NO. 9.

THE NEW Church Hymnal for sale at the Greetings Office in several Qualities and Styles.

JACK CANUCK — "Poor old Nursey, she still thinks I'm a kid. Every time a new man comes around to buy a horse or make a deal for the stuff she tries to shoo him off the farm."

Facts for Weak Women

Nine-tenths of all the sickness of women is due to some derangement or disease of the organs distinctly feminine. Such sickness can be cured—is cured every day by

Dr. Pierce's Favorite Prescription It Makes Weak Women Strong, Sick Women Well.

It acts directly on the organs affected and is at the same time a general restorative tonic for the whole system. It cures female complaint right in the privacy of home. It makes unnecessary the disagreeable questioning, examinations and local treatment so universally insisted upon by doctors, and so abhorrent to every modest woman.

Author of "HOME SWEET HOME."

The dedication of a monument to a poet gives the commencement exercises of one college a distinction no infrequent in this country, says The Literary Digest New York. Union University has dedicated a memorial gateway on its campus to John Howard Payne. It was here that Payne spent his student days: hence the memorial, which may expand, as the fund seems likely to grow beyond the needs of the cost of the gateway, into the additional establishment of a chair of English poetry. Few men have done less in the way of positive contribution to American literature, or are more widely known than John Howard Payne, the author of "Home Sweet Home," perhaps the best known song in the United States possibly in the English-speaking world.

The contrast between Payne's work and his reputation is heightened by the contrast between his sentiment as expressed in his song and his career. He made himself the most popular minstrel of the home, and spent practically his whole life in exile. He was born in New York City, but his boyhood was largely spent in eastern Long Island. He was a student in Union College, now Union University at Schenectady, New York, but his education was interrupted by the business failure of his father. He then decided to go on the stage, and made his debut at the old Park Theatre in New York City. He was successful, and appeared before large and enthusiastic audiences in other cities. In 1813 he sailed

for England and made his appearance at the Drury Lane Theatre, in London, in his original part of Yonny Norval in "Douglas." He had decided talents as actor, manager, and playwright, but was conspicuously lacking in business ability, and was continually in financial embarrassment. He wrote plays, verse, and criticism, and he was skillful at adaptation. "Home, Sweet Home" was written as a song in his opera "Clari Or The Maid of Milan," which was produced at Covent Garden Theatre in 1832. In 1823 Payne returned to America, and ten years later went to Tunis, Africa, as Consul; he was recalled in 1245, and reappointed in 1851. He died at Tunis in 1852, and was buried in the cemetery of St. George, but his remains were brought to Washington in 1883, and reinterred in the presence of a distinguished company.

Is Impressed By London Strikers.

The steamship St. Paul arrived last night with a full passenger list. F. W. Taylor, of Philadelphia, who was aboard said: "I was in London during all of the strike, and was impressed with the resolute character of the strikers." "At Tower Hill I saw 30,000 or 40,000 laborers from the East End of London in mass meeting, and they took an awful interest in what was being said to them by their leaders." "It was in the operation of the tramway and street railway systems that the people of London suffered most. Londoners don't like to be inconvenienced in their daily routine, and it was a hard-

ship to the masses to have to walk from their business.

"The real cause of the strike was the high cost of living. It was not a political movement, as some of the London newspapers have been telling us. The strike is, no doubt, a victory for labor, and now, for the first time labor and capital have equal representatives on the Conciliatory Boards to deal with their problems."

Another passenger was Miss Percival Allan, of London who is making a trip to America. She has been engaged to sing at a concert at Bar Harbor Saturday.

Has Cast 10,000 Bottles On Sea.

London, Aug. 26. Some interesting stories about the velocity and peculiarities of ocean drifts and currents are told by Captain Alexander Simpson, who is a fellow of the Royal Geographical Society and who in the last twenty-six years has been making experiments in that direction with bottles.

The Captain says that during all these years he has thrown overboard nearly ten thousand bottles with messages enclosed. Nearly one thousand bottles have been returned to him from all parts of the world, and he receives them at present at the rate of about three a week.

"One of the most interesting drifts," said Captain Simpson, "and one of the longest" was by a bottle put overboard 146 miles northwest of Cape Town, which was picked up four and one-half years afterward on the Shetland Islands. Another put overboard east-southeast of St. Helena reached the Norwegian coast in a somewhat shorter time. These bottles are carried by the southeast trade winds toward Cape San Roque, on the Brazil coast, and passing through the West Indian Islands make the circuit of the Gulf of Mexico. Under the influence of the Gulf Stream they are deposited on European shores.

