#### EYE STRAIN.

This is usually due to a defective formation of the eye ball, and not to a diseased condition.

While glasses do not cure this defect, they correct it by restoring normal vision without strain.

Eyestrain causes loss of nerve energy and physical disability. If bodily comfort is desired, together with ease in reading, glasses to correct this defect should be procured. If you are suffering from eye strain let us examine your eyes and fit you with the right kind of glasses.

Why not arrange an appointment today.
