spring Break-Up En Route From Edmonton to the Prairie—20,000 Acres Located This Spring.

Beaver Lodge, Grande Prairie, June 29.—With the rush of early spring the river of the Grande Prairie broke up about the 20th of March, and caught numbers of us fellows. The river was in a hurry to get to the mouth of the Smoky of south of the river. It was in a hurry to get to the mouth of the Smoky of south of the river. It was in a hurry to get to the mouth of the Smoky of south of the river.

Another Fire in Afternoon. An alarm was turned in at 4:10 in the afternoon for a blaze in a shack on the corner of Columbia avenue, near the Imperial Oil warehouse on the C.N.T. property. The fire had started from children playing with matches. They lit a curling iron and the entire structure was in flames. Practically all the contents of the room and in a few minutes the whole building was destroyed.

A. M. PARKIN IS RELEASED. Released Month in St. Paul—Canadian Banks Not Prosecuting Him. St. Paul, Minn., July 7.—Telling the county attorney that he expected to receive employment from the Salvation Army in Calgary, Parkin, who had paid up his indebtedness in this city, A. M. Parkin, of Calgary, Alta., who has been held in custody since May 10 on the charge of kidnapping a hotel, was released today on his own recognizance.

Parkin is the man who created a stir during the strike at the hotel, when he was charged with kidnapping a hotel, was released today on his own recognizance.

Next year the crop of crop will be greatly increased judging that every person is breaking up what he is capable of doing. He is breaking up what he is capable of doing. He is breaking up what he is capable of doing.

Peter Tompkins, of Grosved, land agent, took applications for scrip and homesteads amounting to over twenty thousand acres, on his visit to Beaver Lodge about May 1st. It is astonishing how fast this part of Alberta is being broken up. Hundreds are coming up right along, and in many cases bringing their families and supplies with them.

A Few Turned Back. We have just learned that some people who came to Peace River looking for work, were not admitted to the country. They were not admitted to the country. They were not admitted to the country.

DOESN'T REFORM. Judge Would Rather Send Boy to Penitentiary than to Reformatory. Poughkeepsie, N.Y., July 17.—Supreme Court Justice Marchant yesterday expressed himself in no uncertain terms that in his opinion the reformatory is not a reformatory. He said that if he were a parent, he would rather have a young man go to the penitentiary.

Bookmaker Must Go. Wellington, New Zealand, July 19.—Three years ago parliament legalized bookmakers with unsatisfactory results, considerable numbers of undesirable characters arriving from Australia and betting on horses increased. A strong demand is now being made for the repeal of this legislation.

Monument to Montcalm. Vaurey, France, July 14.—M. Doumergue, minister of education, Sunday unveiled a monument to Montcalm, erected by public subscription in France and Canada, near his birthplace in Canada. He had been elected from Canada and the Canadian agent in France, Hector Fabre, presided at the ceremony.

THRILLING RESCUE BY EDMONTON FIREMAN

Woman Hemmed in by Flames is Taken from Second Storey Window by Fireman McCartney at Fire in Houston Block, Jasper Avenue West.

A thrilling rescue from a burning building was made last evening shortly after seven o'clock, during the fire in the Houston Block at No. 30 Jasper west, adjoining the Central Block. The rescuers were Wm. McCartney, of No. 2 fire hall, and proprietor Nat. Barber, of the Windsor Hotel. The woman, who was hemmed in from all means of escape except by a ladder raised to a two-storey window, was an employee of the factory on H. K. street, and was carrying a clothing store in the building and lived upstairs.

When she appeared at the window all the stairway was a mass of flames and dense black clouds of smoke were pouring out of the building. She broke out the glass with her hands and the fireman rushed up the ladder to her rescue. He was followed by Mr. Barber and the two brought the woman safely down. There were few spectators at the scene, which showed considerable presence of mind. McCartney was almost overcome by smoke, but soon recovered from its effects.

The fire itself. The cause of the fire has not yet been discovered. It started suddenly in the rear of the building and had the fireman not reached the spot and got the water on quickly the damage would have been great.

The fire started in the rear of the building and had the fireman not reached the spot and got the water on quickly the damage would have been great.

PRICES OF WHEAT CONTINUE TO RISE

Sentiment is Mixed With Reference to Further Increases and Some Traders are Hesitating—News Received From West is Still Unsatisfactory.

Winnipeg, July 18.—The wheat market here opened with an upward bound and the bulls seemed to be in command. Higher cables, and the strength in the American market helped along the campaign for an advance, but the limit was apparently reached within a few minutes.

Realizing sales and the growing conviction that the damage to the crop had been sufficiently discounted for the present, forced prices down again, and in a short time a decline of fully a cent was noted.

Sentiment is now reported to be rather mixed and there is a tendency on the part of some traders to hesitate before committing themselves further to the bull side.

The Canadian crop has suffered seriously, but prices have gone up a long way in a brief period and some of the dealers are thinking that what is not worth current prices.

Weather news was in favor of higher quotations with temperatures of more than 100 reported from Southern Alberta and scarcely any rains in the three provinces. A continuation of fair, warm weather is indicated and the outlook for a supply of moisture is very slim.

No doubt the crop has done well on heavy lands, especially in Saskatchewan, and it is still a long way from being a failure.

Chicago, July 18.—Wheat led the grain list upward this morning. "Shorts" and investors taking hold of the belief that prices are better, while wheat was decidedly bullish, especially for wheat. September was up 3-4 cents, December was up 1-2 cent, and May was 2 cents to the good. September and December soon reacted 1-2 cent and May 1-3 cents from the opening on realizing sales.
