Popular Priest Honored.  
Galt, June 29.—Yesterday marked an era in the history of St. Patrick's Church, Galt, which, built 25 years ago, has as its pastor a priest whose ordination took place 25 years ago also. St. Patrick's, Galt, Rev. Father Lenhardt, President, will take a pipe band of ten strong.

The annual lawn social of Chalmers church will be held on the church grounds Thursday evening, July 6. A splendid programme is promised. Refreshments will be served by the ladies.

City post office arrangements for to-day (Dominion Day) are as follows: Delivery by carriers, general delivery wicket open from 8 to 10 a. m. and 6 to 7 p. m. All mails despatched as usual.

The London Boys' association of Windsor has elected the following officers: President, J. F. Smyth; vice-president, C. J. Wall; secretary-treasurer, Pres. Housh; executive committee, John Donahue, Ben Holman and the above officers.

A quiet wedding ceremony was performed at 633 Horton street, on Wednesday evening by the Rev. Walter Moffat, of Chalmers church, when Mrs. Reed became the wife of Mr. J. J. Orchard. The bride couple will in future reside at 224 Maitland street.

Among those who passed with honor standing the recent Toronto University examination in piano was Miss Valerie Carrothers, a pupil of Miss Isabel C. Armstrong. Miss Carrothers, who is only 12 years old, came second in London in the junior piano examination.

The many friends of Miss Gwendolyn Anthistle are pleased to learn that she has successfully completed her course in elocution at the London Conservatory. At the recent examinations Miss Anthistle won first-class honors obtaining first place in every subject.

A quiet but pretty wedding took place at the manse of Chalmers church, 322 Horton street, on Wednesday evening, when Miss Myrtle Hartford was united to Mr. W. H. Jackson. The nuptial knot was tied by the Rev. W. Moffat. The bride looked charming, dressed in white.

Col. Garthshore, of this city, one of the excursionists on the Canadian Manufacturers' trip to Great Britain, forwards to the Free Press copies of the daily journal, "On the Spot," printed on board the steamer Kensington, on her journey across the Atlantic.

Some exceedingly pretty bon mots and quips are to be found in its columns, which seems to have been contributed to by many of the participants. Wire-  
less messages were secured at both ends of the voyage.

The Western Ontario Commercial Travelers' Association, through their board of management, have received a very cordial invitation from the commercial travelers of Hamilton to take part in a concert which takes place in the drill hall, July 14, and also a gala day on the 15th. A procession will leave the drill hall, Hamilton, at 10 a. m., and the sports will take place at Brant House, Hamilton Beach. It is hoped that a very large number of the London travelers and their friends will be able to take advantage of the invitation and to take part in what is expected to be a very enjoyable

## NOW THEY ARE M.A.'S C. OF P. AND S. EXAMS

London and Western Students Who Passed Primary and Won Degrees

Among those successful in the examinations of the College of Physicians and Surgeons of Ontario were—Primary, J. F. Burns, Palmerston; E. E. Boyer, Kitchener; S. W. Baird, Lucknow; A. O. Brown, Kingsville; R. W. Paul, Harrietsville; M. Graham, Brucefield; L. B. Graham, Wallaceburg; T. O. Hutton, P. E. H. Holmes, London; R. Y. Kenny, Sarnia; H. M. Hucker, Berlin; M. McKenzie, St. Thomas; D. Miller, Delaware; M. J. McKenry, Asy; J. E. McNamara, Stratford; C. S. McVicar, Alisa Craig; A. McLean, Chatham; W. T. McBroome, London; R. D. McAlpine, London; Newell, Asymer; A. P. Owens, London; A. J. Prentiss, Drumbo; J. O. Robb, Iderton; W. G. Russell, London; C. Thompson, Listowel; E. L. Walker, Glenora; H. Walker, Jarvis.

