

The first part of the report is devoted to a general
 description of the country, its position, extent,
 and the nature of the soil. It is situated in the
 north-western part of the island, and is bounded
 by the sea on the north and west, and by the
 mountains on the south and east. The soil is
 generally fertile, and is well adapted for the
 cultivation of the sugar cane.

The second part of the report is devoted to a
 description of the sugar cane, its cultivation,
 and the mode of preparing it for the market.
 The sugar cane is a very important article of
 commerce, and is cultivated in great quantities
 in this country. It is a very hardy plant,
 and is well adapted for the climate of this
 island.

The third part of the report is devoted to a
 description of the sugar mill, its construction,
 and the mode of operating it. The sugar mill
 is a very important part of the sugar plantation,
 and is well adapted for the climate of this
 island. It is a very simple machine, and is
 well adapted for the use of the small
 planter.

The fourth part of the report is devoted to a
 description of the sugar trade, its history,
 and the mode of conducting it. The sugar trade
 is a very important branch of commerce, and
 is well adapted for the climate of this island.
 It is a very simple trade, and is well
 adapted for the use of the small planter.

The fifth part of the report is devoted to a
 description of the sugar market, its history,
 and the mode of conducting it. The sugar market
 is a very important branch of commerce, and
 is well adapted for the climate of this island.
 It is a very simple market, and is well
 adapted for the use of the small planter.