"Ten bottles put overboard in the vicinity of Cape Horn were picked up off the southern coasts of Australia after journeys from ten to twelve thousand miles at an average daily rate of ten miles, while bottles put overboard within twenty degrees south of the equator in the Atlantic and Indian oceans make an average drift of eighteen to twenty-five miles daily to the west and northward,

Resourceful Reporter.

Paris, Aug. 29. People who have been interviewed in strange ways and in strange places. The climax, perhaps, has been reached by the reporter of a Parisian paper. He plunged into the Seine after his victim and interviewed her while swimming. The reporter's prey was Juliette Caro, the plucky little girl of twelve, who swam against the champions of the world, and finished fourth.

When it was known that, with an allowance of some 1,500 yards, the little girl plunged into the Seine at the Font d'Austerlitz at the same time as Ooms, Maas, and the other champions started at Ivry, all eyes were turned towards her.

A reporter plunged in after her as she reached the Pont Royal. He swam up to her side. There was no time to present a card. Just one word, anything she said then and there would do for an interview. She was too busy striking out with her hands and feet. The reporter insisted: "Surely you must feel tired?" he said. "No," was the curt reply: "I am going to finish." That was all he could obtain for his trouble but it was enough. He hid a "scoop."

largely through the efforts of Mr. Hill. This road runs on a 5 per cent. grade and the engineering work rivals that of the railroad that runs beneath it. For two miles it runs through deep cuts in solid rock or huge fills of concrete or basalt. It will undoubtedly in time be part of a great highway from the Atlantic to the Pacific.

HYOMEI! The Breathable Remedy for Catarrh.

The rational way to combat Catarrh is the Hyomei way, viz: by breathing. Scientists for years have agreed on but failed to get an anti-septic strong enough to kill catarrh germs and not destroy the tissues of the membrane at the same time, until the discovery of Hyomei (pronounced High-o-see).

Hyomei is the most powerful yet healing antiseptic known. Breathe it through the inhaler over the inflamed and germ-ridden membrane four or five times a day, and in a few days the germs will disappear.

A complete Hyomei outfit, including the inhaler, costs \$1.00 and extra bottles, if afterwards needed, cost but 50c. Obtainable from your druggist or postpaid from the R. T. Booth Co., Ltd., Fort Erie, Ont. Hyomei is guaranteed to cure asthma, croup, sore throat, coughs, colds or grip or refund your money back. Sold and guaranteed by J. Sutton Clark.

RUSSIAN GRAIN KING.

Was Queer Character, But His Business Integrity Was High.

Of a peculiar stamp was the man of millions, Nicholas Boukhoff, the Russian grain king, who recently died. In his external he was a mujik merchant. He wore the top boots, the trader's kaffan—coat and overcoat in one, fitting close up to the neck and reaching to the knees—and the embroidered cotton shirt without attached collar, which are the historic garb of the Volga traders, men who carry as much as 50,000 rubles in notes stuck in the leg of a boot and who distrust the documentary machinery of banks. Boukhoff's great fortune compelled him to handle investments and bank paper, but he was in sympathy with the old simple ways. He was in fact an Old Believer and a devout churchgoer who lived his religion.

In his housekeeping he lived on such the same scale as an ordinary hand worker in comfortable employment. He gave away millions of rubles in charity, but was close-fisted in personal outlays. The porters at Nijni-Novgorod and elsewhere avoided him when they saw him stop from a train. He would never pay them more than 10 cents for carrying his baggage. When he met gr. persons he "thumped" them, as he did everybody else, keeping to the Old Believer, Quakerlike form of address. His integrity in business was of the highest.

He would lecture men in his employment if they spent five kopeks needlessly. His patriarchal ways had sometimes a welcome side. He exacted unquestioning obedience to his instructions; but every now and then a man who served him well for some years would receive a draft for 25,000 or 50,000 rubles with no further remark than: "Thou shalt now be a Man, too. I know that thou wilt make good use of the money."

"Very clever, isn't he?" "Yes."

"I'm told that his three older brothers are mentally weak."

"Yes, he's the original sane fourth."

Frederick V. Holman, a prominent business man of Portland and an autoist interested in good roads, has seen the machine work. "It will revolutionize road building," he says. "The work of a dozen or more men is supplanted by the work of a single man, who has merely to operate the levers that distribute the crushed rock. It works equally well in laying and dredging the first coating of coarse rock unmixd with asphalt. Road work with this method gives a highway equal to the pavements of a city street at a cost of about a sixth."