The following were noticed as having passed the Intermediate Examination: S. J. Boyd, Listowel; H. R. Bright, Warton; Edith Beatty, Fergus; J. H. R. Brodrecht, New Hamburg; A. W. Beattie, Pond Mills; F. L. Beer, London; R. W. Buck, London; W. S. Cady, Windsor; J. F. Campbell, Ivan; A. H. Davies, Delhi; S. R. Dalrymple, Bismark; J. M. Dalrymple, Bismark; Geo. Ford, Listowel; L. I. Graham, Chas. P. W. Hall, Chatham; T. H. Henry, Harrison; P. J. Houston, Paisley; W. H. Keen, St. Mary's; G. Little, Windsor; W. S. Lemon, Asymer; E. P. Miller, Cotton; F. B. Mowbray, Thamesville; A. G. McPhedran, Waukegan; D. F. McLachlan, Glenora; C. R. Newman, Dunnville; M. J. C. Nafel, Goderich; L. G. Rowntree, London; Minerva Reid, Tillsonburg; Hanna Reid, Tillsonburg; A. Sinclair, Kilmory; A. W. Seighon, London; G. E. Seldon, Stalwood; R. G. Snyder, Princeton; A. M. Watson, Waterloo.

Those in the final—W. G. Anderson, Thorndale; H. R. Bright, Warton; J. Brodie, Forest; W. S. Cady, Windsor; A. H. Davies, Delhi; B. J. Ferguson, Teeswater; T. R. Henry, Harrison; J. F. Kilburn, Seabright; W. H. Keen, St. Mary's; A. J. Manard, Belle River; P. F. McCue, Formosa; A. G. McPhedran, Waukegan; A. G. McMillan, London; V. Reid, Watford; J. E. Stalwood, Hagersville; A. W. Seighon, London; R. G. Snyder, Princeton; A. E. Schultz, Elmira; A. Turner, London; J. M. Adams and A. E. Aikenhead.

## CITY NEWS

Total clearings at the London Clearing House for week ending 29th June, 1905, \$834,789.

Mrs. Manning, of Queen's avenue, has returned home after a month's visit with friends in Windsor and Detroit.

Mr. Walter Clark and Miss Irene Chrysler, two popular London young folks, were married in Woodstock on Wednesday.

The Canada Gazette announces the following appointment: First Hussars—To be quartermaster, with honorary rank of captain, Geo. Eustace Baxter. The first department were called to a blaze at Mrs. Stewart's residence, on Cayce street, shortly before three o'clock yesterday afternoon.

The St. Andrew's Highland Cadets, who go to Durham for Dominion Day, to participate in the Highland Games, will take a pipe band of ten strong.

Mrs. W. J. Avey and son, of Maitland street, and her sister, Miss A. Chittick, of King street, left last night on an extended visit to their sister, Mrs. W. O'Brien, of Ponoka, Alberta.

The annual lawn social of Chalmers church will be held on the church grounds Thursday evening, July 6. A splendid programme is promised. Refreshments will be served by the ladies.

City post office arrangements for to-day (Dominion Day) are as follows: Delivery by carriers, general delivery wicket open from 8 to 10 a. m. and 6 to 7 p. m. All mails despatched as usual.

The London Boys' association of Windsor has elected the following officers: President, J. F. Smyth; vice-president, C. J. Wall; secretary-treasurer, Pres. Housh; executive committee, John Donahue, Ben Holman and the above officers.

The Western Ontario Commercial Travelers' Association, through their board of management, have received a very cordial invitation from the commercial travelers of Hamilton to take part in a concert which takes place in the drill hall, July 14, and also a gala day on the 15th. A procession will leave the drill hall, Hamilton, at 10 a. m., and the sports will take place at Brant House, Hamilton Beach. It is hoped that a very large number of the London travelers and their friends will be able to take advantage of the invitation and to take part in what is expected to be a very enjoyable

ation of the township of East Williams, in county of Middlesex, prohibiting the sale of intoxicating liquors. The appellant contended that this by-law, having been defeated at a regular meeting of the council, it was not open to the council to take proceedings at a special meeting to pass it. Appeal dismissed with costs.

