> Tennant looked at her with intersted eyes. In her shabby old dress and worn leather shoes, she was peculiarly attractive. There was a simplicity and delicacy about her that made him curious. There was nothing of the cockney about her, one of that pert readiness and cynical acquaintance with "gutterdom" that had been the characteristic of I love youhis former models. She was like a flower that had been plucked from garden and flung into the gutter.

"When did your mother die, Lottie?" he asked, after a pause. When I was rifteen. We lived just out of London then, at Brixton, and mother used to do sewing, she did nothing else. She was always sad, alway sweet," the coft young voice went on, "and then one day I came

ture is finished we must think of something else, only don't worry—just look ahead!"

As he spoke he put his hand on her shoulder and gave it a brotherly pat. She was so much younger than he was that it did not occur to him that the vivid blush that stained her pale cheeks was caused by his friendly act or that in the girlish eyes lifted to his there was the dawning light of a wo-

man's adoration. But another figure that suddenly appeared on the threshold of the studio, and saw that familiar attitude recognized what the man failed to see, and when Jaspar Tennant, with an exclamation of pleased surprise, turned to greet her, he wondered at the coldness that had falle over the lovely proud face.

"Miss Traine! what good wind blows you here? Is Lady Mary down-She shook her head, and a faint

color stained her cheeks. "No, I was driving past, and billet. Failing that—" He paused thought that I would leave a message, and then your old housekeeper said you had your little model here, so I

changed my mind and came up."

She glanced at Lottie, who had been looking at her with large awebelieved, my dear Steinway? Your struck eyes. Never in all her life had and Galway. Then before he could interrupt, she went on, "I am going to be married to Mr. Hawke in five weeks' time, and of course I shall be very busy-with my trousseau." "Married in five weeks' time," he repeated. "Isn't that-sudden?"

'Yes, but my father and Mr. Hawke wish it," she said wearily, "and after all, what does it matter when I am married--next month or next year?" Her words, unguarded and spoken on the spur of the moment-the moment when a woman forgets to play a part-sent the blood to his veins in a flood of surprised joy. This marriage with the rich and nowerful city man was not a love match-she had given her hand where her heart was not-and now was she regretting it?

Little glances and phrases came back to him. She was not happy. This beautiful girl, whose love should crown any man's life, was eating her proud heart out through a sense of honor. He took a step towards her. They were alone in the studio. The sinking

rays of the sun caught a coil of her russet hair and burnished it into a band of gold. Never again might such an opportunity occur when they would be alone. "Miss Traine," he said hoarsely, you are unhappy in this engagement

## HARVESTS OF IRISH RUINED BY STORMS

What Promised To Be Best Crop of Years Flooded and Blown Over.

Dublin, Sept. 29. - What promised Irish farmers have enjoyed for many years has been ruined by the disastrous storms and floods which have prevailed throughout the north and west of the country during the last week or two. Grain that had been cut and stocked in the fields has been swept away, and even large quantities of oats and hay in stacks have been blown away by the wind. Cattle and sheep have been drowned in large numbers and a great many farmers have been ruined.

The damage is worst in Derry, Tyrone, Donegal, Carlow, Roscommon a few days ago near Derry which filled one of the reservoirs that supplies the town with water and caused it to among the poorer inhalitants. Red Tape Closes Libraries.

The newspaper rooms of the Dublin public libraries have been closed and no more shining example of the apsurdity of Government red tape could be wished for than this. The money appropriated for the libraries fund Saturday in aid of the fund for has been exhausted, and although there nurses' home in connection with the are substantial surpluses in other hospital. funds, and although every member of the corporation is anxious to keep the news rooms open, it has been found Auxiliary of the Anglican Missionary impossible to do so, and there is no prospect of relief even at the opening of the new financial year, as the law limits the amount to be spent on libraries to the product of a tax at the rate of 2 cents in the \$5. If the corporation should vote to transfer some of the money lying idle in other funds to the libraries fund, the local government board, which is a bureau of the castle government, would step tone. ### SAYS ALL HAVE HAD TUBERCULOSIS

At One Time or Other All Over Thirty Have Had the Disease.

Washington, Sept. 29. - The second day's session of the International Congress on Tuberculosis opened at 9:30 a.m. The entire morning was devoted to the work of section I, with Dr. Wm. H. Welch, of Baltimore, presiding. Participating in the discussions, which dealt principally with such phases of tuberculosis as channels of infection, latent infection, predisposition, and heredity were many distinguished medical scientists from abroad, Surgeon-General Simon Von Unterberger, of St. Petersburg, honorary physician at the Czar's court, contributed his views of

'Heredity in Tuberculosis." "All tendency to disease that appears in any individual," asserts D. Unterberger, "is to be regarded as hereditary whether or not the corresponding disease can be traced back each time to parents or ancestors. The tendency to consumption is inherited and may be developed by various agen-

cies. Numerous autopsies shows that every man over hirty years of age has old remains of a tuberculous infection. These facts show how comparatively easy the human organism can overcome the tubercule bacilli and give us the indication for our treatment, the strengthening of the organism by hygienic and dietetic means."

Stomach Is Sensitive.

Dr. Julius Bartel, of Vienna, discussing the routes of infection, said: 'The infection from pharnyx, stomach and intestines, is far more frequent. particularly during early life than gen-

erally has been considered." Dr. Carlart, of Berlin, in his views on the subject of predisposition of the apices of the lungs to pulmonary tuberculosis, declared that aside from infection, the cause of pulmonary tuberculosis in youthful individuals is to be sought in an individual predisposition due to anatomic and functional disturbances of the normal conditions around the superior aperture of the
