NESTLE'S MILK FOOD

TRADE MARK.

ITS CONSTITUENTS AND PREPARATION.

Manufactured only at VEVEY, SWITZERLAND. It contains nothing but **MILK**, **Wheaten Bread Crust** and **Sugar**, and requires only water to prepare it for use.

The **MILK** is cow's milk, condensed in *vacuo* at a low temperature, to the form of a powder, so that, excepting condensation, the properties of the milk remain unchanged, while its freshness is preserved unimpaired.

The **Wheaten Bread Crust** is prepared from the best wheat, according to a peculiar method, which preserves all the nitrogenous substances, and makes the crust rich in gluten, while by being baked at a high temperature the gluten is rendered soluble; and being browned throughout to a certain shade, the starch is converted into dextrine, thus removing a very forcible objection made to many farinaceous foods, viz.: infants cannot digest starch cells. Further, the crust is pulverized to an impalpable powder.

The **Sugar** added is cane sugar, not for the purpose of sweetening, as it is already sufficiently sweet from the sugar of milk in the condensation, but a small percentage for the purpose of supplying the carbon requisite, cane sugar being about 38 p.c. pure carbon.

These constituents are then united in such proportions that by the addition of *water only* (thus doing away with the danger of milk, usually impure, and frequently diseased), in the proportion of ten of water to one of the Food, it forms a liquid, which chemically analyzed will be found to be almost identical with the chemical analysis of Woman's Milk. Such are the constituents and preparation of **NESTLE'S MILK FOOD**.

THOMAS LEEMING & CO., Sole Agents, MONTREAL, P. Q.

We would also call attention to **NESTLE'S CONDENSED MILK**, as the richest and purest in the world.