The executive of the London Male Chorus held a meeting at the residence of Mr. Jordan Thursday evening, when it was decided to give a concert with orchestra in February next, at which a very prominent soloist is expected to take part. The work last year was very satisfactory, both from artistic and financial standpoint, but an effort will be made to do even better in the coming season. It is proposed to limit the membership to 50 voices, and as applications are already coming into the president, Mr. F. N. Soper, and the secretary, Mr. F. Noggett, it is only a question of time before the chorus will be in a position to send in their applications at once.

One of the largest crowds that ever promenade London's streets was out last night. The stores were open, and the fact that there is nothing doing in the place for two days seemed to impress the citizens with a sense of responsibility. They seemed to realize that they owed something to their families, and many of the stores were kept open for several hours past regular closing time.

At a meeting of the ways and means committee of the Old Boys, held last night, it was decided to start the collections on Monday. The committee have several plans on foot for the entertainment of the visitors during the reunion and it was thought advisable to see just what means they have at their disposal before taking action. Hence the reason for early action.

The Rev. R. T. Gardner, M. A., hon. sec. of the council for service abroad, is now visiting Canada, deputed by the Archbishop of Canterbury, to see before the Bishops of the Dominion several matters that will be discussed at the next Lambeth Conference. Mr. Gardner will deliver a paper at the Cathedral on Sunday morning next.

Mr. George Gregory, of the Grigg House, has been holidaying in Detroit, where he met many of the enthusiastic of the Old Boys' homecoming in August.

Railway passenger agents report holding business yesterday as being exceptionally good. Very many people left the city to spend the holiday in various places.

Mr. and Mrs. R. Parsons, of East London, leave to-day for England, to attend a large family gathering in the old land.

Mr. Arthur Bayly, city, leaves to-day for a holiday in Muskoka.

Miss Ethel McKelvey, of this city, leaves to-day for Huntsville.

Miss Carlisle, city, left Friday for New York.

## THREATEN DOCTOR DOES PT. STANLEY

Solicitors Demand Retraction—Hon. Adam Beck's Prompt Steps in Matter

Dr. English, Chairman of the London Board of Health, has received letters from the solicitors of the Port Stanley Board, demanding that he retract statements made concerning drinking water at the Port.

The presence of Dr. Bell, Provincial Health Officer, at Port Stanley this week was due to the move made by the new evidence in which a direct discharge takes place from a charged cloud to the earth. This discharge is not particularly dangerous, but it is a nuisance, and it is the duty of the city to prevent it. The points of the rods may indeed prevent a violent discharge by assisting in equalizing the potentialities of the cloud and the earth. Lightning rods, to be effective, must, however, be installed properly. They should offer a path of least resistance for the discharge, yet the resistance of this path must not be too small. If the rod does not form the path of least resistance, the discharge will leave it and find its way to ground through neighboring materials. On the other hand, the resistance in which a direct discharge takes place through the air is too rapid—almost explosively—and is liable to set up induced currents in the conductors in neighboring buildings. The rod should be carried to the ground with as few bends as possible. Iron is a better conductor than copper, and it is more difficult to rust. The rod should be provided with atmospheric conditions are not such as to rust it away too quickly.

The other, or B type of stroke, as it is called, occurs when an uncharged cloud intervenes between the earth and the charged cloud. This intervening cloud acts with the charged cloud as an electrical condenser, and when a discharge takes place between them, the charge upon the upper cloud is neutralized, and the lower surface suddenly set free, and consequently a sudden strain in the discharge. The result is that if a discharge takes place, it is apt to follow an erratic path. The effect of such strokes is more serious than that of an A stroke, and lightning rods offer but slight protection. The only way to protect the building from such strokes is by the use of a cage of metal. It is suggested that powder magazines be protected by a complete cage of metal. It is suggested that powder magazines be protected by a complete cage of metal. It is suggested that powder magazines be protected by a complete cage of metal.

