What the Grain Brokers

Thomson & McKinnon: Altho selling in the breaks will be dangerous until the actual movement develops, we suggest placing open orders to sell wheat to catch moderate rallies, as we believe prices are bound to work lower ultimately. Finley, Barrell & Co.: Advise sales of wheat on all hard spots.
S. B. Chapin & Co.: Wheat outlook tainly looks bearish.

The trade in milkers and springers was good for the quality of the cows offered. Sheep, lambs and calves were in good demand at steady prices.

Receipts of Ontario hogs were light, but a liberal supply coming from the northwest had the effect of holding the market about steady.

Some observations were made by dissatisfied shareholders in regard to the expensiveness of the management of the canal. It was pointed out that there were 32 salaried members on the the board of administrators, and it was said this number might be reduced for the profit of the company. All the reports were adopted as usual.

Active Selling Marked the Day -Prices on the Down Grade.

CHICAGO, June 3.—Bearish deductions from the government report sent wheat down today to about the lowest prise so far this season. The market closed steady at a loss of but 11-8c to 1½c net. Corn and oats finished substantially the same as last night, and provisions were off 5c to 25c.

Altho wheat crop figures from Washington did not exceed the generally accepted private estimates, the official announcement proved to be more of a THE REST.

Active selling marked the day and kept the market almost continuously on the downgrade. Export bids were sharply reduced, and country offerings of new wheat showed a big increase west of the Missouri River.

Advance Wiped Out.

Heavy profit-taking by longs wiped out an advance in corn. Better weather in Argentina had much to do with the willingness to realize.

After some weakness at the outset, most of the oats crowd appeared to consider the price of oats as on a reasonable footing compared with corn, regardless of the government report. There were advices that oats were suffering irreparable injury from drought in Missouri and Iiilinois.

Provisions reflected a break in hog values. Corn strength led to some buying, but not enough to offset rather free unloading on the part of longs.
