LIBERALS IN THE SADDLE IN AUSTRALIA

Premier Fisher Tenders His Resignation and Mr. Cook is Called on to Form a Government

London, June 21.—The Sydney, Australia, correspondent of the Times says that according to telegrams received there the Ottawa press attributes the delay in the reciprocity negotiations with Canada to Australia's dislike of Canada's naval policy.

"It is regrettable," says the correspondent, "that such misstatements should gain currency. The sole cause for the postponement is the result of the opinion of the government, deprive them of authority to conclude such important negotiations in the name of Australia. It is hoped and believed here that the negotiations will be resumed with the Canadian trade commissioner as soon as the present political complications have been unravelled."

Premier Fisher, who yesterday tendered the resignation of the ministry, which was accepted by Lord Dunsen, the governor-general, took the course because the latest election returns showed that Sir W. L. Lyne was certain to lose in the House division, thus placing the government in a minority of one in the house of representatives.

Mr. Cook will accept Lord Dunsen's commission to form a Liberal government this afternoon, and it is expected his task will be completed by Monday night. The new parliament will meet at the end of the second week in July.

Baptist District Meetings

That energetic opposition should be offered to the government proposal to run more Sunday trains over the I. C. R. was the opinion expressed in a resolution passed at the Sixth District meeting of the Baptist conference at Havelock on Saturday. The election of officers for the year resulted in the choice of Rev. S. M. Parker, president, Rev. Mr. Sandling, vice-president, H. A. Patterson, of St. John clerk, and Mr. Seccord, of Pecosburg, treasurer. At the meeting of the Women's Missionary Aid Society in connection with the conference Mrs. N. C. Scott was elected president, and Miss Keith, both of St. John, secretary. Mrs. F. H. Wentworth gave an interesting reading, and Mrs. W. E. McIntyre delivered an able address on Home Missions. Rev. Dr. McIntyre spoke on Foreign Missions at the evening meeting. The district meetings were well attended.

Mr. McLellan's Motion

Notice of motion that all city business shall be transacted in public in the future, which was given by Commissioner McLellan at the committee meeting of the city commissioners on Saturday, was received without comment by the other commissioners and will be before the common council for action at the week-day meeting this afternoon.

BORDEN'S ATTEMPTS TO DEBATE COUNTRY

Ottawa, June 21.—Considerable efforts have been made by the Conservative Jingo Press, at the instigation of Mr. Borden, to make capital out of the announcement of Winston Churchill on June 6, that the British admiralty intended to advance the construction of three battleships on this year's programme, starting them as soon as possible, as a result of "the situation created by the rejection of the Canadian Naval bill."

This is an absolute falsification of the facts. There is nothing in the whole course of the British Naval debates to indicate that the British programme could be affected in any degree by the "additional" naval policies of any of the dominions. This was time and again asserted by Mr. Churchill, the first lord of the admiralty. More than that, Mr. Churchill declares categorically that work on the three ships provided for had not been already started, that construction had been delayed because the ships would be so overflowing with work it would be useless to give the orders until they were able to handle them. He asserted emphatically that these three ships would be begun when it was necessary to begin them, and that their construction was not a matter of necessity but convenience.

Evidently the time when the capacity of the naval yards to build these battle ships had arrived, and Mr. Churchill considered it convenient to build them.

The liquor store of T. Philip McGuire, 44 Mill street, was struck by a piece of scuttling which had fallen a distance of fifty feet. Several wounds were inflicted about the head and shoulders.

The case of Samuel Collier vs. the St. Croix Paper Co., which was to have been tried in Fredericton tomorrow, has been postponed until January on account of the illness of a material witness.

The Minister of Marine, Mr. Fisher, has taken advantage of his visit to St. John to inspect government work being carried on at the Lorneville breakwater and the St. Martin's wharf. Captain Robert Carson, the contractor on the St. Martin's wharf, has discovered in the cash box a hidden in a secret place.

Joseph Edge, who was arrested several months ago, was taken back to Campbellton on Saturday by Chief of Police Hughes to answer to a charge of breaking into and robbing a store.