"Lightning will sometimes prefer to find its way to ground through the hot gases of a tall chimney, rather than through the rod provided for it. It is suggested that this might be prevented by the use of rods well above the top of the chimney, connecting them to the ground through vertical wires. This is suggested, but it is not a practical proposition, as it is difficult to provide a better earthing connection than that usually obtained through the concrete foundation. The discharge of a lightning rod is a discharge of ground conductors by means of large plates should be abandoned in favor of a ground obtained through a perforated steel spike driven into moist ground, and filled with granulated charcoal (not coke).

The practice presented to electrical engineers is in some ways even more troublesome than the protection of buildings from lightning, for in addition to providing a path for the discharge to ground, the lightning arrester must prevent the line current from flowing back to the building. This is done by the use of lightning arresters which are connected to the ground through a series of resistances.

An Old Cure for Ivy Poison.  
This is the reason when the person who takes wood for days thereafter suffers from itchy hands and swollen wrists and itching hands, sometimes suffering real agony from it. The cure is simple and quick. Take a piece of the copper wire and lay it on the hills that both seem to try hard to torture human beings with their thorns, and will do so if they come too close, especially in the spring. A physician once told us that there was nothing but that that doctoring it, and letting it alone took about equal time, so he advised washing the parts with a solution of copper sulphate. Now, the cure consists in a very simple addition to two things: Preventing the spreading of the poison, and drying it up quickly. Its spread can only be prevented by washing frequently with a solution of copper sulphate, and drying it up quickly. Its spread can only be prevented by washing frequently with a solution of copper sulphate, and drying it up quickly.

At a meeting of the ways and means committee of the Old Boys, held last night, it was decided to start the collections on Monday. ## HE SPAT IN COURT COUNTED CONTEMPT

Wm. McNee Sent to Jail for Laughing in Face of Magistrate

William Farmer, the young man who played "Jack the Peeper" came up for sentence. He was fined \$5 or 30 days, the fine was paid.

Thos. Sullivan and Fred Thompson bought bread at Merchant's bakery and refused to pay for it. They attempted to assault the proprietor when pay was demanded, and the police were called. Sullivan was fined \$5 or 10 days, and Thompson, who was the more aggressive, was fined \$10 and costs, or 21 days.

James McIntyre was fined \$5 or 20 days, while Mike Costello, who was up on Tuesday, was drunk again Thursday night, was fined \$10 or 20 days. Four other drunks were given their freedom.

Clarence Hammett and George Brine gave a pugilistic exhibition on Clarence street, for which pastime they were fined \$2 a piece.

Wm. McNee was charged with owning an unlicensed dog. When the charge was read to him, he shouted "straight goods, I never owned a dog." He was asked to keep quiet, but was apparently not at home in the court, as he kept up an incessant noise. When he was put in the witness box he so far forgot himself as to spit behind the Police Magistrate's chair and when reproached by the P. M. he laughed in his face. The P. M. ordered him to be locked up and he was to his astonishment to a cell on a charge of contempt of court.

Wm. Howaru, charged with stealing a ring and chain, came up again and was remanded until to-day.

Harry D. Hatch, who induced a young Englishman to buy a cheap watch at a big figure, was given a severe lecture by the magistrate and allowed to go on suspended sentence. Restitution has been made to the Englishman.

The young fellow who celebrated his birthday day by stabbing little Frank Walsh, was found guilty and remanded a week for sentence.

## PROTECTION AGAINST LIGHTNING

Recent Attention to the Subject—The Opinions of Sir Oliver Lodge—Two Kinds of Stroke.

The subject of lightning protection has had considerable attention of late. Two reports of committees having been made public, he first gives the results of the lightning research committee, which was organized some years ago by the Royal Society of British Architects and the Surveyors' Association, which deals principally with the protection of buildings.

