

R

YSDYK'S HAMBLETONIAN.

The descendants of this horse have raised the trotting horse to his highest perfection. In him we have the blood of

Messenger and Bellfounder united. Rysdyk's Hambletonian has become the most noted as a sire of marvelous speed, and also that his descendants were able to transmit great speed to their offspring. The history of this one division of the trotting family would require a large book. One thing very sure is that where you find great speed, you will find the blood of Imported Messenger and Hambletonian in liberal proportions. When you trace the breeding of the Bashaws, Clays, Morgans, Hambletonians, Blackhawks, Mambrinos, Pilots, Blue Bulls, American Stars, etc., you will find that their pedigrees cross and re-cross. The one horse which stands pre-eminent as the foundation of our trotters is Rysdyk's Hambletonian.

"International Stock Food" will give any horse more nerve power, speed and endurance.

MORGANS.

Care in selection and breeding has given the Morgan horse an enviable reputation. The Morgans have fine action, good tempers and sound constitutions, and if they could have had the advantages that other families have had they would have shown a much larger number of fast performers. Ethen Allen was one of the most celebrated of the Morgans. He was small, but a beautiful horse, and a very rapid goer for his day. His style and action were perfect. He was the fastest stallion that had ever been trained. As a three-year-old he trotted in 2:36, which was the fastest time for that age.  "International Stock Food" makes stallions surer and makes brood mares raise better colts.
