PLANS FOR NEWMAN BROOK SEWER MAIN

The workmen of the water and sewerage department have been at work all this week, deepening the Newman Brook, in order to make the drainage of sewage from that vicinity more complete. Commissioner Jones said this morning that the further deepening of the brook to provide for the laying of a trunk sewer which will handle the waste from all that section of the city. Mr. Jones said that, if no great amount of rock was encountered, it would be possible to lay the sewer in the bed of the stream, which would carry all the water from the brook as well as the sewerage and make it possible to fill in the brook from the vicinity of the rifle range to where it empties into the harbor.

The Reflections of a Mirror

In the reflections of a mirror lie some of the most potential possibilities for effective home furnishings. The mirror is more than a picture, for, properly placed, it reflects a different picture from every angle at which it is viewed.

Even the remote and otherwise unobserved nook or corner may be brought into the foreground by the mirror's reflection. The rare art objects, the interesting furniture setting, the cherished heirloom, or the artistic drapery you wish to emphasize may be constantly presented to view by the correct placing of the mirror. Its possibilities are almost unlimited, and are freely recognized by home furnishing authorities.

And the effectiveness of the mirror is not only in its reflections. Mirrors are created for home decoration today, which are the work of master artists. Everet shows many unusual mirrors—mirrors for the reception hall, for the living-room, the dining-room, the library, the bedroom, and wall mirrors.

We shall be glad to have you see the many interesting mirrors we have so carefully gathered and to offer suggestions for the most effective placing of mirrors in your home.