The report of the National Electric Light Association in Denver, by Alex. Dow, is a report on the protection of electrical systems from lightning. "In neither report," says the Electrical Review, "is there any particular novel suggestion, nor have the investigations brought to light any new phenomenon. Previous recommendations are upheld by the new evidence in which a direct discharge takes place from a charged cloud to the earth. This discharge is not particularly dangerous, but it is a nuisance, and it is the duty of the city to prevent it. The points of the rods may indeed prevent a violent discharge by assisting in equalizing the potentialities of the cloud and the earth. Lightning rods, to be effective, must, however, be installed properly. They should offer a path of least resistance for the discharge, yet the resistance of this path must not be too small. If the rod does not form the path of least resistance, the discharge will leave it and find its way to ground through neighboring materials. On the other hand, the resistance in which a direct discharge takes place through the air is too rapid—almost explosively—and is liable to set up induced currents in the conductors in neighboring buildings. The rod should be carried to the ground with as few bends as possible. Iron is a better conductor than copper, and it is more difficult to rust. ## RAMMED A SLEEP-ING WHALE

Ever Reliable DAISY FLOUR

Smashing into the huge bulk of a sleeping whale in mid-ocean with such force as to throw the captain out of his berth and the cook out of the galley, was the stirring tale of seafaring brought to Bowlin's wharf, foot of South street the other day by the schooner Kover, commanded by Capt. Henry Kiehn, owned in this city and consigned with 8,000 dozen pineapples to the Kirwan-Schall Company. It was two o'clock last Sunday afternoon when a gentle breeze from the southwest, and the good schooner Kover, homeward bound, four days out from Rocks Island, after her first voyage of the season to the Bahamas. There was a general heave to the sea, and after the captain had taken a weather squint on the horizon and had seen that all sails were drawing nicely, and the mate humming a homeward bound tune at the wheel, he turned in for a sleep in prettily for his first trick at the wheel in the evening watch. In the galley sat the cook, dozing over a dishpan of potatoes, and under a dispirited belling standing jib sprawled a huge negro sailor. There was in the air all the elements of peace, and about the ship such animal comfort as repays Jack for the sleepless nights struggling with gale and sea.

With a blow that seemed likely to shiver the ship's timbers she stopped stock still, and her masts away in a way that no doubt would have meant distorting had the shrouds been anything but the best Manila rope. The cook and his potatoes were sent flying in different directions, and the head of the negro sailor took up with a bang against the jib trawler while the mate who had been at the wheel found himself hanging on the cabin coping. Taken all aback, the ship shivered, and then the sails filled once again and the resumed her course.

What had happened was a mystery. The vessel had fairly gathered way when she was disclosed.

Soft jobs are the hardest ones to set.

Take things easy often lands men behind prison bars.

Here's to our enemies, mostly of whom are in our head.

There is no poetry in work, but there is work in poetry.

If money is the root of all evil most of us work with a spade.

The wife may object to life insurance. The widow never does.

The chances are that the man who looks best when he leaps won't leap.

A hammock is a good thing to teach you how to be comfortable somewhere else.

It is unfair to call a chauffeur a knacker, because he is always running some one down.

The only way a man can fool a woman is to believe her when she thinks he doesn't.

came tumbling up the compass stairs, remembered odd tales of sea, and knew that his ship must be struck a sleeping whale. Run forward to investigate, the captain hung over the railheads, and uttered an exclamation highly intelligible to students of the vigo English of the seas. The forefoot of the schooner had been bent into a huge gammoning iron, 12 inches and two and three-quarters thick, had been bent out of throwing the jib askew, as it office of this powerful piece of machinery in position the bob-stays steady the bowsprit. Fortunately further damage was done to the vessel, and for the balance of the sharp lookout was kept.

And if you don't believe the story, go to Bowlin's wharf, you may see the Rover and some men with boathooks trying to prod loose from the bent forestay a piece of very thick skin about two feet in length, at least, that was what was being the other day. The murex was the harbor made it difficult to gulsh this singular token of a venture driven with great force the heavy ironwork. As the cargo goes over the side and ens in the water this bit of be gotten and then some one a most singular valuable out-
