

passes through the two narrow channels, on each side of Hoolaiva, where it runs with considerable rapidity, and then spends itself in the *lagoon*. The ebb returns the same way, and runs with rather greater force. The North West tide is met, at the entrance of the *lagoon*, by one from the East; but this, as I have before observed, was found to be very inconsiderable.

1777.
July.

END OF THE FIRST VOLUME.
