

Edinburgh, the Faculty of Physicians and Surgeons of Glasgow and the University of London, also accept the class tickets of Bishop's College, and the Diploma of this University exempts its holder from being examined on the subjects of the Primary branches and Matriculation. Such candidates are therefore only required to pass in the subjects of the Final Branches, including Hygiene. The Scottish colleges acting conjointly grant only one examination, and therefore confer a triple qualification.

The degree in Medicine and Surgery of this University, being accepted by the licensing bodies of Great Britain, its possessor is entitled to the same exemptions as are allowed all other recognized colonial degrees. The College of Physicians and Surgeons of Quebec accept the degree without further examination, provided the holder of such degree has, previous to beginning the study of Medicine, passed the preliminary examination exacted by that Board.

The class tickets for the various courses are accepted as qualifying for the examination of the College of Physicians and Surgeons of Ontario, and the Matriculation examination of this Faculty is recognized by the general Medical Council of Great Britain.

The Medical degrees of this University are—Master of Surgery (C.M.) and Doctor in Medicine (M.D.) The degree of Master of Surgery is not conferred upon any person who does not at the same time obtain the degree of Doctor in Medicine.

Convocations for the conferring of Medical degrees are held in Montreal immediately after the close of the session.

#### HOSPITAL PRACTICE.

Montreal being the largest and most populous city in the Dominion of Canada, as well as the commercial metropolis, affords very great opportunities to the medical student for acquiring an amount of practical experience of disease and accident, medical and surgical, that is rarely obtained elsewhere. Unfortunately the larger the city the greater the extremes of wealth and poverty, and Montreal forms no exception to this rule. This condition of things adds to the opportunities of the medical student for the