In future, according to word received by local representatives of the unions, united action will mark all dealings of the Brotherhood of Locomotive Firemen and Engineers, and the Brotherhood of Locomotive Engineers with the various railways of Canada and the United States.

ANNIE ABBOTT AT OPERA HOUSE.

Although dramas, covering almost every theme, comedies exploiting the best material for laughing purposes, vaudeville of almost every nature, motion pictures of various subjects, and in fact all other forms of amusement have been seen at some time in the local Opera House, it is surely difficult to state whether a more mysterious and unique feature has ever been presented there than that booked for the last three days of this week in Miss Annie Abbott, known far and wide as the famous Georgia Magnet.

Miss Abbott, unlike any other human being known to the scientific world, possesses what might be termed an occult power, that cannot be overcome by muscular strength. During her performance she gives many strange and almost weird demonstrations of her wonderful power of strength.

Miss Abbott will appear at the Opera House next Thursday, Friday and Saturday, afternoon and evening, in conjunction with three other artists, giving a performance at once mysterious, unique, coupled with a refined comedy playlet and novelty music. Further particulars tomorrow.

MORNING LOCALS

Isaac Parker, the foreman in charge of the wharf which is being built by Contractor Boone on the West Side of the harbor was painfully injured on Saturday, when a log, which was being swung from the wharf, struck him on the knee, causing severe bruises and tearing some of the ligaments.

Two workmen employed by the J. S. Metcalfe Co. in the construction of the C. P. R. elevator at Carleton were severely injured yesterday morning. One man was struck by a piece of building material which indicated an ugly scalp wound. Later in the day George McLennan, who was working bene Fine one of the towers, was struck by a piece of scuttling which had fallen a distance of fifty feet. Several wounds were inflicted about the head and shoulders.

WOMEN WHO WORK FOR A PENNY AN HOUR

(London Daily News)

Twelve sweated trades in which women workers are engaged were illustrated yesterday at an interesting exhibition at the Knightsbridge Palace Hotel.

An old woman, who sat making black braid, told a "Daily News" representative that the rate of pay for her work was 7d. per dozen yards, and that it took her about eight hours to make that quantity. The rate of pay was, therefore, less than one penny per hour.

Eight Shillings for 72 Hours

At artificial flower making it is a week can be earned by working twelve hours a day, and at brush making—that is, fastening the bristles into brushes—six weeks can be earned by working eleven hours a day. The two women illustrating these trades at the exhibition had toiled at their craft for over 50 years.

Shirt, blouse, skirt, matching-box, doll, tooth-brush, and hood-making trades were also represented.

In opening the exhibition, which was organized by the Women Writers' Suffrage League and the Men's League for Women Suffrage, Mrs. Flora Annie Steel said that sweating was a woman's question, because 85 per cent of sweated workers were women. They were paid less than the men for the same work, although they had two hands, two eyes and everything else that men had—except votes.

An interesting speaker was Mrs. Abbott, who said she was employed at making buttonholes in collars at 11-2d. per dozen collars (that is three dozen buttonholes), and told her story so graphically that the audience of West End was moved to frequent applause.

Miss Clementina Black, who declared that every lady present who had a safety razor or a hook and eye about their clothing was concerned in the sweating business, urged that pious opinions would not help, but the Trades Board would, and A. G. Gardiner also emphasized the fact that legislation alone could be effective. Past experiments and accomplishments had been entirely successful, both on the employers' and the workers' side.

Poor Who Help the Poor

The Earl of Lytton, J. Malcolm Mitchell, and Mrs. Pember Reeves also spoke. Mrs. Reeves said that from careful examination of family budgets in Lambeth she found that girls who earned 6s. a week actually supported themselves and contributed to the support of one or two other members of the family. It was always the sweated workers who supported others.

On the farm of Charlet T. Spear in Rockland, Me., there are 8,000 feet of sweet peas up and ready to stake. They consist of fifteen varieties.

Flies Won't Breed

Won't even stay where Cyclone Insecticide has been sprayed; it kills all forms of insect life, destroys typhoid, diphtheria and scarlet fever germs, and leaves a refreshing clean odor.