The model road which Mr. Hill is building as part of his campaign for better highways has presented many difficulties. In many places in the rough country the way for it has been blasted out of solid rock. In time he will connect it with a fine highway that is being pushed along the north shore of the Columbia river,

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Breakwater at Castalia, Grand Manan, N.B.," will be received at this office until 4.00 P.M., on Wednesday, September 20, 1911, for the construction of a Breakwater at Castalia, Grand Manan, Charlotte County, N.B.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department and at the offices of E. T. P. Shewen, Esq., District Engineer, Chatham N. B., and on application to the Postmaster at Castalia, Grand Manan, Charlotte County, N.B. Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honorable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary,
Department of Public Works,
Ottawa, August 24, 1911.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Driven Out.

(New Orleans Picayune)
Col. George Washington Goethals, Chief Engineer of the Panama Canal and general director of the activities of the United States in the Canal Zone, is naturally a personage of some little consequence on the Isthmus, and must maintain a dignified establishment. Not long ago, according to a story told by a visitor at Panama, the Colonel, who is a native of Brooklyn, had a paragon of a butler, a negro from the Island of Jamaica, with the very best English training, air and accent.

One day this paragon appeared before Col. Goethals, and in his best professional manner informed him that he found it necessary to leave. He took the step with deep regret, he said, but he must go.

"What's the trouble?" asked the Col. "don't I pay you enough?" "My salary, sir, is entirely satisfactory. "Is your work too hard?" "The work, sir, is quite easy."

"Then what in blazes (or words to that effect) are you quitting for?" snapped the Colonel.

"If you insist, sir," the paragon replied, "I will tell you. But I fear, sir, it will offend you."

"Let's hear it anyway," said the engineer.

"Well, sir, since you will have it, sir, it's the 'horrible language you speak. I cannot bear to 'hear the English tongue mangled and butchered as it is in this 'ouse. I 'ave a desire, sir, to seek service with some English family."

"Did you say you were a month in your last place?"

"Yes, madam, a week with the family on the top floor, a week with a lady on the third floor, a week on the second, and a week on the ground floor."

Meggendorfer Blaetter.

Mistress—Are you sure you'll stay with us, Bridget?
Cook (on her hundredth job)—Faith an' I will. Don't yez suppose I know an aisy mark whin I see wanz-Harper's Bazar.

Quality
in tea may mean
to you flavor or
strength or fragrant
richness. Red Rose
Tea is blended with
such nicety that it is
the combination of all
three points of merit.
Will you try a package.

Cheaper Road Making

(New York Times)
Portland, Ore., Aug. 21. Automobiles and other who want good roads are greatly interested in a new road making machine which has been tested recently on the model road that is being built by Samuel Hill, a wealthy ranchman, from his ranch near Goldendale to meet a country road from that point. Mr. Hill, who is an enthusiastic autoist, has set out to make the finest road of its kind in the country, and he employed S. C. Lancaster as engineer for the work.

This engineer invented the machine for this work. It has been shown to prominent Portland citizens. It takes a load of five tons and a preparation of crushed rock and asphalt oil and disributes it easily and rapidly along the surface of the road-bed. The roller is run along in its wake and completes the task. The great detail of shovelling and leveling by many men is thus obviated.

Frederick V. Holman, a prominent business man of Portland and an autoist interested in good roads, has seen the machine work. "It will revolutionize road building," he says. "The work of a dozen or more men is supplanted by the work of a single man, who has merely to operate the levers that distribute the crushed rock. It works equally well in laying and dredging the first coating of coarse rock unmixd with asphalt. Road work with this method gives a highway equal to the pavements of a city street at a cost of about a sixth."

The model road which Mr. Hill is building as part of his campaign for better highways has presented many difficulties. In many places in the rough country the way for it has been blasted out of solid rock. In time he will connect it with a fine highway that is being pushed along the north shore of the Columbia river,

The Asaya-Neurall
THE NEW REMEDY FOR
Nervous Exhaustion
Night sweats are a sure sign of nervous exhaustion. They weaken the body and depress the mind. "ASAYA-NEURALL" will overcome this condition. It feeds the nerves with Lecithin, the element required for nerve repair. Full control of the bodily functions soon returns. Restful sleep is obtained, the appetite and digestion improve, nerve vigor is regained. \$1.50 per bottle. Local agent.
Andrew Harbo, Back Bay,
W. S. P. Jackson, President,
Miles, Curtis & Co., St. George.
